

Making the railway system
work better for society.

Application Guide for the European register of authorised types of railway vehicles (ERATV)

In accordance with Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776.

Released by European Union Agency for railways

The present document represents the views of the European Union Agency for Railways and is a non-legally binding document. It does not represent the view of other EU institutions and bodies. Furthermore, a binding interpretation of EU law is the sole competence of the Court of Justice of the European Union.

These guidelines provide explanations to facilitate the implementation and usage of the Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776.

These guidelines are publicly available and will be kept updated.

The reader should refer to the website of the European Union Agency for railways for information about their latest available edition.

Document History

1. Introduction

1.1. Content of the guide

1.1.1. Legal basis

Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776 (hereafter “ERATV Decision”), Article 5 (1) states that “*The Agency shall publish and keep up-to-date an application guide for the European register of authorised types of vehicles. Among other information, this guide shall include for each parameter a reference to the clauses of the technical specifications for interoperability that state the requirements for this parameter.*”

1.1.2. Scope

The guide provides explanation of some provisions contained in the ERATV Decision.

This guide does not contain any legally binding advice. It may serve as a clarification tool without however dictating in any way compulsory procedures to be followed, and without establishing any legally binding practice.

The guide has been prepared by ERA. The reader should refer to the ERA website for information about its latest available edition.

1.1.3. Outside of scope

This Guide does not explain how to use the ERATV IT application, as this is covered by ERATV User Manual.

1.2. Document references

1.3. Definitions and abbreviations

Table 2 - Definitions

<i>Term</i>	<i>Definition</i>
Basic parameter	Any regulatory, technical or operational condition which is critical to interoperability and is specified in the relevant TSIs (Article 2(12) of Directive (EU) 2016/797)
Conformity assessment	Process demonstrating whether specified requirements relating to a product, process, service, subsystem, person or body have been fulfilled (Article 2(41) of Directive (EU) 2016/797)

<i>Term</i>	<i>Definition</i>
Conformity assessment body	Body that has been notified or designated to be responsible for conformity assessment activities, including calibration, testing, certification and inspection; a conformity assessment body is classified as a 'notified body' following notification by a Member State; a conformity assessment body is classified as a 'designated body' following designation by a Member State (Article 2(42) of Directive (EU) 2016/797)
European Register of Authorised Types of Vehicles (ERATV)	Register of types of vehicles authorised by the Member States for placing in service. It contains the technical characteristics of vehicles' types as defined in the relevant TSIs, the manufacturer's name, dates, references and Member States granting authorisations, restrictions and withdrawals (Article 48 of Directive (EU) 2016/797)
Harmonised standard	European standard adopted on the basis of a request made by the Commission for the application of Union harmonising legislation (Article 2(1)(c) of Regulation (EU) No 1025/2012)
Infrastructure Manager	Anybody or firm responsible for the operation, maintenance and renewal of railway infrastructure on a network, as well as responsible for participating in its development as determined by the Member State within the framework of its general policy on development and financing of infrastructure (Article 3(2) of Directive 2012/34/EU)
Non-application of a TSI	Certain circumstance, by which projects can be exempted from having to comply with all or part of a TSI or TSIs (Article 7 of Directive (EU) 2016/797)
Open point	Certain technical aspect corresponding to the essential requirements, which cannot be explicitly covered in a TSI(Article 4(6) of Directive (EU) 2016/797)
Placing in service	All the operations by which a subsystem is put into its operational service (Article 2(19) of Directive (EU) 2016/797)
Placing on the market	First making available on the Union's market of an interoperability constituent, subsystem or vehicle ready to function in its design operating state (Article 2(35) of Directive (EU) 2016/797)
Railway Undertaking	Railway undertaking as defined in point (1) of Article 3 of Directive 2012/34/EU, and any other public or private undertaking, the activity of which is to provide transport of goods and/or passengers by rail on the basis that the undertaking is to ensure traction; this also includes undertakings which provide traction only (Article 2(45) of Directive (EU) 2016/797)
Register of infrastructure (RINF)	Register of infrastructure indicates the main features of fixed installations, covered by the subsystems: infrastructure, energy and parts of control-command and signalling. It publishes performance and technical characteristics mainly related to interfaces with rolling stock and operation (Article 49 of Directive (EU) 2016/797)

<i>Term</i>	<i>Definition</i>
Specific case	Any part of the rail system which needs special provisions in the TSIs, either permanent, because of geographical, topographical or urban environment constraints or those affecting compatibility with the existing system, in particular railway lines and networks isolated from the rest of the Union, the loading gauge, the track gauge or space between the tracks and vehicles strictly intended for local, regional or historical use, as well as vehicles originating from or destined for third countries (Article 2(13) of Directive (EU) 2016/797)
Upgrading	Any major modification work on a subsystem or part of it which results in a change in the technical file accompanying the 'EC' declaration of verification, if that technical file exists, and which improves the overall performance of the subsystem (Article 2(14) of Directive (EU) 2016/797)

2. Overview of ERATV

2.1. Introduction

The European register of authorised types of vehicles (ERATV) contains data on the types of vehicle authorised.

2.2. Configuration of ERATV

ERATV is hosted by ERA. No data are stored locally at the NSAs.

According to article 50 of Regulation (EU) 2018/545, the ERATV shall be completed by the authorising entity using the information provided by the applicant as part of the vehicle type authorisation application. The applicant shall be responsible for the integrity of the data provided to the authorising entity. The authorising entity shall be responsible for checking the consistency of the data provided by the applicant and making the ERATV entry available to the public.

The data are made public, by ERA, after submission by the Authorising Entity.

ERATV is public. It may be accessed by means of a standard internet connection. Neither user account nor any other kind of registration is necessary for accessing published vehicle type authorisations in ERATV.

2.3. Implementation of ERATV

The ERATV Decision is applicable from 15 April 2012 (according to Article 6 of the ERATV Decision). This means that Authorising Entities have to record in ERATV all type authorisations they have granted that from this date on.

The ERATV IT system is in operation since January 2013 and can be reached at the url:

<https://eratv.era.europa.eu>

2.4. Potential users of ERATV

ERATV is public, so any person has access to it. Following are the most likely users of ERATV:

- Railway undertakings
- Infrastructure managers
- Vehicle keepers
- Vehicle owners (incl. potential vehicle procurers, leasing companies)
- Manufacturers
- Entities in charge of maintenance
- Notified bodies (NoBos)

- Designated bodies (DeBos)
- National safety authorities (NSAs)
- National investigation bodies
- Registration entities in charge of the vehicle registers
- European Union Agency for Railways
- European Commission

2.5. ERATV and other registers

ERATV is intended to be used in combination with other registers and databases. In particular it has the following interfaces:

- The vehicle registers referred to in Article 47 of Directive (EU) 2016/797.
- Register of infrastructure (RINF) set up according to Article 49 of Directive (EU) 2016/797.

2.6. Interface with the vehicle registers

When a vehicle is registered in a Vehicle Register, its identification in ERATV (Type ID) of the authorised vehicle type (or version or variant) the vehicle is in conformity to, must be indicated (compulsory when available).

By means of this ERATV reference (Type ID), the technical characteristics of a vehicle may be retrieved from ERATV.

2.7. Interface with the Register of Infrastructure

Some of the ERATV parameters are indicated for technical compatibility between Vehicle and the network(s) of area of use. These parameters are indicated in the ERATV Decision, table 2, with a 'Y' in column "*Parameters for technical compatibility between Vehicle and the network(s) of area of use*".

Their corresponding parameters in RINF are detailed in Annex 2.

3. Actors

Table 4 - Actors

<i>Actor</i>	<i>Roles and responsibilities</i>
<i>Applicant for an authorisation of type of vehicle</i>	Submits the set of data required for ERATV to the relevant Authorising Entity
<i>Authorising Entity (NSA or ERA acting as Authorising Entity)</i>	Creates the draft record in ERATV and reserves, if needed, a type ID. Complements the data submitted by the applicant in the draft record with the data related to the issued type authorisation (Authorisation section of the ERATV record) Submits the data for publication.

<i>Actor</i>	<i>Roles and responsibilities</i>
<i>ERA</i>	Hosts the ERATV IT system. Publish the data transmitted by the Authorising Entity in compliance with the ERATV specification.

4. Voluntary registration of types of vehicles in ERATV

Section 1 of Annex I of the ERATV Decision indicates the cases that are subject to voluntary registration in ERATV.

Making the railway system
work better for society.

5. Annex I - Comments on ERATV parameters

Table 5 - Comments on ERATV parameters

#	Parameter	Data format	Comments and applicable TSI clauses
0	Identification of the type	Heading (no data)	This section is filled in when the type, variant or version is registered for the first time.
0.1	Type number (in accordance with Annex III)	[number] XX-XXX-XXXX-X	Parameters 01, 02 and 04 are managed together as being part of the <i>Type ID</i> , which is defined as: Type ID: An identification for the type composed of the type number (parameter 0.1, number composed of 10 digits), the variant (parameter 0.2, alphanumeric composed of three characters) and the version (parameter 0.4, alphanumeric composed of three characters): TypeID = Type number+Variant+Version = XX-XXX-XXXX-X-ZZZ-VVV
0.2	Variant included in this type (in accordance with Article 2(13) of Regulation (EU) 2018/545)	[alphanumeric] ZZZ	
0.4	Versions included in this type. (in accordance with Article 2(14) of Regulation (EU) 2018/545)	[alphanumeric] VVV	
0.3	Date of record in ERATV	[date] YYYYMMDD	This parameter is automatically generated by the system when the type data are published. It should not be confused with the date of type authorisation (parameter 3.1.3.1.1)

#	Parameter	Data format	Comments and applicable TSI clauses
1	General information	Heading (no data)	
1.1	Type name	[character string] (max 256 characters)	Type name as defined by the manufacturer
1.2	Alternative type name	[character string] (max 256 characters)	Alternative type name as defined by the manufacturer
1.3	Manufacturer's name	Heading (no data)	
1.3.1	Manufacturer identification data	Heading (no data)	
1.3.1.1	Name of organisation	[character string] (max 256 characters) Selection from a predefined list, possibility to add new organisations	
1.3.1.2	Registered business number	Text	<p>A registered business number is an alphanumeric identifier assigned to the organisation by the authorities responsible for the registration of organisations of their type in their Member State and which allows the organisation (rather than any single person representing it) to act as a Juridical or Legal entity.</p> <p>Examples of registered business numbers from different countries would be:</p> <p>FN 72586k 202945069 CH-292.4.013.564-9 DE 185 159 346 HRB 33582, Amtsgericht Hamburg Q2884679P A86538254 B 60257 38005268240090 J50/9659/1994 226260-6225 L</p>

#	Parameter	Data format	Comments and applicable TSI clauses
1.3.1.3	Organisation code	Alphanumeric code	As defined in Commission Implementing Decision (EU) 2018/1614, Annex II, 3.4.2
1.3.2	Manufacturer contact data	Heading (no data)	
1.3.2.1	Address of organisation, street and number	Text	
1.3.2.2	Town	Text	
1.3.2.3	Country code	Code as in EU interinstitutional style guide	
1.3.2.4	Post code	Alphanumeric code	
1.3.2.5	Email address	Email	The recorded email to be a generic email for the organisation, not person specific.
1.4	Category	[character string] Selection from a predefined list (according to Annex III)	Vehicle category as defined in Annex III of the ERATV Decision
1.5	Subcategory	[character string] Selection from a predefined list (according to Annex III)	Vehicle subcategory as defined in Annex III of the ERATV Decision
2	Conformity with TSIs	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
2.1	Conformity with TSI	For each TSI: [character string] Y/N/Partial/Not applicable Selection from a predefined list of vehicle related TSIs (both in force and those that were previously in force) (multiple selection possible)	The exact reference of the TSIs conformity with which has been verified should be indicated. This includes the version of the TSI and its possible amendments. Conformity (or partial conformity) must be attested by an EC Type Examination Certificate (module SB) or Design verification certificate (module SH1) as defined in the Decision on Modules or, for TSI adopted before 2010, in the applicable TSI itself. If not, the vehicle is deemed to be non-TSI conform. "Yes" means the type of vehicle is fully in conformity with the given TSI.
2.2	EC certificate of verification: Reference of 'EC type examination certificates' (if module SB applied) and/or 'EC design examination certificates' (if module SH1 applied)	[character string] (possibility to indicate several certificates, e.g. certificate for rolling stock subsystem, certificate for CCS, etc.)	
2.3	Applicable specific cases (specific cases conformity with which has been assessed)	[character string] Selection from a predefined list (multiple selection possible) based on TSIs (for each TSI marked as Y or P)	Specific cases the type of vehicle is in conformity with (conformity must be attested by verification procedure).

#	Parameter	Data format	Comments and applicable TSI clauses
2.4	Sections of TSI not complied with	[character string] Selection from a predefined list (multiple selection possible) based on TSIs (for each TSI marked as P)	This parameter must be filled in in the cases of partial conformity with a TSI. Sections of TSI the type of vehicle is not in conformity with (e.g. in the case of a derogation, partial application of TSI in the case of renewal or upgrading, etc.). CCS TSI 2019/776: - 6.1.1.3. Partial fulfilment of TSI requirements Note for information: In the case of existence of sections of TSI not complied with under the CCS TSI, the template provided in the CCS application guide is to be included in the technical file.
3	Authorisations	Heading (no data)	
3.0	Area of use	[character string] Selection from a predefined list (multiple selection): MS – Network	
3.1	Authorisation in	Heading (no data)	
3.1.1	Member State of authorisation	[character string] Selection from a predefined list (multiple selection)	
3.1.2	Current status	Heading (no data)	
3.1.2.1	Status	[character string] + [date] Possible options: Valid, Suspended YYYYMMDD, Revoked YYYYMMDD, to be renewed YYYYMMDD	This parameter is automatically generated by the system depending on the information provided by the Authorising Entity.

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.2.2	Validity of authorisation (if defined)	[date] YYYYMMDD	Last day on which the authorisation is valid. Regulation (EU) 2018/545, Article 46: 6. The authorisation decision shall not contain any time limited conditions for use of the vehicle and other restrictions, unless the following conditions are fulfilled: (a) it is required because the conformity to the TSIs and/or national rules cannot be completely proven before the issuing of the authorisation; and/or (b) the TSIs and/or national rules require that the applicant produces a plausible estimate of compliance. The authorisation may then include a condition that real use demonstrates performance in line with the estimate within a specified period of time.
3.1.2.3	Coded conditions for use and other restrictions	[character string] Code assigned by the Agency	Coded conditions for use and other restrictions as indicated on the issued type authorisation ERA maintains a single document with restriction codes. Document ERA/TD/2011-09/INT available on ERA website.
3.1.2.4	Non-coded conditions for use and other restrictions	[character string]	Non-coded conditions for use and other restrictions as indicated on the issued type authorisation.
3.1.3	Historical	Heading (no data)	
3.1.3.1	Original authorisation	Heading (no data)	
3.1.3.1.1	Date of the original authorisation	[date] YYYYMMDD	Date on which the type authorisation being recorded was issued (not the date of entry in ERATV).
3.1.3.1.2	Authorisation holder	Heading (no data)	
3.1.3.1.2.1	Authorisation holder identification data	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.3.1.2.1.1	Name of organisation	[character string] (max 256 characters) Selection from a predefined list, possibility to add new organisations	
3.1.3.1.2.1.2	Registered business number	Text	See explanation in parameter 1.3.1.2
3.1.3.1.2.1.3	Organisation code	Alphanumeric code	As defined in Commission Implementing Decision (EU) 2018/1614, Annex II, 3.4.2
3.1.3.1.2.2	Authorisation holder contact data	Heading (no data)	
3.1.3.1.2.2.1	Address of organisation, street and number	Text	
3.1.3.1.2.2.2	Town	Text	
3.1.3.1.2.2.3	Country code	Code as in EU interinstitutional style guide	
3.1.3.1.2.2.4	Post code	Alphanumeric code	
3.1.3.1.2.2.5	Email address	Email	The recorded email to be a generic email for the organisation, not person specific.
3.1.3.1.3	Authorisation document reference	[character string] (EIN)	The European Identification Number (EIN) of the issued type authorisation. The format of the EIN is defined in the document "Structure and content of the European Identification Number" with Document ID: 013SST1139 published on the ERA website.

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.3.1.4	Certificate of verification: Reference of type examination or design examination type	[character string] (Possibility to indicate several certificates, e.g. certificate for rolling stock subsystem, certificate for Control, command and signalling subsystem, etc.)	
3.1.3.1.5	Parameters for which conformity to applicable national rules has been assessed	[character string] Selection from a predefined list (multiple selection possible) based on Commission Decision 2015/2299/EU	
3.1.3.1.6	Comments	[character string] (max 1 024 characters)	
3.1.3.1.7	Reference to the written declaration by the proposer referred to in Article 3(11) of Regulation (EU) No 402/2013	[character string]	
3.1.3.X	Modification of authorisation	Heading (no data) (X is progressive from 2 onwards, as many times as modifications of the authorisation of type have been issued)	Under this heading information on modifications, suspensions, reactivations and withdrawals (revocation of authorisation/authorisation to be renewed) of the authorisation is indicated.
3.1.3.X.1	Type of modification	[character string] Text from a predefined list	This parameter is automatically generated by the system.
3.1.3.X.2	Date	[date] YYYYMMDD	

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.3.X.3	Authorisation holder (if applicable)	[character string] (max 256 characters) Selection from a predefined list, possibility to add new organisations	
3.1.3.X.3.1	Authorisation holder identification data	Heading (no data)	
3.1.3.X.3.1.1	Name of organisation	[character string] (max 256 characters) Selection from a predefined list, possibility to add new organisations	
3.1.3.X.3.1.2	Registered business number	Text	See explanation in parameter 1.3.1.2
3.1.3.X.3.1.3	Organisation code	Alphanumeric code	As defined in Commission Implementing Decision (EU) 2018/1614, Annex II, 3.4.2
3.1.3.X.3.2	Authorisation holder contact data	Heading (no data)	
3.1.3.X.3.2.1	Address of organisation, street and number	Text	
3.1.3.X.3.2.2	Town	Text	
3.1.3.X.3.2.3	Country code	Code as in EU interinstitutional style guide	
3.1.3.X.3.2.4	Post code	Alphanumeric code	
3.1.3.X.3.2.5	Email address	Email	

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.3.X.4	Authorisation modification document reference	[character string]	
3.1.3.X.5	Certificate of verification: Reference of type examination or de- sign examination type	[character string] (possibility to indicate several certificates, e.g. certificate for rolling stock subsystem, certificate for CCS, etc.)	
3.1.3.X.6	Applicable national rules (if applicable)	[character string] Selection from a predefined list (multiple selection possible) based on Commission Decision 2015/2299/EU	
3.1.3.X.7	Comments	[character string] (max 1 024 characters)	
3.1.3.X.8	Reference to the written declaration by the proposer referred to in Article 3(11) of Regulation (EU) No 402/2013	[character string]	
3.X	Authorisation in	Heading (no data) (X is progressive incremented by one unit from 2 onwards each time an authorisation for this type has been granted). This Section contains same fields as 3.1	
4	Technical characteristics of the vehicle	Heading (no data)	
4.1	General technical characteristics	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
4.1.1	Number of driving cabs	[Number] 0/1/2	<p>CCS TSI 2019/776:</p> <ul style="list-style-type: none"> - 1.1 Technical scope: “(1) locomotives and passenger rolling stock, including thermal or electric traction units, self-propelling thermal or electric passenger trains, and passenger coach, if equipped with a driving cab” <p>For wagons the number of driving cabs is to be set to zero (0).</p>
4.1.2	Speed	Heading (no data)	
4.1.2.1	Maximum design speed	[Number] km/h	<p>TSI LOC&PAS 1302/2014:</p> <ul style="list-style-type: none"> - 4.2.3.2.1 Axle load parameter - 4.2.8.1.2 Requirements on performance <p>CR TSI LOC&PAS 2011/291/EU:</p> <ul style="list-style-type: none"> - 4.2.8.1.2 Requirements on performance <p>HS TSI 2008/232/EU:</p> <ul style="list-style-type: none"> - 4.2.1.1b Requirements on performance <p>CCS TSI 2019/776:</p> <ul style="list-style-type: none"> - 4.2.2 On-board ETCS functionality <p>If a vehicle is composed of several subsystems, the design speed of the vehicle is the lowest design speed of different subsystems the vehicle is composed of.</p>
4.1.3	Wheel set gauge	[character string] Selection from predefined list	<p>TSI LOC&PAS 1302/2014:</p> <ul style="list-style-type: none"> - 4.2.3.5.2.1. Mechanical and geometric characteristics of wheelsets <p>TSI WAG 321/2013:</p> <ul style="list-style-type: none"> - 4.2.3.6.2. Characteristics of wheelsets

#	Parameter	Data format	Comments and applicable TSI clauses
4.1.5	Maximum number of trainsets or locomotives coupled together in multiple operation.	[number]	<p>TSI LOC&PAS 1302/2014:</p> <ul style="list-style-type: none"> - 4.1.2. Description of the Rolling stock subject to the application of this TSI - 4.2.12.2. General documentation <p>CR TSI LOC&PAS 2011/291/EU:</p> <ul style="list-style-type: none"> - 4.1.2. Description of the Rolling stock subject to the application of this TSI <p>HS TSI 2008/232/EU:</p> <ul style="list-style-type: none"> - 4.2.1.2. Design of trains
4.1.11	Wheelset gauge changeover facility	[character string] Selection from predefined list	<p>TSI LOC&PAS 1302/2014:</p> <ul style="list-style-type: none"> - 4.2.3.5.2.3 Variable gauge wheelsets <p>TSI WAG 321/2013:</p> <ul style="list-style-type: none"> - 4.2.3.6.6. Variable gauge wheelsets

4.9	Equipment	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
4.9.1	Type of end coupling	[Character string] From a predefined list (multiple selection possible)	TSI LOC&PAS 1302/2014: - 4.2.2.2.3 End coupling CR TSI LOC&PAS 2011/291/EU: - 4.2.2.2.3 End coupling HS TSI 2008/232/EU: - 4.2.2.2. End couplers and coupling arrangements to rescue trains TSI WAG 321/2013: - 4.2.2.1.1 End coupling
4.9.2	Axle bearing condition monitoring (hot axles box detection)	[Character string] From a predefined list (multiple selection possible)	TSI LOC&PAS 1302/2014: - 4.2.3.3.2 Axle bearing condition monitoring CR TSI LOC&PAS 2011/291/EU: - 4.2.3.3.2 Axle bearing condition monitoring HS TSI 2008/232/EU: - 4.2.3.3.2. Axle bearing health monitoring TSI WAG 321/2013: - 4.2.3.4. Axle bearing condition monitoring
4.10	Energy supply	Heading (no data)	
4.10.1	Energy supply system (voltage and frequency)	[Character string] From a predefined list (multiple selection possible)	TSI LOC&PAS 1302/2014: - 4.2.8.2.2 Operation within range of voltages and frequencies CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.2 Operation within range of voltages and frequencies HS TSI 2008/232/EU: - 4.2.8.3.1. Voltage and frequency of the power supply
4.10.4	Maximum current at standstill per pantograph (to be indicated for each DC systems the vehicle is equipped for)	[Number] A for [Voltage automatically prefilled in]	TSI LOC&PAS 1302/2014: - 4.2.8.2.5 Maximum current at standstill for DC systems CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.5 Maximum current at standstill for DC systems HS TSI 2008/232/EU: - 4.2.8.2.5 Maximum current at standstill for DC systems

#	Parameter	Data format	Comments and applicable TSI clauses
4.10.5	Height of interaction of pantograph with contact wires (over top of rail) (to be indicated for each energy supply system the vehicle is equipped for)	[Number] From [m] to [m] (with two decimals)	TSI LOC&PAS 1302/2014: - 4.2.8.2.9.1.1 Height of interaction with contact wires (RST level) CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.9.1.1 Height of interaction with contact wires (RST level)
4.10.6	Pantograph head geometry (to be indicated for each energy supply system the vehicle is equipped for)	[Character string] for [energy supply system automatically prefilled in] From a predefined list (multiple selection possible)	TSI LOC&PAS 1302/2014: - 4.2.8.2.9.2 Pantograph head geometry (IC level) CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.9.2 Pantograph head geometry (IC level) HS TSI 2008/232/EU: - 4.2.8.3.7.2. Pantograph head geometry
4.10.7	Number of pantographs in contact with the overhead contact line (OCL) (to be indicated for each energy supply system the vehicle is equipped for)	[Number]	TSI LOC&PAS 1302/2014: - 4.2.8.2.9.7 Arrangement of pantographs (RST level) CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.9.7 Arrangement of pantographs (RST level) HS TSI 2008/232/EU: - 4.2.8.3.6.2. Arrangement of pantographs
4.10.8	Shortest distance between two pantographs in contact with the OCL (to be indicated for each energy supply system the vehicle is equipped for; to be indicated for single and, if applicable, multiple operation) (only if number of raised pantographs is more than 1)	[Number] [m]	TSI LOC&PAS 1302/2014: - 4.2.8.2.9.7 Arrangement of pantographs (RST level) CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.9.7 Arrangement of pantographs (RST level) HS TSI 2008/232/EU: 4.2.8.3.6.2. Arrangement of pantographs
4.10.10	Material of pantograph contact strip the vehicle may be equipped with (to be indicated for each energy supply system the vehicle is equipped for)	[Character string] for [energy supply system automatically prefilled in] From a predefined list (multiple selection possible)	TSI LOC&PAS 1302/2014: - 4.2.8.2.9.4.2 Contact strip material CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.9.4.2 Contact strip material HS TSI 2008/232/EU: - 4.2.8.3.8.3. Material

#	Parameter	Data format	Comments and applicable TSI clauses
4.10.11	Automatic dropping device (ADD) fitted (to be indicated for each energy supply system the vehicle is equipped for)	[Boolean] Y/N	TSI LOC&PAS 1302/2014: - 4.2.8.2.9.10 Pantograph lowering (RST level) CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.9.10 Pantograph lowering (RST level) HS TSI 2008/232/EU: - 4.2.8.3.6.4. Pantograph lowering
4.10.14	Electric units equipped with power or current limitation function	[Boolean] Y/N	TSI LOC&PAS 1302/2014: - 4.2.8.2.4 Maximum power and current from the overhead contact line CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.4 Maximum power and current from the overhead contact line HS TSI 2008/232/EU: - 4.2.8.3.2. Maximum power and maximum current that is permissible to draw from the overhead contact line
4.10.15	Mean contact force	[Number] [N]	TSI LOC&PAS 1302/2014: - 4.2.8.2.9.6 Pantograph contact force and dynamic behaviour CR TSI LOC&PAS 2011/291/EU: - 4.2.8.2.9.6 Pantograph contact force and dynamic behaviour HS TSI 2008/232/EU: - 4.2.8.3.6.1. Pantograph contact force
4.12	Passenger related characteristics	Heading (no data)	
4.12.3.1	Platform heights for which the vehicle is designed.	[Number] from predefined list (multiple selection possible)	TSI PRM 1300/2014: - 4.2.2.11. Step position for vehicle access and egress TSI PRM 2008/164/EU: - 4.2.2.12. Step position for vehicle access and egress
4.13	On-board CCS equipment (for vehicles with a driving cab only)	Heading (no data)	
4.13.1	Signalling	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
4.13.1.1	ETCS equipment on-board and the set of specifications from CCS TSI Annex A	[Character string] From a predefined list	CCS TSI 2019/776: - 4.2.2 On-board ETCS functionality
4.13.1.5	Class B or other train protection, control and warning systems installed (system and, if applicable, version)	[Character string] From a predefined list (more than one option possible)	CCS TSI 2019/776: - 4.2.6.1 ETCS and Class B train protection
4.13.1.7	ETCS on-board implementation	[Character string]	CCS TSI 2019/776: - 4.2.2 On-board ETCS functionality - 7.2.1a.1.11 System Identifier
4.13.1.8	ETCS System Compatibility	[Character string] From a predefined list (more than one option possible)	CCS TSI 2019/776: - 4.2.17.1 ETCS System Compatibility Note on the predefined list values: - “Not applicable”: ETCS is not installed or not authorised in the vehicle. - “ESC-EU-0”: The on-board subsystem only have EC certificates, without any ESC checks. - “ESC-NP-CCS7.4a”: The technical compatibility has been demonstrated according to a previous national procedure.
4.13.1.9	Managing information about the completeness of the train	[Boolean] Y/N	CCS TSI 2019/776: - 4.2.2 On-board ETCS functionality
4.13.2	Radio	Heading (no data)	
4.13.2.1	GSM-R Radio voice on board and its Baseline	[Character string] From a predefined list	CCS TSI 2019/776: - 4.2.4 Mobile communication functions for railways GSM-R - 4.2.4.2 Voice and operational communication application
4.13.2.3	Class B or other radio systems installed (system and, if applicable, version)	[Character string] From a predefined list (more than one option possible)	CCS TSI 2019/776: - 4.2.5.1 Radio communication with the train

#	Parameter	Data format	Comments and applicable TSI clauses

#	Parameter	Data format	Comments and applicable TSI clauses
4.13.2.11	Data SIM Card GSM-R Home Network	[Character string] From a predefined list	CCS TSI 2019/776: - 4.2.4 Mobile communication functions for railways GSM-R - 4.2.4.1 Basic communication function
4.13.2.12	Voice SIM Card support of Group ID 555	[Boolean] Y/N	CCS TSI 2019/776: - 4.2.4 Mobile communication functions for railways GSM-R - 4.2.4.2 Voice and operational communication application
4.14	Compatibility with train detection systems	Heading (no data)	
4.14.1	Type of train detection systems for which the vehicle has been designed and assessed	[Character string] From a predefined list (more than one option possible)	TSI LOC&PAS 1302/2014: - 4.2.3.3.1 Rolling Stock characteristics for the compatibility with train detection systems CR TSI LOC&PAS 2011/291/EU: - 4.2.3.3.1 Rolling Stock characteristics for the compatibility with train detection systems HS TSI 2008/232/EU: - 4.2.7.9. Control-command and signalling system TSI WAG 321/2013: - 4.2.3.3. Compatibility with train detection systems CCS TSI 2019/776: - 4.2.10. Trackside Train Detection Systems - 4.2.11. Electromagnetic Compatibility between Rolling Stock and Control-Command and Signalling trackside equipment

6. Annex II - Type authorisation regimes – matrix of options

Table 6 – Registration regimes - matrix of options

	Options allowed by Directive 2008/57/EC		Options allowed by Directive (EU) 2016/797	
	Options	Action in ERATV	Options	Action in ERATV
A. MS has transposed the Directive (EU) 2016/797	Not applicable	Not applicable	A.1. New type creation → allowed	A.1. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> . Registration method: <i>New type</i>
			A.2. New variant → allowed	A.2. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> Registration method: <i>New variant</i>
			A.3. New version (2016/797) → allowed	A.3. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> Registration method: <i>New version</i>
			A.4. New version under 2008/57 → not allowed	
			A.5. Additional type authorisation under 2008/57 → not allowed	
			A.6. Extension of area of use (2016/797):	
			a. To a type registered under registration 2008/57 → not allowed → APM to be delivered by ERA	
			b. To a type registered under registration 2016/797 → not allowed → APM to be done by ERA	
			c. To add a new network in the area of use within the same Member State → allowed	A.6.c. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> Registration method: <i>New version of a registered type</i>

	Options allowed by Directive 2008/57/EC		Options allowed by Directive (EU) 2016/797	
	Options	Action in ERATV	Options	Action in ERATV
B. MS has not transposed the Directive (EU) 2016/797	B.1. <i>New type</i> → allowed	B.1. Register new type: Registration regime: <i>Directive 2008/57/EC</i> Registration method: <i>New type of a new platform/registered platform</i>	Not applicable	Not applicable
	B.2. <i>New variant</i> → not allowed			
	B.3. <i>New version (2016/797)</i> → not allowed			
	B.4. <i>New version (2008/57)</i> → allowed	B.4 Register new type: Registration regime: <i>Directive 2008/57/EC</i> Registration method: <i>New version of a registered type</i>		
	B.5. <i>Additional type authorisation (2008/57)</i> : a. <i>To a type registered under registration 2008/57</i> → allowed b. <i>To a type registered under registration 2016/797</i> → not allowed as a general rule	B.5.a: Register authorisation
