A Compelling Vision for the Target Rail System

Perspective of a regulatory body

16/09/2020

Jürg LÜTSCHER

The Swiss Public Transport is successful

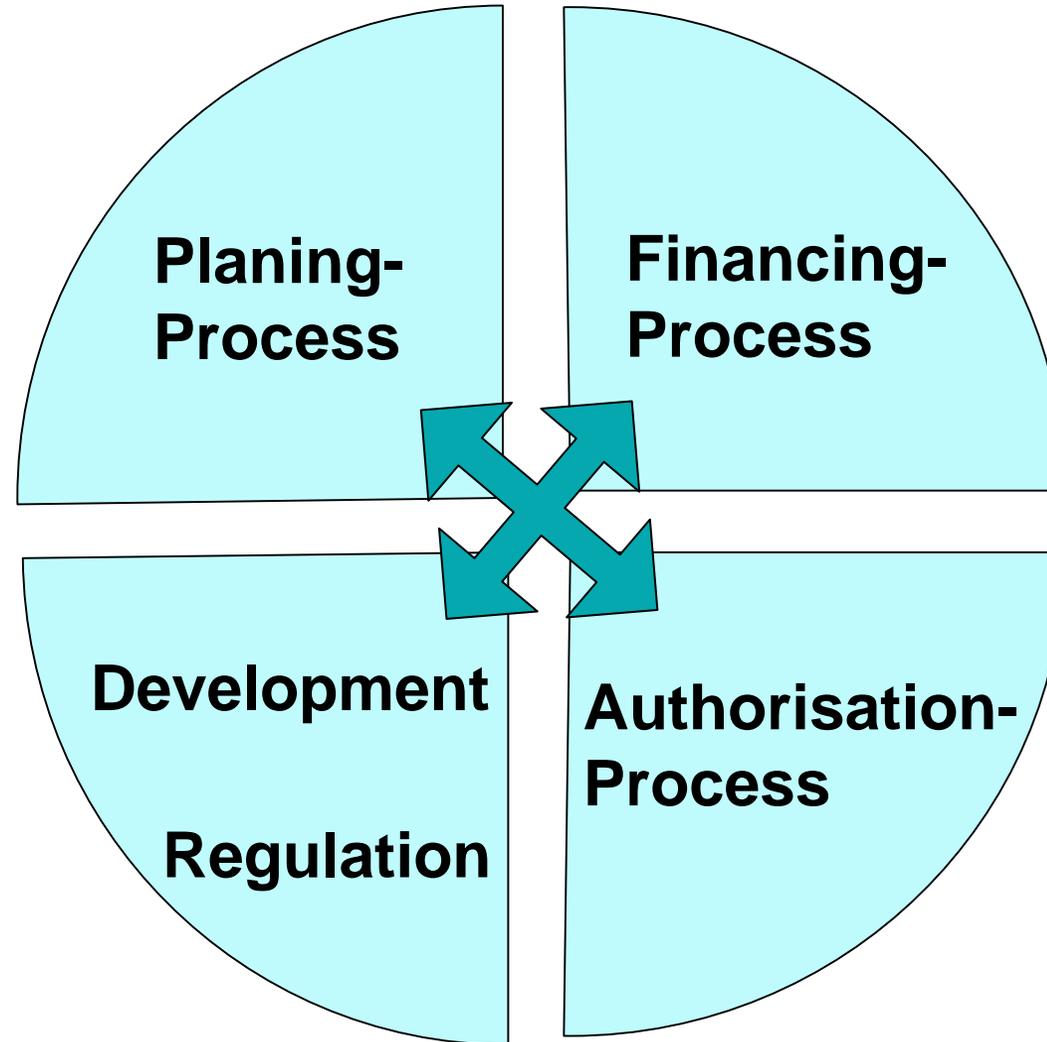

- Our Railway-Systems sees continuous evolution and upgrades
- The Customer Needs remain in the focus of these upgrades
- The improved Railway Service is well used

Swiss Federal Office of Transport BAV/FOT

Our Strategy is based on an integral view

BAV/FOT - Vision 2030

Public Transport stands for powerful service

- Attractive for customers
- Sustainably financed
- Green, safe and reliable

BAV/FOT - our Mission

- We focus on customers
- We shape future rail traffic
- We optimize public transport and freight traffic
- We develop Rail Infra with respect of demands
- We make use of technological innovation
- We focus on effective financing

BAV/FOT – our major tasks

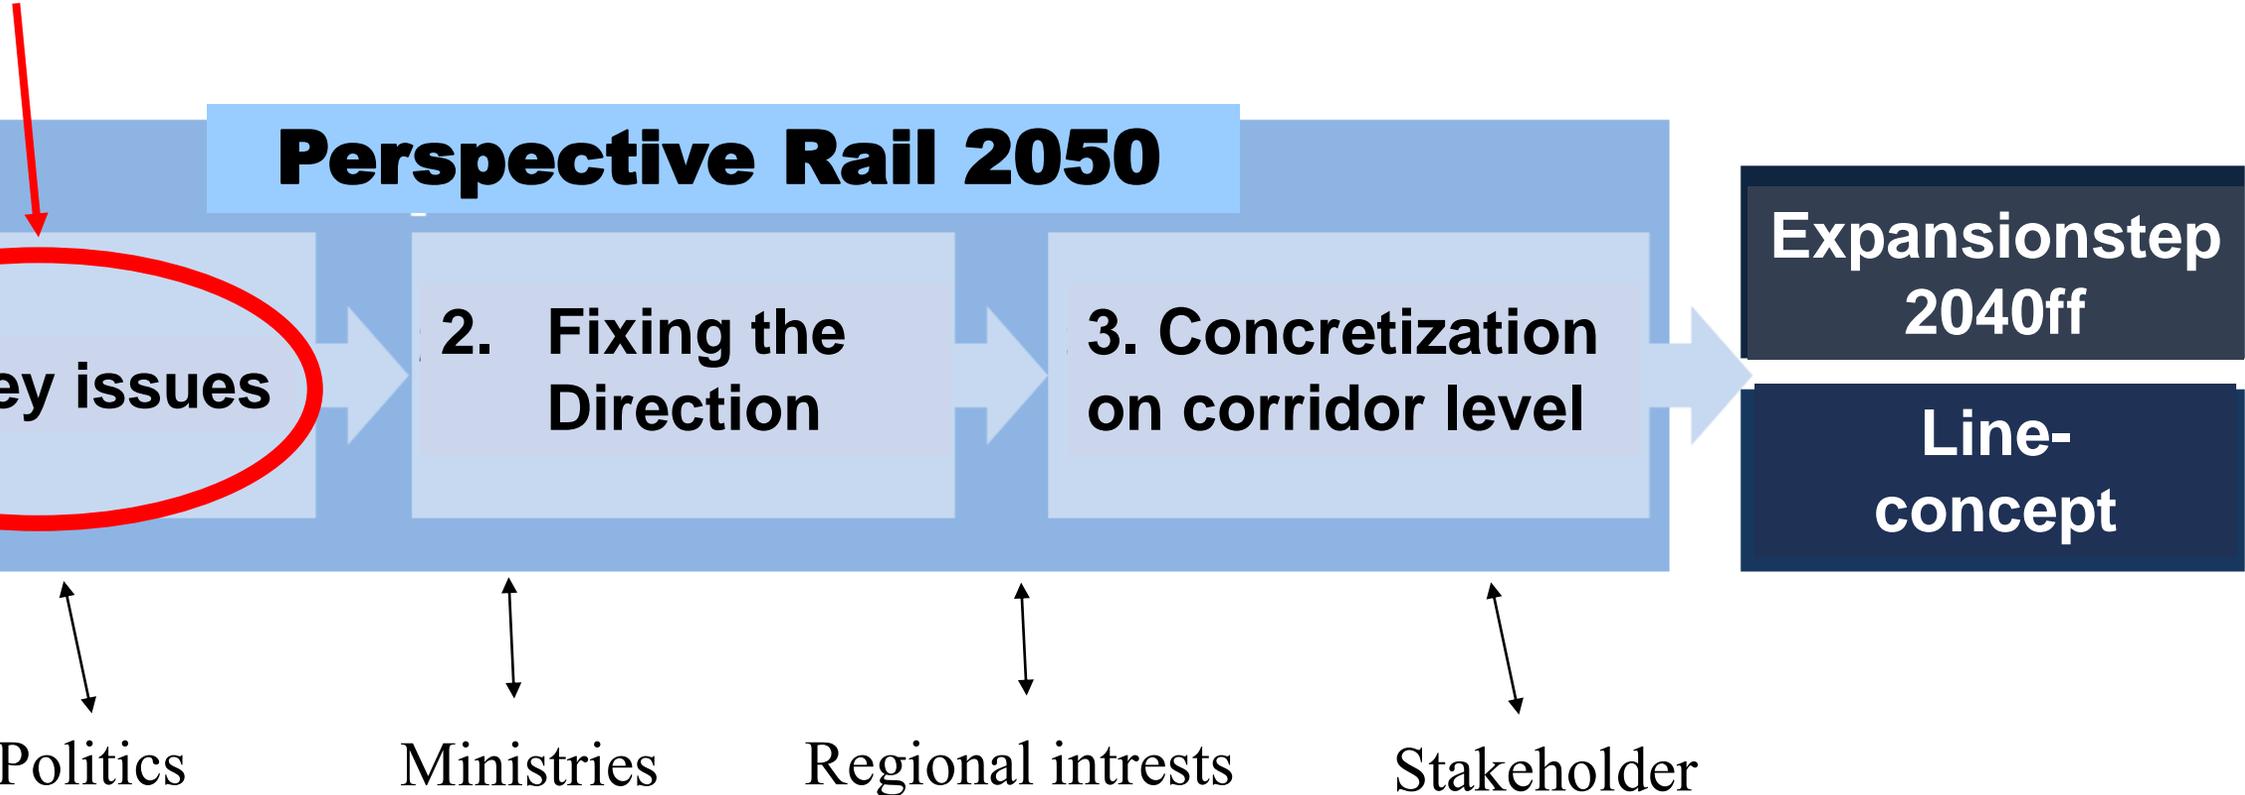

- We know the customer needs
- Ticketing-System provides end to end service
- Rail service as a part of mobility and transport
- Timely application of innovative solutions
- Focus on energy efficiency, low pollution, low noise
- Coordinated future development of Rail and Road
- Railways will fulfil future mobility needs
- EU-compatible standards to be applied
- Improved cross border traffic
- Our financing is incentive-based

How plans FOT actually the future in 2050?

We stay here

Conclusions as regulatory body

- ✓ **There is a high agreement**
- **key success factor is a shared vision with committed stakeholders**
