23-25 April 2024

Valenciennes, France

#ERTMS2024

OFFICIAL OPENING

Josef Doppelbauer | Executive Director, ERA

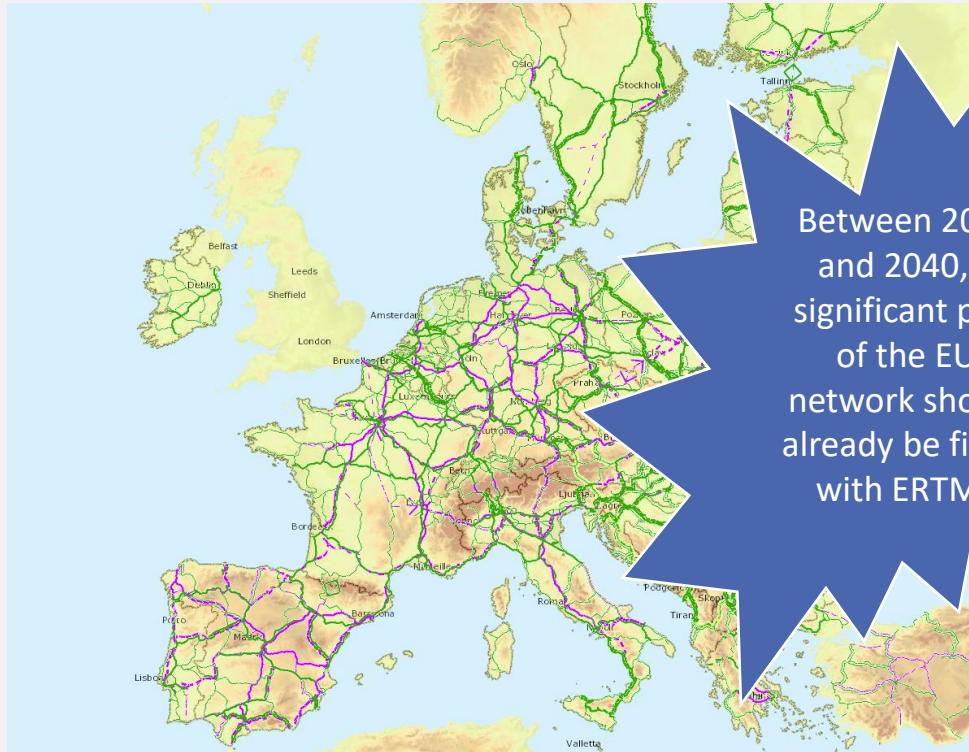

Kristian Schmidt | Director Land Transport, EC

Valenciennes | 24 April 2024

ERTMS: Make it happen!

Why Europe Needs ERTMS?

Between 2030
and 2040, a
significant part
of the EU
network should
already be fitted
with ERTMS

Operator

ERTMS

Infrastructure

Technical and operational
interoperability (end-to-end)

Industrialised products

Deployment of ERTMS – Lessons learned and future perspectives

Moving Europe towards a
sustainable and safe railway system
without frontiers.

Follow us:

A hand is holding a white document with technical specifications. The document is partially obscured by the control panel. The text on the document is mostly illegible but appears to be a list of technical data or a checklist. The document is held in front of the control panel, and the hand is positioned as if the driver is consulting it while operating the train.
