1 Summary

This Technical Document describes the RCT2 standard applicable for all transport documents for international and foreign sales which must be produced and issued electronically and are intended for direct fulfilment by railway undertakings (Undertaking) or by ticket vendors subject to the COMMISSION REGULATION (EU) No 454/2011 – “Technical specification for interoperability relating to the subsystem ‘telematics applications for passenger services’ of the trans-European rail system”.

2. General

2.1 Tickets and documents types

The RCT2 is the standard for the paper transport document applicable at the latest by 1.12.2010 for all transport tickets and other transport documents for international and foreign sales which must be produced and issued electronically and are intended for direct fulfilment.

It is designed in particular for issue of combined "Ticket + Reservation" transport documents and thereby allows for products including several services (transport tickets, reservations and any ancillary services) to be commercialised, as the name RCT (Rail Combined Ticket) suggests.

RCT2 layout is designed in two formats, classic and compressed

Distributors can choose to print RCT2 classic, RCT2 compressed only depending on the acceptance by the TCO of the corresponding CIT paper formats.

The different types of transport ticket (T is used at the end of the acronym) described are as follows

- Non integrated Reservation Ticket (NRT or Transport only),
- Integrated Reservation Ticket (IRT or Transport and Reservation),
- Group Ticket (GRT),
  1. V1, separate issue of a group ticket with complementary coupon and countermark,
  2. V2, issue without complementary coupon (forms part of group ticket) with countermark and voluntary group member check.
- Rail Pass (RPT),
- Vehicle Ticket (VET),

The different types of transport document described are as follows:

- Reservation Only (RES),
- Supplement (SUP),
- Change of Itinerary (COI),
- Upgrade (UPG),
- Boarding Pass (BOA),
- Transport Voucher for compensation (TRV).

2.2 General provisions

The ticket shall be prima facie evidence of the conclusion and the contents of the contract of carriage. The other transport documents are not valid without a ticket.

Transports tickets and documents may be issued for either a one way or a return journey or round trip.
("round trip" means a journey with outward leg A to B via a certain route, and return leg B to A via a different route. It does not indicate a journey composed of three or more legs, coming back at the end to the initial departure station).

Tickets and documents may be issued for one or more passengers in accordance with the terms set out below (see CIT's CIV ticketing manual - see Bibliography - page 175).

"Tickets" and "Reservation" documents need to be issued separately in the following cases:

- if the journey involves a "sleeping berth" reservation (couchette, sleeping car), which may cover its entire length;
- if the journey involves a "seat" reservation and the issuing Undertaking is not the allocating Undertaking.

In the case of IRT tickets, however, one RCT2 ticket covers both transport and reservation (seat or berth).

The RCT2 compressed is a standard incorporating on the front page one or two barcodes, depending on the solution adopted (see point 3.1.3 - page 16). This standard is optional, however applicable with or without barcode(s).

**NB** : Concerning the Stock control number, its position on the front or on the back of the ticket, depending on the security paper (see CIT's CIV ticketing manual) Version 1 and Version 2 of the stock, refer to point 3.1.7 - page 21.

Entries of variable data are always printed by the terminal and cannot be pre-printed.

- the orange bar is abandoned.
- The new security paper 2012 defined by CIT must be used (O).

The unused part of the ticket must be voided with **** in Z (see example point E.1 - page 171).

The paper size and paper specification, security background and security features, stock number positions are defined in CIT's CIV ticketing manual.

Hand writing is not allowed on any electronically issued ticket or document, with the exception of RPT: InterRail and Eurail passes

### 2.3 General Conditions of Carriage

#### 2.3.1 Languages used - Translation of information

In accordance with the provisions of the CIT's CIV ticketing manual regarding RCT tickets, the name of the type of transport document must be given in the language of the country of issue and in a second language chosen between English, French or German, unless one of these is already the first language. Station names must be written in the language of the country in which the station is located (names used by the Undertakings, i.e. the 17 characters names stored in the reference file of the coding of locations (see ch. 4.2.19.1 of TAP)). Other particulars shall be printed only in the language of the country of issue. The division of the ticket into accurately identifiable Fields and positions obviates the need to translate some data. Similarly, the use of pictograms by an issuing Undertaking renders it unnecessary to translate the corresponding data.

In the pages that follow, information requiring translation is marked (T).
2.3.2 Usage of pictograms

Pictograms are permitted as a means of symbolising:

- date of departure,
- time of departure,
- date of arrival,
- time of arrival,
- train number.

The possibility of using pictograms is shown in the following pages next to the elements concerned. Undertakings may use pictograms already defined in UIC Leaflet 413 (see Bibliography - page 140).

2.3.3 Obligatory, optional and conditional information

The respective priority of a given piece of information is denoted by the letter (M) for "mandatory" or (O) for "optional".

In cases where specific circumstances determine whether the information is mandatory and several choices are possible, letter (C) is used to denote its conditional nature.

2.3.4 Textual entries for departure and arrival stations

Textual details regarding departure and arrival stations will retain the maximum length of 17 alphabetic characters.

2.3.5 Information to be entered

Information to be entered is divided into 2 groups:

- commercial information, primarily intended for the passenger, but also for the selling group and ticket inspectors,
- administrative (service) information, generally intended for Undertaking personnel only. Exception for service fee field.
3 Rail Combined Ticket 2 (RCT2)

3.1 Ticket design

3.1.1 Preface

The ticket grid comprises 18 Rows (lettered A to R) and 72 Columns (numbered 1-72) for the classic RCT2 and 86 columns (designated a to n and then numbered 1-72) for the RCT2 compressed. The 18 rows (lettered A to R) concern the printable area of the ticket. There is a bottom line S, that can only contain the pre-printed orange block in version 2 (see A.1.3). For the explanations and the use of the RCT2 classic, see point 3.1.2 and for the RCT2 compressed, see point 3.1.3.

Since, in addition, some Undertakings (see List of abbreviations) use tickets with a detachable coupon at Column 52, it has been decided not to enter any important information at Column 52 (denoted by a broken line on the base grid) where at all possible. The ticket is divided into 8 fields (see point 3.1.2). Field outlines may be pre-printed or printed by the terminal at the time of issue.

Certain items of information, either pre-printed or printed by the terminal, can be represented by pictograms.

If a layout size is smaller than its paper size, to avoid fraud, all empty space must be invalidated with a "Z" made from asterisk.

Where reference is made to elements of messages, these are set out in greater detail in the Technical Document B.5 (see Bibliography).

3.1.2 Explanations for the classic RCT2

NB: Appendix A contains a specimen general grid (18 Rows x 72 Columns) and a standard specimen for use of fields (specimens n° 1 to n° 3) as well as a specimen for each type of ticket to help explaining the provisions below. The prices printed on the specimens are given purely by way of example to show the positions to be used. They do not in any way represent real prices.

Column 72 is always to be blank.

Remaining boxes can be used at the discretion of the issuing Undertaking to meet national provisions (e.g. VAT details) or for sundry customer service information.

Field 8: Administrative details for the issuing Undertaking (Version 2)

Row P  Columns 24 to 37  Booking number for seat reservations
Row Q  Columns 24 to 34  Serial number
Columns 53 to 71  PNR (see - List of abbreviations)
Row R  Columns 14 to 51  Issuing office/Date of issue/Time of issue/Issuing office number
Row S  Columns 13 to 23  Stock number (orange block) (C) depending on the security paper (see CIT's CIV ticketing manual)

Remaining boxes can be used at the discretion of the issuing Undertaking to meet national provisions (e.g. VAT details) or for sundry customer service information.

Particulars on the back such as 1D barcodes for stock control only are at the discretion of each issuing railway.

3.1.3 Explanations for the RCT2 compressed

NB : Appendix B contains a specimen general grid (18 Rows x 14 + 72 Columns) and a standard specimen for use of fields, namely the basic RCT2 grid (specimens n° 1 to n° 5) and 2D barcode(s) with two samples for NRT and IRT (specimens n° 6 and n° 7); for the specimens describing each type of tickets (RCT2 layout), see Appendix A. The prices printed on the specimens are given purely by way of example to show the positions to be used. They do not in any way represent real prices.

Where no other rules are specified, provisions under point 3.1.2 apply.

The "RCT2 compressed" is set out in order to print the main information elements of the electronically issued tickets in machine-readable form as 2D barcode(s) on the front left hand side of the ticket, for check-in and after sales activities.
The 2D barcode(s) allow(s) additional encoded elements for security and verification process.

The "RCT2 compressed" consists of a grid with 86 columns, of which the first 14 columns (a-n) are reserved for printing the 2D barcode(s), while the remaining 72 (1-72) follow the same rules as the classic RCT2 standard.

The grid takes account of the space required for the dimensions defined in the CIT’s CIV ticketing manual, Appendix 5. Column 52 remains empty.
The following solutions (at the current state of technology) are allowed:

- In the empty space, the RCT2 compressed ticket can contain only one Aztec 2D barcode (see sample in Appendix B), including the above mentioned information elements, for check-in and after sales activities, plus encoded elements for security and verification process. The remaining space must be invalidated with a "Z" made from asterisks (see sample in point B.2.3).

- Particulars on the back such as an additional 1D barcode for stock control only are at the discretion of each issuing railway.

- In the empty space, the RCT2 compressed ticket can contain one Aztec 2D barcode, including the above mentioned information elements, for check-in and after sales activities, plus encoded elements for security and verification process and, below, one 1D barcode for general purposes (see sample in point B.2.4) at discretion of the Undertaking. The space that must be left between the two barcodes must be at least double than the largest white stripe of the 1D barcode.

- In the empty space, the RCT2 compressed ticket can contain PDF417 barcode(s) (see sample in point B.2.5), including the above mentioned information elements, for check-in and after sales activities, plus encoded elements for security and verification process.

The columns 1 to 72 are divided into 8 sectors (see point 3.1.2). Field outlines may be pre-printed or printed by the terminal at the time of issue.

Certain items of information, either pre-printed or printed by the terminal can be represented by pictograms.

Where reference is made to elements of messages, Technical Document B.5 (see Bibliography) applies.

**2D barcode(s): RCT2 compressed - details for barcodes**

**Solution 1**
Rows C to I, Columns a to m space dedicated to the printing of the Aztec 2D barcode
Rows J to P, Columns a to m space dedicated to the printing of a "Z" made from asterisks (see sample in Appendix D)
(max dimensions of the Aztec barcode is 41 x 41 dots)

**Solution 2**
Rows C to I, Columns a to m space dedicated to the printing of the Aztec 2D barcode
Rows J to P, Columns a to m space dedicated to the printing of 1 D barcode (see sample in Appendix D)

Space must be left between the two barcodes

**Solution 3**
Rows C to P, Columns a to m space dedicated to the printing of one PDF417 2D barcode(s) depending on the data to be contained (check-in/after sales; security features)
(max width of the PDF417 2D barcode(s) is 27 x 27 dots)

Type and technical specifications for the 2D barcode(s) are given in Appendix D.
### 3.1.4 Commercial information common to all RCT2 documents

Exceptions are set out in the text relating to the relevant transport document and on the relevant specimen in Appendix A.

<table>

<th>FIELD 7</th>

<tbody>

</tr>
</tbody>
</table>

There are no strict rules as regards column allocation, since the translation of the word "PRICE" may necessitate more than 5 characters in other languages. Furthermore, the amount of space needed for the actual price may require fewer positions than the same amount expressed in another currency.

However, the following rules are mandatory:
- row N: columns 53 to 71 to be used,
- blank column to be left between each item of information in the following manner: "PRICE"/blank/currency code of issuing country in ISO format (3 alphabetic characters)/blank/amount,
- amount to be printed to 2 decimal figures, flush right,
- columns not used for the price must be invalidated with at least two cancellation characters, i.e. ** or xx.

or
- amount to be printed to 2 decimal figures, flush right,
- ISO currency acronym of issuing country to be tied to amount being charged in a single string of characters (string with one blank space).

| Column 72 | Blank. |
Details of price in the Euro (O, C).

For the time being, this information is optional and conditional, since some Undertakings will enter this currency on the strength of decisions by their national governments.

Since the indication "PRICE" is already printed for the currency of the country of issue, it is sufficient to enter the ISO currency code (EUR) for the Euro plus the amount flush right. Cancellation characters must also invalidate unused Columns (see Row N).

If not on FIELD 8 ROW R, if only one currency is printed, details of means of payment is obligatory (O) in ROW O.

Mandatory codes to use are:

CA = Cash
CB = Cashless payment
CC = Credit Card
CD = Debit Card

This code list is not exhaustive so more codes can be used.

Service fee has to be printed right aligned on row P.

**FIELD 1**

**Row A**

**Column 1** Blank.

**RCT2 classic**

Columns 2 to 14 Acronym or logo of the Undertaking responsible for issuing the RCT2 document (M).

**RCT2 compressed**

Columns b to n, or 2 to 14 Acronym or logo of the Undertaking responsible for issuing the RCT2 document (M).

Columns 15 to 18 Blank. For Undertakings operating with a detachable coupon at column 52, this position corresponds to the perforation.

**Column 72** Blank.

**Row B**

**Column 1** Blank.

**RCT2 classic**

Columns 2 to 14 Acronym or logo of the Undertaking responsible for issuing the RCT2 document (cont. from row A, otherwise blank) (C).

**RCT2 compressed**

Columns b to n, document (cont. or 2 to 14) Acronym or logo of the Undertaking responsible for issuing the RCT2 from row A, otherwise blank) (C).

Columns 15 to 18 Blank (not to be used).
Columns 19 to 51 | RCT2 title (cont. from row A) for Undertakings required to enter this information in a second language (C).
---|---
Column 52 | Blank. For Undertakings operating with a detachable coupon at column 52, this position corresponds to the perforation.

**Row C**
- **Column 1** | Blank.
- **Columns 2 to 12** | Company code of the issuing Undertaking (M) and Abbreviation [AG], or equivalent, for tickets issued by travel agencies (O). No used column has to be blank. [CIV] (M) can be printed anywhere in this zone if not in ROW M/N/O. “Company code according to TAP TSI TD B.8” is the code belonging to the reference file of the coding for all infrastructure managers, railway undertakings, station managers, service provider companies (see ch. 4.2.19.1 of TAP).

Columns 13 to 52 | Blank.

**Row D**
- **Column 1** | Blank.
- **Columns 2 to 51** | Details of validity of ticket, e.g.: "VALID (FROM!:) DD.MM.YYYY (TO!:) DD.MM.YYYY" or "VALID (FROM!:) DD.MM.YYYY (TO!:) DD.MM.YYYY" (DD = day, MM = month and YY or YYYY = year) (M).

Columns 52 to 72 | Blank.

These columns are initially left blank. If additional information is required for market analysis or customer loyalty schemes - "frequent traveller" (individual or corporate) for instance - it could be inserted here (C).

**FIELD 2**

Information detailing passenger's full name plus number of adults and children

**Row A**
- **Columns 53 to 71** | Passenger's full name. This information generally relates to an "individual", "group" or "corporate" passenger and is entered flush left (C).

Some Undertakings print the given name before the family name. This is a matter for the issuing Undertaking to decide. However, where the entry is too long, it is the given name that must be truncated so that the family name can be entered in full.

**Column 72** | Blank.

**Row B**
- **Columns 53 to 71** | Number of adults indicated by a double-digit numeral. Where only a single digit is required, this is preceded by either a zero or an asterisk, e.g. 01 or *1 (M).

Number of adults to be followed by a blank (M).

Indication: "ADULT". This does not need to be translated when entered in row B (M).

**Column 72** | Blank.

**Row C**
- **Columns 53 to 71** | Number of children indicated by a double-digit numeral. Where only a single digit is required, this is preceded by either a zero or an asterisk, e.g. 01 or *1 (M).

Number of children to be followed by a blank (M).

Indication "CHILD(REN)" followed by their age if necessary (see Note). E.g. 01 CHILD 15 Y. This information does not need to be translated when
entered in row C (M).

In cases where there are more than one age groups, the indication "CHILD(REN)" must be followed by the indication of their age (M).

Suitably equipped Undertakings may enter details of a child's age in field 6.

NB: Details of child's age where this has a bearing on ticket inspection procedures for an Undertaking. The information to be entered depends on the issuing Undertaking. Assuming a 15-year-old has to travel on a cross border train operated by carriers A and B, and assuming carrier A sets at 14 the age threshold between child and adult, and carrier B at 16:

- if the ticket is issued by A, the following information is entered: "01 ADULT 15 YEARS". This 15-year-old passenger is considered an adult for the purposes of carrier A, whilst Railway staff of B can see that the youth's age has been taken into account when establishing the fare (from the border);

- if the ticket is issued by B, the following information is entered: "01 CHILD 15 YEARS". Here, the passenger is considered a child by carrier B, whilst the entry indicates to Railway staff of A that the youth's age (adult for A) is reflected in the price (from the border)

Column 72 Blank.

FIELD 3 Details of departure and arrival stations together with dates and times of departure and arrival

Rows E/F Entry of invariable data
Column 1 Blank.
Columns 2 to 6 Details of date of departure, i.e. the indication: "DATE" or a suitable pictogram (M).

Where the word "DATE" is printed, it is not translated, since it always appears in this box.

Column 7 Blank.
Columns 8 to 12 Details of time of departure, i.e. the indication: "TIME" or a suitable pictogram (M).

Where the word "TIME" is printed, it is not translated, since it always appears in this box.

Column 13 Blank.
Columns 14 to 30 Indication: "DEPARTURE" or "FROM", flush left (M).
Columns 31 to 34 Arrow pointing from left to right. This arrow can be symbolised by successive "dash" (-) and "greater than" (>) characters or, for Undertakings unable to print an arrow, by a dash (O).

Columns 35 to 51 Indication: "ARRIVAL" or "TO", flush left (M).
Column 52 Blank.
Columns 53 to 57 Details of date of arrival, i.e. the indication "DATE" or a suitable pictogram(M).

Same comments with regard to translation as for date of departure.

Columns 58 Blank.
Columns 59 to 63 Details of the time of arrival, i.e. the indication "TIME" or a suitable pictogram (M).

Same comments with regard to translation as for time of departure.

Columns 64 to 66 Blank.

FIELD 4
Details of class of transport.

Field 4 is boxed off for added emphasis

Rows E and F

Columns 67-71
Indication: "CLASS" (M).

Column 72
Blank.

Row G

Columns 67-71
Detail of class, centred (M).

Column 72
Blank.

FIELDS 3 and 4

Row H
Entry of variable data for the return journey

Same information as that given for the outward journey. The same areas to be invalidated with an asterisk.

Where a single (one way) journey is involved, the columns reserved for departure and arrival stations are also to be invalidated with an asterisk (M).

Where a return journey is involved, class of transport is not to be indicated a second time and the relevant columns are left blank (M).

FIELD 5
Details of itinerary on ticket and carrier(s)

Two types of entry of variable data are possible for Field 5:

Version 1

Rows I and J
Details of itinerary for outward journey and carrier(s)

Row I

Column 1
Blank.

Columns 2 to 71
Indication: "OUTWARD: VIA", flush left + names of intermediate stations on the outward journey the first served by each new carrier being preceded by the carrier’s 4-digit code (M). A blank will separate each carrier’s code from each intermediate station’s name.

These columns are not rigidly allocated, since their number may vary according to the language used. A blank must be left following "OUTWARD: VIA" or its equivalent.

Column 72
Blank.

Row J

Column 1
Blank.

Columns 2 to 71
Carrier code and intermediate stations on the outward journey (cont.) (C).
### Column 72
Blank.

**NB:** "OUTWARD: VIA" may be replaced by "VIA →".

### Rows K and L
Details of itinerary for the return journey and carrier(s)

#### Row K

**Column 1**
Blank.

**Columns 2 to 71**
Indication: "RETURN: VIA", flush left + names of intermediate stations on the return journey the first served by each new carrier being preceded by the carrier’s 4-digit code (M). A blank will separate each carrier’s code from each intermediate station’s name.

These columns are not rigidly allocated, since their number may vary according to the language used. A blank column must be left following "RETURN: VIA". Where a single journey is involved, the row has to be invalidated with 2 asterisks after the indication "VIA".

#### Column 72
Blank.

### Row L
Blank.

**Column 1**
Blank.

**Columns 2 to 71**
Code(s) of carrier(s) and intermediate stations on the return journey (cont.) (C). Blank in the case of a single journey.

#### Column 72
Blank.

**NB:** "RETURN: VIA" may be replaced by "VIA ←".

### Version 2
Where outward and return journey follow the same route, it is only necessary to print the itinerary once if the same carriers are being used for both the outward and return journey.

#### Rows I/J/K/L
Blank.

**Column 1**
Blank.

**Columns 2 to 71**
Entry of the term "VIA", flush left + names of intermediate stations of the outward journey, each being preceded by the 4-digit code of the carrier for the journey to each of these stations (M). These columns are not rigidly allocated, since their number may vary according to the language used.

A blank must be left following "VIA" as well as between each carrier code and each station.

#### Column 72
Blank.

### Field 6
Details of applicable tariff(s) and any special condition(s) of use

#### Rows M/N/O
Blank.

**Column 1**
Blank.

**Columns 2 to 3**
Number of passengers per tariff used (M). The number of passengers can be indicated using a single or double-digit numeral, e.g. 1 or 01, given that the full two-digit numeral, e.g. 01, is already entered in field 2.

**Column 4**
Blank.

**Columns 5 to 51**
Tariff designation (M) + 1 blank,
+ special comments relating to the tariff, e.g. "SUBJECT TO SPECIAL CONDITIONS" (C).

Tariff designations can differ in length, while translation of special comments
can also take up a greater or lesser amount of space; accordingly, the only definitive requirement is that a blank be left between the number of passengers and the tariff designation and between the tariff designation and any special comment. CIV (M) can be printed anywhere in this zone if not in ROW C. GCC (C) or local translation (CGT, VPP,...) must be printed anywhere in this zone if it’s not already on the back of the ticket.

Column 52
Row M
Columns 53 to 72
Blank.

FIELD 7
Details of purchase currency and price per ticket
The general terms and conditions apply (see point 3.1.6).

3.2.2 Administrative details
FIELD 8

- **Columns 19 to 51**: Commercial description of train. For example: EUROSTAR, CITYNIGHT LINE, THALYS,... This information is to be printed flush left (C) or (M) as determined by the operator.

- **Column 52**: Blank. For Undertakings operating with a detachable coupon at column 52, this position corresponds to the perforation.

**Row D**

- **Column 1**: Blank.

- **Columns 2 to 51**: Details of conditions for specific services. For example: "CHECK-IN" for
EUROSTAR (C); otherwise, blank.
Blank.
Blank.

These columns are initially left blank. If additional information is required for market analysis or customer loyalty schemes - "frequent traveller" (individual or corporate) for instance - it could be inserted here (C).

**FIELD 2**

**Information detailing passenger’s full name plus number of adults and children**

**Row A**

**Columns 53 to 71**

Passenger’s full name. This information generally relates to an "individual", "group" or "corporate" passenger and is entered flush left (C). Some Undertakings print the given name before the family name. This is a matter for the issuing Undertaking to decide. However, where the entry is too long, it is the given name that must be truncated so that the family name can be printed in full.

**Column 72**

Blank.

**Row B**

**Columns 53 to 71**

Number of adults indicated by a double-digit numeral. Where only a single digit is required, this is preceded by either a zero or an asterisk, e.g. 01 or *1 (M).
Number of adults to be followed by a blank (M).
Indication: "ADULT". This does not need to be translated when entered in row B (M).

**Column 72**

Blank.

**Row C**

**Columns 53 to 71**

Number of children indicated by a double-digit numeral. Where only a single digit is required, this is preceded by either a zero or an asterisk, e.g. 01 or *1 (M).
Number of children to be followed by a blank (M).
Indication: "CHILD(REN)". This is not translated when it appears in row C (M).
In cases where there are more than one age groups, the indication "CHILD(REN)" must be followed by the indication of their ages (M). NB: suitably equipped Undertakings may enter details of a child’s age in field 6. **NB**: suitably equipped Undertakings may enter details of a child’s age in field 6.

**Column 72**

Blank.

**Row B**

Numbering of seats/berths booked (see Row I) (C) or else the indication "UPPER", "MIDDLE", "LOWER", "WINDOW", "MIDDLE", "CORRIDOR" or "SOLO WINDOW" (M).

When entering the number of seats/berths booked, Undertakings have the choice of using a single or double-digit numeral (e.g. 1 WINDOW or 01 WINDOW).

Column 72
Blank.

Row L
Column 1
Blank.

Columns 2 to 31
Indication: "SMOKING" or "NON SMOKING" plus the type of compartment booked - cf. element 51 of message Technical Document B.5 (M).

Column 32

Columns 33 to 71
Numbering of seats/berths booked (see Row I) (C) or else the indication "UPPER", "MIDDLE", "LOWER", "WINDOW", "MIDDLE", "CORRIDOR", "SOLO WINDOW" (M).

When entering the number of seats/berths booked, Undertakings have the choice of using a single or double-digit numeral (e.g. 1 WINDOW or 01 WINDOW).

Column 72
Blank.

FIELD 6
carrier(s)

Details of applicable tariff(s) and any special condition(s) of use, and of carrier(s)

Rows M/N/O
Column 1
Blank.

Columns 2 to 3
Number of passengers per tariff used (M), since this depends on the number of passengers per ticket, i.e. whether ticketing is individual or global. In the case of individual ticketing this information is optional.

The number of passengers can be indicated using a single or 2-digit numeral, e.g. 1 or 01, given that the full two-digit numeral, e.g. 01, is already entered in field 2.

Column 4
Blank.

Columns 5 to 36
Tariff designation (M), since the tariff designation is obligatory only where it differs from the Full Tariff + 1 blank, + special comments relating to the tariff, e.g. "ISSUED SUBJECT TO CONDITIONS" (C).

Tariff designations can differ in length, while translation of special comments can also take up a greater or lesser amount of space; accordingly, the only definitive requirement is that a blank column be left between the number of passengers and the tariff designation and between the tariff designation and any special comments.

Column 37
Blank.

Columns 38 to 51
Identification of carrier(s) for the journey. CIV (M) must be printed anywhere in this zone. GCC (C) or local translation (CGT, VPP,...) must be printed anywhere in this zone if it’s not already on the back of the ticket.

Column 52
Blank.

Row M
Columns 38 to 51
Identification "CARRIER:" flush left (M) or 4-digit codes of the first, second and third carriers for this journey should there be more than 6 - cf. element 79 of message Technical Document B.5. These codes will be flush
left and separated by blanks (C).

Columns 53 to 72

3.4.3 Countermark
Description: One countermark is distributed to each group member except the head of the group, who retains the "group ticket".
It is an unpriced RCT2 document and contains no details of the route.
NB: It is recommended to issue countermarks later on, since clients often need to alter the number of passengers prior to departure. In such instances, the sales terminal is used in the same way as a typewriter (this refers to the case where the application can present to the salesperson on the screen a form to be filled from the keyboard with the details of the group)...

The issuing Undertaking may adopt alternative technical solutions.

3.7.3 Specimen RCT2 “RESERVATION” document
Point A.7.1 - Specimen No. 40.
3.8 Supplement Document (SUP)

3.8.1 Description

This is a SUPPLEMENT that does not entail a reservation. Where a SUPPLEMENT is to be issued in conjunction with a reservation, an RCT2 "RESERVATION" document is issued.

One SUPPLEMENT is issued per journey. There are three possible types:

- Supplement version 1 issued for a set route, date, time and train;
- Supplement version 2 issued for a specific type of train, e.g. ICE, but without detailing either the date and time of departure or the route. This is an "open" supplement for a specific type of train.
- Supplement version 3 issued under the same conditions as above, but for a specific route.

3.8.2 Supplement Version 1

3.10 Change of itinerary Document (COI) 
Description: one RCT2 "CHANGE OF ITINERARY" document issued per applicable route. 
NB: this RCT2 document can only be issued for international or foreign sales services by those Undertakings whose systems allow receipts to be distributed.

3.10.1 Commercial information 
As for the RCT2 "UPGRADE" document (change to higher class) with the following differences:

FIELD 1 Row A  
Columns 19-51  
RCT2 title "CHANGE OF ITINERARY", flush left (M) (T).

FIELD 7  
Details of purchase currency and price per ticket 
The general terms and conditions apply (see 3.1.6). 
The amount to be entered necessarily constitutes the difference between the prices charged in the first and in the new contract.

3.10.2 Administrative details 
FIELD 8  
The general terms and conditions apply (see points 3.1.7). 
The details required are printed.

3.10.3 Specimen RCT2 "CHANGE OF ITINERARY" document 
Point A.10.1 - Specimen No. 45.
3.11 Boarding pass Document (BOA)

CARTE D’ACCES in French, EINSTEIGEKARTE in German, CARTA D’ACCESSO in Italian.

**Description:** A reservation document is issued to a customer already holding an RCT2 "TRANSPORT + RESERVATION" document. The BOA can be issued per passenger or for all passengers on the ticket.

The operation involved is a change of reservation in respect of an "all-in" ticket for the same end-to-end journey (change of train/date of travel) at no cost to the customer. The tariff terms for the new journey must be identical to those for the original journey.

The tariff, class of service and passenger type remain unaltered. The tariff needs to allow exchange at no cost. **Advantages:** No additional booking transaction: the customer retains the original ticket and receives a boarding pass containing details of new reservation. This means that the new reservation is made without generating an accounting transaction. A boarding pass cannot be requested via B.5 messages, therefore it can be issued only by the same system that issued the original ticket (or by a system connected to the original system via a protocol allowing such requests). Nevertheless, since the boarding pass can be valid for an international journey, it is relevant for the interoperability scope.

The "BOARDING PASS" is unpriced.

**Comments:** This RCT2 document relates exclusively to "Transport + Reservation" products and its issue is dependent on the respective carrier’s decision. The English term "boarding pass" is generally associated with air travel but has a different meaning here. Whereas airlines collect the original ticket and replace it with a boarding pass, in rail travel the boarding pass is used in conjunction with the original ticket.

The sole object of this RCT2 document is to assign a new reservation. It does not in any sense constitute an authority to travel.

3.11.1 Commercial information

The information to be entered is identical to that for the RCT2 "RESERVATION" document with the following differences:

**FIELD 1**
Row A
*Columns 19 to 51* Name of document: "BOARDING PASS" *(M) (T).*

**FIELD 2** No information entered in the case of pre-printed RCT2 documents. In the case of RCT2 blank-to-blank documents on which all details are entered by a printer, this field is not printed.

**FIELD 6** Rows M/N/O
*Columns 2 to 51* Indication: "THIS CARD IS NOT A TICKET. IT MUST BE USED IN CONJUNCTION WITH THE ORIGINAL TICKET" *(M) (T).*

**FIELD 7** In the case of a pre-printed RCT2 document, the "PRICE" box is to be invalidated by means of asterisks to ensure the word "PRICE" is not visible to the customer.

In the case of an RCT2 blank-to-blank document, the "PRICE" box is to be left blank.

**NB:** the original ticket is to be amended in field 6, row O, column 2 onwards, in the following
manner: "BOARDING PASS ISSUED" (M). The mentioned possibility of “amending” the original ticket refers only to the case of a ticket passed a second time in a printer of the same system that issued the original ticket (or by a system connected to the original system via a protocol allowing such operation). Nevertheless, as said above, since the boarding pass can be valid for an international journey, it is relevant for the interoperability scope.

3.11.2 Administrative information

FIELD 8
As this RCT2 document is unpriced, it contains no information relating to VAT.

3.11.3 Specimen RCT2 "BOARDING PASS" document

To find the sequence number (43), corresponding to e.g. 7 9, the following algorithm can be used: (a=7, b=9)

\[
\text{num} = b \times (b-1) / 2 + a
\]

In this example: \(\text{num} = 9*8/2+7 = 43\)

Translation in the other direction can be done this way (the sequence number is given (43) and the corresponding numbers (7 and 9) have to be found):

```
num=43
b = 0
Do While (num - b) > 1
    b = b + 1
    num = num - b
Loop
a = num
b = b + 1
```

In this example, the values of b and num will be in the different sequences: 0/43,1/42,2/40,3/37,4/33,5/28,6/22,7/15,8/7, so a=7, b=9.

C.1.2 - Hash Code generation

The CRC-32 mechanism is used to generate a hash-code. The divider is: 10000100110000010001110110110111 (104C11DB7 Hex or 4374732215 Dec).

An RSA-asymmetric encryption mechanism is used to encrypt the hash-code. To generate a seal from the hash-code (or: "to encrypt the hash-code"), a distributor uses his private (secret) key.

For the verification, a railway undertaker, wanting to interpret the information in the seal, should know which public key to use. For this, the element 177 - "Issuing railway code" is used.

The key pairs (secret key for the encryption by the distributor, public key for the decryption by the TCO) are chosen by the distributor. The distributor gives the public key to the TCO in advance, so that he can check tickets with a hash-code that is encrypted with the corresponding private key. It is strongly recommended to change the key pairs frequently. The size of the keys is 512 bits, so that the hash-code (32 bits long) will become, after encryption a seal of maximum 544 bits long.

The total size of the barcode: 111 bytes of data.
C.1.3 - **Encoding in an AZTEC 2D barcode**

This data is translated into a 6-layer AZTEC barcode (symbol size of 41x41).

The surface of the barcode is 24mm x 24mm - representing 41 dots x 41 dots.

Every pixel measures 0.59 mm x 0.59 mm

Printing resolution: minimum 150 dpi (average of 12 printer-pixels per barcode-dot).

Error correction must be at least 23 % using the standard AZTEC error correction mechanism.

### C.2.2 - Step 2: Encoding in a PDF-417

The characters are put one next to the other to make one long word (85 or 121 characters long - depending on the fact if the ticket contains one or two segments). This word is sent to the printer, together with some commands, specific for printing the barcode (element of the PECTAB-file). For this, consult the manual of the printer to have the sizes as defined in the standard. The printer can be any printer able to print PDF-417 barcodes.

C.3.1 - Step 1 - Collecting all elements in binary format

Version number

Up to 16 different versions of the standard can co-exist.
Suggested type - size: Numerical 0..15
Bit size: 4 - Binary

Multiple tickets

0: Single ticket
1: Multiple tickets
This bit helps the after sales person or the on-board train staff by indicating that they
have to pay attention.
Bit size: 1 - Binary

Multiple adults and/or children

0: Single person
1: Multiple persons
This bit helps the after sales person or the on-board train staff by indicating that they
have to pay attention.
Bit size: 1 - Binary

Corporate/individual frequent

<td>4</td>
</tr>
<tr>
<td><strong>= Total bit size:</strong></td>
<td><strong>144</strong></td>
</tr>
</tbody>
</table>
C.3.2 - Encoding in a 1 D-barcode

The 144 bits are split into 24 groups of 6 bit each.

Each series of 6 bit represents a value from 0 to 63, which are translated as described below:

<table>
<thead>
<tr>
<th>Value</th>
<th>Symbol, to be converted in CODE 128 barcode</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>A</td>
</tr>
<tr>
<td>1</td>
<td>B</td>
</tr>
<tr>
<td>2</td>
<td>C</td>
</tr>
<tr>
<td>...</td>
<td>...</td>
</tr>
<tr>

<tr>
<td>61</td>
<td>9</td>
</tr>
<tr>
<td>62</td>
<td>&amp;</td>
</tr>
<tr>
<td>63</td>
<td>#</td>
</tr>
</tbody>
</table>

After the translation, the result is a word of 24 symbols, that are converted in a CODE 128 barcode (directly, using PECTAB).

Next, these 24 "symbols" are transformed in a "CODE 128-B" barcode.
