

Making the railway system
work better for society.

Technical document

IMPLEMENTATION GUIDE FOR EDIFACT MESSAGES COVERING TIMETABLE DATA EXCHANGE

*In the Document History table, version are identified as x.n where
“x” is a correlative number assigned to an approved version when reaching a main milestones
“n” is a correlative number assigned to draft versions, starting by 1. “n”=0 means version approved
Information related to previous draft versions (i.e. 0.1, 0.2 etc.) shall be deleted from the table when a
subsequent approved version is issued.*

1. Technical Document summary

1.1. Purpose of the Technical Document

This Technical Document sets implementation guides for EDIFACT messages used for the exchange of timetable data by the railway community in the passenger sector.

1.2. Scenario

This part describes all scenarios in which the messages presented in this Technical Document may be used.

1.3. Description of a guide

A guide is established for one and only one message based on a version of EDIFACT directories. It contains the following parts:

- definition and functionality

- message structure: branching diagram and segments table
- segment specifications
- message examples
- updates according to EDIFACT directories

2. Technical Document body

2.1. REFERENCES AND CONTACTS

2.1.1. References

- REGULATION (EU) No 454/2011 “Technical specification for interoperability relating to the subsystem ‘telematics applications for passenger services’ of the trans-European rail system”
- UN/EDIFACT - ISO 9735 - Version 4 - Parts 1 and 3
- UN/TRADE/WP.4/R.1237 (17 July 1996)
UN/EDIFACT INTERACTIVE MESSAGE DESIGN GUIDELINES
- UN/EDIFACT Standard Directory D.04A
- Reference Table "DIRECTORY OF PASSENGER CODE LISTS FOR THE ERA TECHNICAL DOCUMENTS USED IN TAP TSI". This document contains all the code lists referred to in this Technical Document.

2.2. SCENARIO

2.2.1. Bulk timetable data exchange

According to the Basic Parameter 4.2.1 of REGULATION (EU) No 454/2011 “Technical specification for interoperability relating to the subsystem ‘telematics applications for passenger services’ of the trans-European rail system”, each RU subject to the Regulation shall make available all its timetables by guaranteeing access to all RUs or to third parties which are authorized to use and to all authorised public bodies.

In order to fulfil this obligation each RU subject to the Regulation shall make available its timetables on one or more IT systems. The technical standards defining how to inform the authorised users that a new version of the timetables was made available, or how to ensure that only authorised users can download the data, shall be defined during the SEDP phase of the Regulation (Strategic European Deployment Plan).

This technical Document only describes in which format the timetable data must be made available. In particular two messages are used (as defined by the UN/EDIFACT Board):

SKDUPD	This message is used within the Travel, Tourism and Leisure industry to make available or transmit transport timetable information.
TSDUPD	This message provides static data complementary to the travel timetable information conveyed by a SKDUPD (Schedule Update) message, such as information about locations related to the schedules.

2.3. SERVICE SEGMENTS

2.3.1. General

The service segments used in an I-EDI environment are:

UIB - Interactive Interchange Header

UIH - Interactive Message Header

UIT - Interactive Message Trailer

UIZ - Interactive Interchange Trailer

For Service Segment specifications, see ISO 9735-1.

For a description of an I-EDI transaction see ISO 9735-3.

Note: for compatibility reasons with the UN/EDIFACT messages, all elements of each segment are shown in the following, with the mention "Not applicable" if not to be used for the scope of this Technical Document.

2.3.2. Railway use of service segments

Legend for tables contained in this section:

Tag	= Composite or data element tag as applicable (first column for composite or stand-alone data elements, second column for component data elements)
Name	= Composite or data element name as applicable
St	= Status: C = conditional, M = mandatory
Rp	= Maximum number of repeats
Frmt	= Format
Comments	= Implementation comments. Possible indications are: <ul style="list-style-type: none"> • Mandatory: the composite or data element, while declared "conditional" is mandatory for railway use • Value = xxx (xxx being a value to be introduced for railway use of the message) • Values = xxx to yyy (one out the range of values from xxx through yyy is to be introduced for railway use of the message) • Not applicable (this data element or composite is not applicable for railway use of the message) • See code list (the value is to be chosen from the code list for the concerned data element in ERA Technical Document xxx) • See code list - Value(s) = xxx (to yyy) (the value is chosen from the code list for a given data element in ERA Technical Document xxx , but has to be one of the range given in the value clause (xxx to yyy))

Note: only the UIB and UIZ segments are described in this section. UIH and UIT are included in Section 4.

2.3.2.1. UIB - Interactive Interchange Header

Function To head and identify an interchange.

Example ORG+0080+++0080'

Level 0 - HDR - Header information

Function To specify header information applicable to the entire message.

Railway use This segment is used to convey delivery information (status, reference, dates and time, etc.).

Tag	Tag	Name	St	Rp	Frmt	Comments
4405		STATUS DESCRIPTION CODE	M	1	an..3	Delivery status. See code list B.4.4405 Values = 81, 21 or 113
E013		DATE AND TIME INFORMATION	M	4		The 4 occurrences of this composite may be used to specify the delivery's: <ul style="list-style-type: none"> • First and last date of validity • Date and time • Creation date • Delivery release date The qualifier (2005) specifies which of these functions the data element 2380 has.
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Values = 11 = delivery date and time 45 = creation date and time 273 = first and last date of validity x = delivery release date
	2380	Date or time or period text	M		an..35	The following formats are to be used: <ul style="list-style-type: none"> • delivery date/time and creation date/time: yyyy-mm-ddThhmm • first and last date of validity: yyyy-mm-dd/yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..512	Not applicable
1154		REFERENCE IDENTIFIER	C	1	an..35	Delivery reference number. Mandatory if the message contains an update to a previous delivery or if it contains a complete delivery that may be the subject of subsequent update messages. Absent in all other cases.
4440		FREE TEXT VALUE	C	1	an..512	Delivery free format reference
7135		PRODUCT IDENTIFIER	C	2	an..35	Not applicable

3453		LANGUAGE NAME CODE	C	1	an..3	See code list ISO 639-1
------	--	--------------------	---	---	-------	-------------------------

Example HDR+81+273:1996-09-29/1997-05-31*11:1996-07-20T1422*45:1996-07-20T1422+0003'

Level 0 - IFT - Interactive free text

<i>Function</i>	To provide free form information.
<i>Railway use</i>	Not applicable.

Level 1 - RFR - Reference

Function To specify a reference.

Railway use An occurrence of the RFR segment must be present if the message contains an update to a previous delivery. It shall refer to that previous delivery's reference. As such, it enables the recipient to check the chain of updates and to identify the delivery for which this message is an update. In all other cases the segment must be absent.

Tag	Tag	Name	St	Rp	Frmt	Comments
E506		REFERENCE	M	1		
	1153	Reference function code qualifier	M		an..3	See code list B.4.1153. Value = AGX
	1154	Reference identifier	C		an..35	Mandatory. Reference of the previous delivery.
	1156	Document line identifier	C		an..6	Not applicable
	4000	Reference version number	C		an..35	Not applicable
	3036	Party name	C		an..35	Not applicable

Example RFR+AGX:0002'

Level 1 - Group 1 - ERI - Application error information

<i>Function</i>	To identify the type of application error within a message.
<i>Railway use</i>	<ul style="list-style-type: none"> Not applicable.

Level 2 - Group 1 - IFT - Interactive free text

Function To provide free-form information.

Railway use This segment may be used to give a textual description of the error. Its use needs to be discussed.

Tag	Tag	Name	St	Rp	Frmt	Comments
E971		FREE TEXT QUALIFICATION	C	1		
	4451	Text subject code qualifier	M		an..3	See code list B.4.4451. Value = AAO
	4473	Information type code	C		an..4	Not applicable

	4405	Status description code	C		an..3	Not applicable
	3036	Party name	C		an..35	Not applicable
	3453	Language name code	C		an..3	See code list ISO 639-1
4440		FREE TEXT VALUE	C	99	an..512	Mandatory. Textual description of the error. Only one occurrence of the data element is used.

Example IFT+AAO:::::EN+DEPARTURE TIME MISSING'

Level 1 - Group 2 - PRD - Product identification

Function To identify a product.

- Railway use*
- This segment triggers Group 2, which specifies information about the timetable of a given transport service (train service, bus service, etc.).
 - This segment identifies the transport service. The service is identified by concatenation of the party name (Service Provider) and product identification (Service number) elements.
In a railway context, the transport service may be:
 - a conventional train or
 - a coach group, in which case the associated train service must be identified in the RFR segment of Group 8.

Tag	Tag	Name	St	Rp	Frmt	Comments
E989		PRODUCT IDENTIFICATION DETAILS	C	9		Mandatory. One and only one occurrence of this composite is used.
	7135	Product identifier	C		an..35	Service number (e.g., train number). Defines, together with the service provider (E988/3036(1)), the service identification. See code list B.4.7135.

Tag	Tag	Name	St	Rp	Frmt	Comments
	7037	Characteristic description code	C		an..17	Service characteristic: here the status of reservations for the service, irrespective of the period of operation. See code list B.4.7037. 4440		FREE TEXT VALUE	C	99	an..512	Mandatory. Free-text description of the service characteristic or product name. Only one occurrence of the data element is used.

Example IFT+PRD:::EN+HOLIDAY EXPRESS'

IFT+AUY:::EN+RESERVATION COMPULSORY'

Level 2 - Group 2 - TRF - Traffic restriction details

<i>Function</i>	To convey certain restrictions that apply to a travel-related object.
<i>Railway use</i>	Not applicable

Level 2 - Group 2 - ASD - Service details

Function To specify the time, date, location and additional characteristic information related to a service.

Railway use This segment may be used to specify any extra service available with the travel service. If the extra is only available for part of the period or on specific days of the week, this must be specified through DATE/TIME/PERIOD and DAYS OF WEEK SET IDENTIFIER. Note that the extra service described in this segment must be applicable to all the periods and to the whole of the itinerary. Period dependent services must be described in Group 4 (POP), while location dependent services must be described either in Group 6 (POR) or in Group 9 (ODI).

It is recommended to specify the extra services of the travel service in the segment ASD of segment group 4 rather than in this segment.

The ASD segment can describe only one service. Repeat the segment as required (up to 99 times).

Tag	Tag	Name	St	Rp	Frmt	Comments

2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.). Not used if E013/4440 is used to specify the operation days

Examples

ASD+26++67'

= A snack is served on Saturdays and Sundays.

ASD+26+273:2000-09-21/2000-09-30::1101101111'

A snack is served from 21 to 30 September 2000, but not on 23 and 26 September

Level 2 - Group 2 - MSD - Message action details

Function To specify the message processing requirements.

Railway use This segment enables to specify that a service is to be deleted from the schedule database. Its use is only allowed for schedule updates (E972/1225-1 in MSD at level 0 = 62). A deletion includes *all* the data in the database bearing the service identifier (service provider + train number) specified in the PRD segment.

If, in case of schedule update, this segment is not used, the service in the database is completely replaced by the corresponding data under the PRD segment.

Tag	Tag	Name	St	Rp	Frmt	Comments

Example MSD+AAR:56'

The service defined in the PRD segment has to be deleted from the database.

Level 2 - Group 2 - RFR - Reference

Function To specify a reference.

Railway use This segment is used to specify a travel service number which is published to the customer if it is different to PRD/E989/7135

If the reference identifier (1154) is empty, the travel service is published to the customer without a number

Tag	Tag	Name	St	Rp	Frmt	Comments
E506		REFERENCE	M	1		
	1153	Reference function code qualifier	M		an..3	See code list B.4.1153.Value = AVI
	1154	Reference identifier	C		an..35	Number of the travel service.
	1156	Document line identifier	C		an..6	Not applicable
	4000	Reference version number	C		an..35	Not applicable
	3036	Party name	C		an..35	Not applicable

Example

RFR+X02:28'

= Regardless of the identification given in PRD/E989/7135 the specified travel service is published with the number 28 to the customer.

Level 2 - Group 3 - SER - Facility information

Function To provide additional service information, followed by the period and days of operation.

Railway use This segment triggers Group 3, which specifies information about facilities available with the given transport service. This information can be repeated. The segment allows the definition of a sub-period, or specific days of the weeks for which the facility is available.

Each SER segment specifies one and only one facility. Repeat as required (up to 99 times).

It is recommended to specify the facilities of the travel service in the segment SER of segment group 5 rather than in this segment.

Tag	Tag	Name	St	Rp	Frmt	Comments
E965		FACILITIES	M	99		One and only one occurrence of this composite is used.
	9039	Facility type description code	C		an..3	Mandatory. See code list B.4.9039.

Example ASD+26++67 '
= On Saturday and Sunday, snacks are available in the given facility.

Level 2 - Group 4 - POP - Period of operation

Function To specify the date or time period with days of operation.

Railway use

- This segment is the trigger of Group 4, that specifies information about the timetable of a given transport service (train service, bus service, etc.) for a given period of operation.
- This segment specifies a period of operation (first and last date, days in the week).
- The segment and the underlying groups are omitted in case of deletion of the service (Group 2/MSD/1225-1 = 56).

Example IFT+ADU:::EN+SCHOOL HOLIDAY PERIOD'

Level 3 - Group 4 - TRF - Traffic restriction details

<i>Function</i>	To convey certain restrictions that apply to a travel-related object.
<i>Railway use</i>	Not applicable

Level 3 - Group 4 - ASD - Service details

Function To specify the time, date, location and additional characteristic information related to a service.

Railway use This segment may be used to specify any extra service available with the travel service during the given period of operation. If the extra is only available for part of the period or on specific days of the week, this must be specified through DATE/TIME/PERIOD and DAYS OF WEEK SET IDENTIFIER. Note that the extra service described in this segment must be applicable to the whole of the itinerary. Location-dependent services must be described either in Group 6 (POR) or in Group 9 (ODI).

The ASD segment can describe only one service. Repeat the segment as required (up to 99 times).

Example ASD+26++67'
= A snack is served on Saturdays and Sundays.

Level 3 - Group 4 - FRQ - Frequency

Function To provide details of frequencies.

Railway use This segment may be used to specify frequency intervals at which certain services operate.

Tag	Tag	Name	St	Rp	Frmt	Comments
E520		FREQUENCY	M	99		
	6072	Frequency value	M		n..9	Frequency interval.
	6411	Measure unit code	C		an..3	Units of measurement in which the frequency value is expressed. See code list B.4.6411. Values = MIN, HUR. Default = minutes.

	2380	Date or time or period text	C		an..35	Mandatory. Frequency first and last time. Format = hhmm/hhmm
	2379	Date or time or period function code qualifier	C		an..3	Not applicable

Example FRQ+30:MIN:0600/2100'
= the service operates every 30 minutes from 6 a.m. to 9 p.m.

Level 3 - Group 5 - SER - Facility information

Function To provide additional service information, followed by the period and days of operation.

Railway use • This segment triggers Group 5, which specifies information about facilities available with the given transport service only for the given period of operation defined in POP. This information can be repeated. The segment allows the definition of a sub-period, or specific days of the weeks for which the facility is available.

Each SET segment specifies one and only one facility. Repeat the segment as required (up to 99 times).

Tag	Tag	Name	St	Rp	Frmt	Comments
E965		FACILITIES	M	99		One and only one occurrence of this composite is used.
	9039	Facility type description code	C		an..3	Mandatory. See code list B.4.9039.
	9038	Facility type description	C		an..70	Not applicable
	7133	Product details type code qualifier	C		an..3	Not applicable
	7037	Characteristic description code	C		an..17	Reservation information concerning the facility. This information can be repeated. See code list B.4.7037. Values = 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28
1229		ACTION REQUEST/NOTIFICATION DESCRIPTION CODE	C		an..3	Not applicable.
6350		UNITS QUANTITY	C		n..15	Number of facilities available in the service.

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	C	99		One occurrence only. Definition of the availability period of the facility. If omitted: always available during the operation period of the travel service. The availability period must fit within the period of operation of the travel service defined in segment POP.
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 273.
	2380	Date or time or period text	M		an..35	Period of availability. Format = yyyy-mm-dd/yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	May be used to specify the availability days, one day by character ("0" = not available, "1" = available), starting from the first day specified in the period of availability (2380).
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.). Not used if E013/4440 is used to specify the operation days

Example SER+33::::2:13+273:1997-06-01/1997-09-30'

= From 1 June 1997 until 30 September 1997, the service includes 2 video coaches (33) wherein reservation is compulsory (13).

Level 4 - Group 5 - ASD - Service details

Function To specify the time, date, location and additional characteristic information related to a service.

Railway use This segment may be used to specify any extra service available within a given facility.
The ASD segment can describe only one service and cannot be repeated.

Tag	Tag	Name	St	Rp	Frmt	Comments
E959		SERVICE DETAILS	M	99		One occurrence only.
	7161	Special service, coded	M		an..3	Identification of the extra service. See code list B.4.7161.

Tag	Tag	Name	St	Rp	Frmt	Comments
	2002	Time value	C		n4	Extra service first time or additional first time (format = hhmm).
	2002	Time value	C		n4	Extra service last time or additional last time (format = hhmm).
	2000	Date value	C		an..14	Not applicable

	3225	Location name code	C		an..25	Not applicable
	3227	Location function code qualifier	C		an..3	Not applicable
	7037	Characteristic description code	C		an..17	Reservation information concerning the extra service. See code list B.4.7037. Values = 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23
	3223	First related location name code	C		an..25	Not applicable
	3207	Country name code	C		an..3	Not applicable
	7160	Special service description	C		an..35	Not applicable
	7036	Characteristic description	C		an..35	Not applicable
	1229	Action request/notification description code	C		an..3	Not applicable
	3233	Second related location name code	C		an..25	Not applicable
	3453	Language name code	C		an..3	Not applicable
	6072	Frequency value	C		n..9	Frequency interval of the extra service.
	6411	Measurement unit code	C		an..3	Measure unit in which the frequency value is expressed. See code list B.4.6411. Values = MIN, HUR.
	6060	Quantity	C		an..35	
	3036	Party name	C		an..35	

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	C	99		One occurrence only. Definition of the availability period of the extra service. If omitted: always available during the availability period of the facility The availability period must fit within the period of availability of the facility defined in segment SER
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 273
	2380	Date or time or period text	M		an..35	Period of availability. Format = yyyy-mm-dd/yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	May be used to specify the availability days, one day by character ("0" = not available, "1" = available), starting from the first day specified in the period of availability (2380).
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.). Not used if E013/4440 is used to specify the operation days

Example ASD+26++67'

= On Saturday and Sunday, snacks are available in the given facility.

Level 3 - Group 6 - DTI - Date and time information

Function To specify the date, and/or time, or period.

Railway use

- This segment triggers Group 6, which specifies special days to be added to, or excluded from, the period of operation. This Group should not be used if the main period description in segment POP is given by using POP/E013/4440 (string of operation days, one day by character ("0" = not operational, "1" = operational))
- This segment specifies a special day or period.

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	M	9		Definition of a day or period to be added to or excluded from the period of operation.
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Values = 62, 66, 68, 70

Tag	Tag	Name	St	Rp	Frmt	Comments
	2380	Date or time or period text	M		an..35	Date or period. Format = - if 2005 = 66 or 68: yyyy-mm-dd/yyyy-mm-dd - if 2005 = 62 or 70: yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable
E014		TIME REFERENCE DETAILS	C	99		
	1154	Reference identifier	C		an..35	Not applicable
	1153	Reference function code qualifier	C		an..3	Not applicable

Example DTI+62:1997-12-25'
= 25 December is to be excluded from the period of operation.

Level 4 - Group 6 - IFT - Interactive free text

Function To provide free form information.

Railway use This segment may be used to convey a free-text description of the special day or period.

Tag	Tag	Name	St	Rp	Frmt	Comments
E971		FREE TEXT QUALIFICATION	C	1		
	4451	Text subject code qualifier	M		an..3	See code list B.4.4451. Value = BLO
	4473	Information type code	C		an..4	Not applicable
	4405	Status description code	C		an..3	Not applicable
	3036	Party name	C		an..35	Not applicable
	3453	Language name code	C		an..3	See code list ISO 639-1
4440		FREE TEXT VALUE	C	99	an..51 2	Mandatory. Free-text description of the special day or period. Only one occurrence of the data element is used.

Example IFT+BLO::::EN+CHRISTMAS'

Level 3 - Group 7 - POR - Location and/or related time information

Function To provide information about a location relating to a service in the following sequence: arrival time, departure time, arrival sub-location and departure sub-location, traffic restrictions.

- Railway use**
- This segment triggers Group 7, which may be used to provide information related to a location used for a given service. For coach groups, only the locations where they are added to a train are mentioned and the terminus if different from the terminus of the train to which it was added.
 - This segment specifies a location and the corresponding arrival and departure information.
 - In the message, the locations must occur in the same order as they occur in the service itinerary.
 - Border stations and significant via stations which are linked to fare definitions (technical documents B.1, B.2, B.3) must be indicated in the timetable with their passing time.

Tag	Tag	Name	St	Rp	Frmt	Comments
E517		LOCATION IDENTIFICATION	M	1		
	3225	Location name code	C		an..25	See code list B.4.3225.
	1131	Code list identification code	C		an..3	See code list B.4.1131 Default = 37 (Railway location)
	3055	Code list responsible agency code	C		an..3	See code list B.4.3055.
	3224	Location name	C		an..70	Not applicable
E362		RELATED TIME INFORMATION	C	2		<ul style="list-style-type: none"> • The first occurrence gives arrival time and the second departure time. • Not used for coach groups (PRD/E989/7009 = 31) • Times are given in local time (0000 to 2359).
	2002	Time value	C		n4	Vehicle time. Format = hhmm
	2002	Time value	C		n4	Passenger time. Format = hhmm
	2020	Time zone difference value	C		n..4	Not applicable

Tag	Tag	Name	St	Rp	Frmt	Comments
	2148	Date variation number	C		n..5	For the first occurrence of E362 (arrival), value is: -1, if arrival date is previous to departure date at the previous stop location, 0 (default), if arrival date is the same as the departure date at the previous stop location, 1, if arrival date is the day after departure date at the previous stop location. For the second occurrence of E362 (departure), value is : 0 (default), if departure date is the same as the arrival date 1, if departure date is the day after arrival date
E992		POSITION	C	2		The first occurrence gives arrival location and the second departure location.
	3223	First related location name code	C		an..25	Sub-location for vehicle.
	3233	Second related location name code	C		an..25	Sub-location for passengers.
3227		LOCATION FUNCTION CODE QUALIFIER	C	1	an..3	Function of the location for the service. See code list B.4.3227.
1050		SEQUENCE POSITION IDENTIFIER	C	1	an..10	Not applicable

Example

POR+8814001+0725*0727+12'

= The train service arrives in Bruxelles-Midi at 7.25 a.m. and leaves at 7.27. It arrives at and leaves from platform 12.

Level 4 - Group 7 - MES - Measurements

Function To specify physical measurements, including dimension tolerances, weights and counts.

Railway use This segment may be used to specify the distance to the location from the departure location of the service.

Tag	Tag	Name	St	Rp	Frmt	Comments
E175		MEASUREMENT VALUE AND DETAILS	M	9		Only one occurrence of this composite is used.
	6314	Measurement value	M		n..18	Distance.
	6411	Measure unit code	C		an..3	Mandatory. Unit of measurement. See code list B.4.6411. Values = KMT, MTR, SMI, YRD.
	6313	Measurement dimension, coded	C		an..3	Not applicable. "Distance to departure location" assumed.
	6321	Measurement significance code	C		an..3	Not applicable. "Exact value" assumed.

Example MES+25 : KMT '

= The distance between the given location and the departure location of the service is 25 km.

Level 4 - Group 7 - ASD - Service details

Function TO SPECIFY THE TIME, DATE, LOCATION AND ADDITIONAL CHARACTERISTIC INFORMATION RELATED TO A SERVICE.

Railway use THIS SEGMENT MAY BE USED TO SPECIFY ANY EXTRA SERVICE ADMINISTERED AT THE GIVEN LOCATION.

The ASD segment can describe only one service. Repeat the segment as required (up to 9 times).

Tag	Tag	Name	St	Rp	Frmt	Comments
E959		SERVICE DETAILS	M	99		One occurrence only.
	7161	Special service, coded	M		an..3	Identification of the extra service. See code list B.4.7161. Values = 3, 4, 7, 9, 33 to 36, 44 and 45
	2002	Time value	C		n4	Extra service first time or additional first time (format = hhmm). When code 7161 indicates check-out (45), this field specifies the earliest check-out time.

Tag	Tag	Name	St	Rp	Frmt	Comments
	2002	Time value	C		n4	Extra service last time or additional last time (format = hhmm). When code 7161 indicates check-in (44), this field specifies the latest check-in time.
	2000	Date value	C		an..14	Not applicable
	3224	Location name	C		an..70	Not applicable
	3225	Location name code	C		an..25	Not applicable
	3227	Location function code qualifier	C		an..3	Not applicable
	7037	Characteristic description code	C		an..17	Reservation information concerning the extra service. See code list B.4.7037. Values = 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23
	3223	First related location name code	C		an..25	Identification of the sub-location where the extra service takes place (e.g. special loading platform for vehicles).
	3207	Country name code	C		an..3	Not applicable
	7160	Special service description	C		an..35	Not applicable
	7036	Characteristic description	C		an..35	Not applicable
	1229	Action request/notification description code	C		an..3	Not applicable
	3233	Second related location name code	C		an..25	Identification of a second sub-location where the extra service takes place.
	3453	Language name code	C		an..3	Not applicable
	6072	Frequency value	C		n..9	Frequency interval of the extra service.
	6411	Measurement unit code	C		an..3	Measure unit in which the frequency value is expressed. See code list B.4.6411. Values = MIN, HUR.
	6060	Quantity	C		an..35	
	3036	Party name	C		an..35	

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	C	99		One occurrence only. Definition of the availability period of the extra service. If omitted: always available during the operation period of the travel service. The availability period must fit within the period of operation of the travel service defined in segment POP
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 273
	2380	Date or time or period text	M		an..35	Period of availability. Format = yyyy-mm-dd/yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..512	May be used to specify the availability days, one day by character ("0" = not available, "1" = available), starting from the first day specified in the period of availability (2380).
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.). Not used if E013/4440 is used to specify the operation days

Example

ASD+7:1730:1830:::::P12++12345'

= From Monday to Friday, vehicles may be loaded on the train from 5.30 p.m. to 6.30 p.m. at loading platform P12.

Level 4 - Group 7 - SER - Facility information

<i>Function</i>	To provide additional service information, followed by the period and days of operation.
<i>Railway use</i>	Not applicable: all segment related information is under group 9 (ODI).

Level 4 - Group 7 - TRF - Traffic restriction details

<i>Function</i>	To convey certain restrictions that apply to a travel-related object.
<i>Railway use</i>	Indication of travel restrictions related to the given location (e.g. alighting only, boarding only)

Tag	Tag	Name	St	Rp	Frmt	Comments
E007		TRAFFIC RESTRICTION DETAILS	C	5		Mandatory. This composite may be used to specify travel restrictions. One and only one occurrence of this composite is used.
	8015	Traffic restriction code	C		an..3	Mandatory. See code list B.4.8015.
	8017	Traffic restriction application code	C		an..3	Not applicable
	8035	Traffic restriction type code qualifier	C		an..3	Not applicable
	4440	Free text value	C		an..512	Not applicable

Example TRF+1 '
= The service stops at the given location for boarding only.

Level 4 - Group 8 - RFR - Reference

Function To specify a reference.

- Railway use**
- This segment triggers Group 8, used to reference a travel service to which the service described in PRD is related (joins, connects with, splits).
 - This segment gives the identification of the related service. As in PRD, the service is identified by a concatenation of the service provider and service number (here given in the 'party name' and 'reference identifier' elements).
 - If the service described in the PRD segment is a coach group, the service identified in this segment is the train to which the coach group is attached.
 - If the service described in the PRD segment is not a coach group and the relation description code (9143) in the underlying RLS segment is 6 (connecting to) or 12 (change service number), the actual occurrence of group 7 (POR) should be the last for the given service (PRD).
 - If the service described in the PRD segment is not a coach group and the relation description code (9143) in the underlying RLS segment is 13 (disconnect from), the actual occurrence of group 7 (POR) should be the first for the given service (PRD).

Tag	Tag	Name	St	Rp	Frmt	Comments
E506		REFERENCE	M	1		
	1153	Reference function code qualifier	M		an..3	See code list B.4.1153. Value = AUE
	1154	Reference identifier	C		an..35	Mandatory. Service number
	1156	Document line identifier	C		an..6	Not applicable
	4000	Reference version number	C		an..35	Not applicable
	3036	Party name	C		an..35	Mandatory. Service Provider; See code list B.4.3039.

Example RFR+AUE:39:::0088'
= Reference to the train service SNCB-39.

Level 5 - Group 8 - RLS - Relationship

Function To identify the direct relationship between the data/information contained in one segment and the data/information contained in one or more other segments.

Railway use This segment identifies the relationship between the service defined in the PRD-segment and the service referred to by the RFR-segment (e.g. joins with, splits into).

Tag	Tag	Name	St	Rp	Frmt	Comments
9141		RELATIONSHIP TYPE CODE QUALIFIER	M	1	an..3	See code list B.4.9141. Value = 13
E941		RELATIONSHIP	C	1		
	9143	Relationship description code	C		an..3	Mandatory. See code list B.4.9143. Values = 6 = connecting to 7 = timing between services 8 = joining to 11 = splitting from 12 = number change 13 = disconnect
	1131	Code list identification code	C		an..3	Not applicable
	3055	Code list responsible agency code	C		an..3	Not applicable.
	9142	Relationship description	C		an..35	Not applicable

Example RLS+13+8'
= The service defined in the PRD segment joins with the service specified in the RFR segment.

Level 5 - Group 8 - TCE - Time and certainty

Function To specify the time and certainty of an event.

- Railway use**
- This segment may be used to specify the connection time and the characteristic of the connection.
 - If Gr8/RLS/E941/9143 = 7 (time between services), this segment is mandatory.

Tag	Tag	Name	St	Rp	Frmt	Comments
2380		DATE OR TIME OR PERIOD TEXT	C	1	an..35	Connection time expressed in minutes.
E946		CERTAINTY	C	1		
	4049	Certainty description code	C		an..3	Reliability of the connection. See code list B.4.4049. Values = 1, X02, X03, X04
	4048	Certainty description	C		an..35	Free-text description of the certainty.
	3453	Language name code	C		an..3	Language in which the characteristic is expressed. See code list ISO 639-1.
	3055	Code list responsible agency code	C		an..3	Not applicable.

Example

TCE+12+1'

= The connection time between the two services is 12 minutes. The connection is guaranteed.

Level 3 - Group 9 - ODI - Origin and destination details

Function To convey first the origin and then the final destination of a journey.

- Railway use**
- This segment triggers Group 9, which may be used to convey information related to a segment of a given travel service.
 - This segment specifies a travel segment.

Tag	Tag	Name	St	Rp	Frmt	Comments
3225		LOCATION NAME CODE	C	2	an..25	<ul style="list-style-type: none"> • Both occurrences are mandatory. • First and second location delimiting the travel segment See code list B.4.3225
1050		SEQUENCE POSITION IDENTIFIER	C	2	an..10	May be used to specify the sequence number of the locations in the itinerary. The first occurrence relates to the first location (3225), the second to the second one. Both occurrences are mandatory if the train service calls more than once at a given location (looping route).

Example ODI+8814001*8841004+2*5'

= The travel segment is delimited by Bruxelles-Midi (2nd location in the itinerary of the travel service) and Liège-Guillemins (5th location in the itinerary).

Level 4 - Group 9 - PDT - Product information

Function To specify details relating to a product such as configuration and availability.

Railway use This segment may be used to specify the category of the service for a given travel segment.

No more than one occurrence may be used. The segment is not used in case the service mode (7009/1) in PRD is coach group (value = 31).

Tag	Tag	Name	St	Rp	Frmt	Comments
7133		PRODUCT DETAILS TYPE CODE QUALIFIER	C	1	an..3	Not applicable
E996		PRODUCT CLASS DETAILS	C	26		Mandatory. One and only one occurrence of this composite is used.

Tag	Tag	Name	St	Rp	Frmt	Comments
	7037	Characteristic description code	C		an..17	Reservation status. See code list B.4.7037. Valid on the part of the itinerary indicated in the ODI segment.
	4510	Requested information description	C		an..35	Not applicable
	7161	Special service description code	C		an..3	Not applicable
	7009	Item description code	C		an..17	Mandatory. Service brand. See code list B.4.7009. Values corresponding to a service mode (3 to 37) are not allowed.
	7009	Item description code	C		an..17	Not applicable
	7009	Item description code	C		an..17	Not applicable
	7139	Product description identification code	C		an..3	Tariff mode. Valid on the part of the itinerary indicated in the ODI segment. See code list B.4.7139.

Example

PDT+ : : : 67 '

= The service runs as an inter-regional train on the specified travel segment.

Level 4 - Group 9 - IFT - Interactive free text

<i>Function</i>	To provide free form information.
<i>Railway use</i>	Not applicable.

Level 4 - Group 9 - TRF - Traffic restriction details

Function

To convey certain restrictions that apply to a travel-related object.

Railway use

This segment may be used to specify restrictions related to the travel segment.

Tag	Tag	Name	St	Rp	Frmt	Comments
E007		TRAFFIC RESTRICTION DETAILS	C	5		Mandatory. This composite may be used to specify travel restriction. Only one occurrence of this composite can be used.
	8015	Traffic restriction code	C		an..3	Mandatory. See code list B.4.8015.
	8017	Traffic restriction application code	C		an..3	Not applicable
	8035	Traffic restriction type code qualifier	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable

Example

TRF+1'

= Only boarding of passengers is allowed on the specified segment.

Level 4 - Group 9 - TFF - Tariff information

Function To specify tariff details related to a service or product.

Railway use This segment may be used to specify tariff information related to the travel segment.:
A mandatory rate type and, optionally, a passenger type

Tag	Tag	Name	St	Rp	Frmt	Comments
E982		TARIFF INFORMATION	C	99		Mandatory
	5263	Rate type identifier	C		an..20	Mandatory. See code list B.4.5263.

	6072	Frequency value	C		n..9	Frequency interval of the extra service.
	6411	Measurement unit code	C		an..3	Measure unit in which the frequency value is expressed. See code list B.4.6411. Values = MIN, HUR.
	6060	Quantity	C		an..35	
	3036	Party name	C		an..35	

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	C	99		One occurrence only. Definition of the availability period of the extra service. If omitted: always available during the operation period of the travel service. The availability period must fit within the period of operation of the travel service defined in segment POP
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 273
	2380	Date or time or period text	M		an..35	Period of availability. Format = yyyy-mm-dd/yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	May be used to specify the availability days, one day by character ("0" = not available, "1" = available), starting from the first day specified in the period of availability (2380).
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.). Not used if E013/4440 is used to specify the operation days

Example ASD+26++67 '
= A snack is served on Saturdays and Sundays.

Level 4 - Group 10 - SER - Facility information

Function To provide additional service information, followed by the period and days of operation.

Railway use

- This segment triggers Group 10, which may be used to specify information about facilities available with a given travel segment. This information can be repeated. Each SER segment specifies one and only one facility. Repeat as required (up to 99 times).

Tag	Tag	Name	St	Rp	Frmt	Comments
E965		FACILITIES	M	99		One and only one occurrence of this composite is used.

Tag	Tag	Name	St	Rp	Frmt	Comments
	9039	Facility type description code	C		an..3	Mandatory. See code list B.4.9039.
	9038	Facility type description	C		an..70	Not applicable

	7037	Characteristic description code	C		an..17	Reservation information concerning the facility. This information can be repeated. See code list B.4.7037. Values = 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28.
1229		ACTION REQUEST/NOTIFICATION DESCRIPTION CODE	C		an..3	Not applicable
6350		UNITS QUANTITY	C		n..15	Number of facilities available in the service
E013		DATE AND TIME INFORMATION	C	99		One occurrence only. Definition of the availability period of the facility. If omitted: always available during the operation period of the travel service. The availability period must fit within the period of operation of the travel service defined in segment POP
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 273.
	2380	Date or time or period text	M		an..35	Period of availability. Format = yyyy-mm-dd/yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	May be used to specify the availability days, one day by character ("0" = not available, "1" = available), starting from the first day specified in the period of availability (2380).

Tag	Tag	Name	St	Rp	Frmt	Comments
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.). Not used if E013/4440 is used to specify the operation days

Example SER+33::::2:13+273:1997-06-01/1997-09-30'

= From 1 June 1997 until 30 September 1997, 2 video coaches (33) wherein reservation is compulsory (13) are available with the specified travel segment.

Level 5 - Group 10 - ASD - Service details

Function To specify the time, date, location and additional characteristic information related to a service.

Railway use This segment may be used to specify any extra service available within a given facility. The ASD segment can describe only one service and cannot be repeated.

Tag	Tag	Name	St	Rp	Frmt	Comments
E959		SERVICE DETAILS	M	99		One occurrence only.
	7161	Special service, coded	M		an..3	Identification of the extra service. See code list B.4.7161.
	2002	Time value	C		n4	Extra service first time or additional first time (format = hhmm).
	2002	Time value	C		n4	Extra service last time or additional last time (format = hhmm).
	2000	Date value	C		an..14	Not applicable

3503		ACCESS AUTHORISATION IDENTIFIER	C	1	an..9	Not applicable

Example `ORG+0080+++EUROGARE'`

Level 0 - HDR - Header information

Function To specify header information applicable to the entire message.

Railway use This segment is used to convey delivery information (status, reference, dates and time, etc.).

Tag	Tag	Name	St	Rp	Frmt	Comments
4405		STATUS DESCRIPTION CODE	M	1	an..3	Delivery status. See code list B.4.4405. Values = 81, 21 or 113

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	M	4		The 4 occurrences of this composite may be used to specify the delivery's: <ul style="list-style-type: none"> • First date of validity • Date and time • Creation date • Release date The qualifier (2005) specifies which of these functions the data element 2380 has.
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Values = 11 = delivery date and time 45 = creation date and time 273 = first date of validity x = delivery release date
	2380	Date or time or period text	M		an..35	The following formats are to be used: <ul style="list-style-type: none"> • delivery date/time and creation date/time: yyyy-mm-ddThhmm • first date of validity: yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable
1154		REFERENCE IDENTIFIER	C	1	an..35	Delivery reference number. Mandatory if the message contains an update to a previous delivery or if it contains a complete delivery that may be the subject of subsequent update messages. Absent in all other cases.
4440		FREE TEXT VALUE	C	1	an..51 2	Delivery free format reference
7135		PRODUCT IDENTIFIER	C	2	an..35	Not applicable
3453		LANGUAGE NAME CODE	C	1	an..3	See code list ISO 639-1.

Example HDR+81+273:1996-09-29/1997-05-31*11:1996-07-20T1422*45:1996-07-20T1422+0003'

Level 1 - IFT - Interactive free text

<i>Function</i>	To provide free-form information.
<i>Railway use</i>	Not applicable

Level 1 - RFR - Reference

Function To specify a reference.

Railway use An occurrence of the RFR segment must be present if the message contains an update to a previous delivery. It shall refer to that previous delivery. As such, it enables the recipient to check the chain of updates and to identify the delivery for which this message is an update. In all other cases the segment must be absent.

Tag	Tag	Name	St	Rp	Frmt	Comments
E506		REFERENCE	M	1		
	1153	Reference function code qualifier	M		an..3	See code list B.4.1153 .Value = AGX
	1154	Reference identifier	C		an..35	Mandatory. Reference of the previous delivery.
	1156	Document line identifier	C		an..6	Not applicable
	4000	Reference version number	C		an..35	Not applicable
	3036	Party name	C		an..35	Not applicable

Example RFR+AGX:0002'

Level 1 - CNY - Country Information

Function To specify country-related information : date and time of summer or winter time transition and related time variation, currency and language(s).

Railway use At this level, the segment defines the country applicable for all locations listed thereafter.

Tag	Tag	Name	St	Rp	Frmt	Comments
3207		COUNTRY CODED	M	1	an..3	See code list ISO 3166.
E013		DATE AND TIME INFORMATION	C	2		Both occurrences may be used: the first to specify starting date of summer time and the second, the starting date of the wintertime.
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 88 or 98
	2380	Date or time or period text	M		an..35	Date in format: yyyy-mm-dd

Tag	Tag	Name	St	Rp	Frmt	Comments
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable
2705		TIME VARIATION QUANTITY	C	2	n..3	Both occurrences may be used: the first to specify the time variation expressed in hours at the start of summer time and the second, the variation at start of winter time.
6345		CURRENCY IDENTIFICATION CODE	C	1	an..3	Currency of the country. See ISO code 4217.
3453		LANGUAGE NAME CODE	C	9	an..3	Official language(s) used in the country. See code list ISO 639-1

Example CNY+BE+88:1998-03-28*98:1998-09-27+1*1'

Level 1 - TIZ - Time Zone Information

Function To provide information about a time zone.

Railway use At this level, the segment defines the default time zone applicable to all locations listed thereafter.

Tag	Tag	Name	St	Rp	Frmt	Comments
E034		TIME ZONE	M	1		
	2029	Time zone identifier	M		an..3	Identification of time zone. See code list B.4.2029.
	2020	Time zone difference value	C		n..4	Time variation toward GMT expressed in hours.

Example TIZ+WET:1'

Level 1 - LNG - Language

Function To specify a language..

Railway use At this level, the segment defines the default language applicable to all locations listed thereafter.

Tag	Tag	Name	St	Rp	Frmt	Comments
3455		LANGUAGE QUALIFIER	M	1	an..3	Type of language. See code list B.4.3455.
E508		LANGUAGE DETAILS	C	1		
	3453	Language name code	C		an..3	See code list ISO 639-1.
	3452	Language name	C		an..35	Not applicable

Example LNG+6+FR'

Level 1 - Group 1 - ERI - Application error information

Function To identify the type of application error within a message.

Railway use

- This segment triggers Group 1, which may be used by the data recipient to signal errors in the delivery message.
- The segment is used to indicate the type of error occurring.

Tag	Tag	Name	St	Rp	Frmt	Comments
E901		APPLICATION ERROR DETAILS	M	1		
	9321	Application error code	M		an..8	See code list B.4.9321
	1131	Code list identification code	C		an..3	Not applicable
	3055	Code list responsible agency code	C		an..3	Not applicable

Example

Level 2 - Group 1 - RFR - Reference

Function To specify a reference.

Railway use This segment may be used to indicate the position in the message where the error has occurred. Its use must be discussed.

Tag	Tag	Name	St	Rp	Frmt	Comments
E506		REFERENCE	M	1		
	1153	Reference function code qualifier	M		an..3	See code list. B.4.1153. Value = AWL

Tag	Tag	Name	St	Rp	Frmt	Comments
	1154	Reference identifier	C		an..35	Mandatory. Reference to the position of the error in the message.
	1156	Document line identifier	C		an..6	Not applicable
	4000	Reference version number	C		an..35	Not applicable
	3036	Party name	C		an..35	Not applicable

Example

Level 2 - Group 1 - IFT - Interactive free text

Function To provide free-form information.

Railway use This segment may be used to give a textual description of the error. Its use needs to be discussed.

Tag	Tag	Name	St	Rp	Frmt	Comments
E971		FREE TEXT QUALIFICATION	C	1		
	4451	Text subject code qualifier	M		an..3	See code list B.4.4451. Value = AAO
	4473	Information type code	C		an..4	Not applicable
	4405	Status description code	C		an..3	Not applicable
	3036	Party name	C		an..35	Not applicable
	3453	Language name code	C		an..3	See code list ISO 639-1
4440		FREE TEXT VALUE	C	99	an..51 2	Mandatory. Textual description of the error. Only one occurrence of the data element is used.

Example IFT+AAO:::EN+DEPARTURE TIME MISSING'

Level 1 - Group 2 - ALS - Additional Location Information

Function To identify a location and specify its geographical co-ordinates.

Railway use

- This segment triggers Group 2, which specifies static information about locations.
- All stations, included border stations, must be indicated with their appropriate LOCATION FUNCTION CODE QUALIFIER.

Tag	Tag	Name	St	Rp	Frmt	Comments
3227		LOCATION FUNCTION CODE QUALIFIER	M	1	an..3	See code list B.4.3227.
E975		LOCATION	M	1		
	3225	Location name code	C		an..25	Mandatory. See code list B.4.3225
	3224	Location name	C		an..70	Mandatory. Name of the location.

Tag	Tag	Name	St	Rp	Frmt	Comments
	3207	Country name code	C		an..3	Not applicable
	3227	Location function code qualifier	C		an..3	Not applicable
6000		LATITUDE VALUE	C	1	an..10	Mandatory. To specify the value of latitude, the angular distance, measured in degrees, minutes, and seconds, north or south from the equator (system WGS84). Format = ddmssx dd = degrees mm = minutes ss = seconds x = N (North) or S (South)
6002		LONGITUDE VALUE	C	1	an..11	Mandatory. To specify the value of longitude i.e. the angular distance east or west on the earth's surface, measured by the angle and expressed in degrees, minutes, and seconds, which the meridian passing through a particular place makes with a standard or prime meridian (system WGS84). Format = ddmssx dd = degrees mm = minutes ss = seconds x = E (East) or W (West)

Example ALS+008814002:BRUXELLES MIDI

Level 2 - Group 2 - ADS - Address

Function To specify an address.

Railway use This segment may be used to specify the location address.

Tag	Tag	Name	St	Rp	Frmt	Comments
E817		ADDRESS USAGE	C	1		
	3299	Address purpose code	C		an..3	Not applicable
	3131	Address type code	C		an..3	See code list B.4.3131. Value=1
	3475	Address status code	C		an..3	See code list B.4.3475. Value=2
E001		ADDRESS DETAILS	C	1		
	3477	Address format code	M		an..3	See code list B.4.3477. Value = 5

Example ADS+:1:2+5:48 AVENUE FONSNY+BRUSSELS+1060+BE'

Level 2 - Group 2 - POP - Period of operation

Function To specify the date or time period with days of operation.

Railway use This segment has 9 occurrences to specify a period of operation (first and last date, days in the week), opening hours, and minimum connection time.

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	M	1		
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Values 87 = minimum connection time 273 = period of operation or first date of validity 748 = opening hours
	2380	Date or time or period text	M		an..35	Formats: Period of operation: yyyy-mm-dd/yyyy-mm-dd First date of validity: yyyy-mm-dd Connection time: hhmm Opening hours: hhmm/hhmm
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.) on which the service operates.
4405		STATUS DESCRIPTION CODE	C	1	an..3	Not applicable

Example POP+273:1997-09-29/1998-05-31++1234567'

Level 2 - Group 2 - CON - Contact Information

Function To specify contact communication numbers and names.

Railway use THIS SEGMENT MAY BE USED TO PROVIDE THE PHONE NUMBER, FAX NUMBER, TELEX NUMBER AND E-MAIL ADDRESS, (IN THAT ORDER), OF THE SERVICE LOCATION ADMINISTRATOR.

Tag	Tag	Name	St	Rp	Frmt	Comments
E966		CONTACT INFORMATION	C	20		
	3035	Party function code qualifier	M		an..3	Person, bureau or other instance that keeps the specified communication number. See code list B.4.3035.
	3148	Communication number	M		an..512	Phone number, fax number, telex and e-mail address (in that order).
	3153	Communication medium type code	C		an..3	See code list B.4.3153. Value = TE, FX, TL or EM
	3036	Party name	C		an..35	Not applicable
	1154	Reference identifier	C		an..35	Not applicable

Example CON+WF:3225259152:TE*WF:3225252952:FX*WF:EDIFER@INFOBOARD.BE:EM'

The information desk's (WF) telephone (TE), fax (FX) and e-mail (EM) numbers/addresses

Level 2 - Group 2 - TRF - Traffic restriction details

Function To convey certain restrictions that apply to a travel-related object.

Railway use THIS SEGMENT MAY BE USED TO SPECIFY RESTRICTIONS RELATED TO THE LOCATION.

Tag	Tag	Name	St	Rp	Frmt	Comments
E007		TRAFFIC RESTRICTION DETAILS	C	5		Mandatory
	8015	Traffic restriction code	C		an..3	Mandatory. See code list B.4.8015.
	8017	Traffic restriction application code	C		an..3	Not applicable
	8035	Traffic restriction type code qualifier	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable

Example TRF+1'

Level 2 - Group 2 - CNY - Country Information

Function To specify country-related information: date and time of summer or winter time transition and related time variation, currency and language(s).

Railway use At this level, the segment defines the country if different from the default country specified in the segment CNY (level 1).

Tag	Tag	Name	St	Rp	Frmt	Comments
3207		COUNTRY CODED	M	1		See code list ISO 3166.
E013		DATE AND TIME INFORMATION	C	2		Both occurrences may be used: the first to specify the starting date of summer time and the second the starting date of the wintertime.
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 88 or 98
	2380	Date or time or period text	M		an..35	Date in format: yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable
2705		TIME VARIATION	C	2	n..3	Both occurrences may be used: the first to specify the time variation expressed in hours at the start of summer time and the second the variation at the start of winter time.
6345		CURRENCY IDENTIFICATION CODE	C	1	an..3	Currency of the country. See code list ISO code 4217..
3453		LANGUAGE NAME CODE	C	9	an..3	Official language(s) used in the country. See code list ISO 639-1

Example CNY+BE+88:1998-03-28*98:1998-09-27+1*1'

Level 2 - Group 2 - TIZ - Time Zone Information

Function To provide information about a time zone.

Railway use At this level, the segment defines the time zone if different from the default time zone specified in the segment TIZ at level 1.

Tag	Tag	Name	St	Rp	Frmt	Comments
E034		TIME ZONE	M	1		
	2029	Time zone identification	M		an..3	Identification of time zone. See code list B.4.2029..

Tag	Tag	Name	St	Rp	Frmt	Comments
	2020	Time zone difference value	C		n..4	Time variation toward GMT expressed in hours.

Example TIZ+WET:1'

Level 2 - Group 2 - LNG - Language

Function To specify a language.

Railway use At this level, the segment defines the default language if different from the default language specified in the segment LNG at level 1.

Tag	Tag	Name	St	Rp	Frmt	Comments
3455		LANGUAGE QUALIFIER	M	1	an..3	Type of language. See code list B.4.3455.
E508		LANGUAGE DETAILS	C	1		
	3453	Language name code	C		an..3	See code list ISO 639
	3452	Language name	C		an..35	Not applicable

Example LNG+6+EN'

Level 2 - Group 2 - SER - Facility information

Function To provide additional service information, followed by the period and days of operation.

Railway use THIS SEGMENT MAY BE USED TO SPECIFY MEANS OF TRANSPORT ALLOWING THE TRAVELLER TO CONTINUE HIS JOURNEY AND AVAILABLE AT THIS LOCATION.

Tag	Tag	Name	St	Rp	Frmt	Comments
E965		FACILITIES	M	99		
	9039	Facility type description code	C		an..3	Mandatory. See code list B.4.9039.
	9038	Facility type description	C		an..70	Not applicable
	7133	Product details type code qualifier	C		an..3	Not applicable
	7037	Characteristic description code	C		an..17	Not applicable
1229		ACTION REQUEST/NOTIFICATION DESCRIPTION CODE	C		an..3	Not applicable
6350		UNITS QUANTITY	C		n..15	Not applicable
E013		DATE AND TIME INFORMATION	C	99		Not applicable
	2005	Date or time or period function code qualifier	M		an..3	Not applicable

Tag	Tag	Name	St	Rp	Frmt	Comments

	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	Not applicable

Example SER+101 '
Metro connection

Level 2 - Group 2 - IFT - Interactive free text

Function To provide free-form information.

Railway use This segment may be used to specify additional location names, e.g. names/alias names in other languages, or names that are restricted in length.

Tag	Tag	Name	St	Rp	Frmt	Comments
E971		FREE TEXT QUALIFICATION	C	1		
	4451	Text subject code qualifier	M		an..3	See code list B.4.4451. Value = AGW, X02
	4473	Information type code	C		an..4	Not applicable
	4405	Status description code	C		an..3	Not applicable
	3036	Party name	C		an..35	Not applicable
	3453	Language name code	C		an..3	See code list ISO 639-1
4440		FREE TEXT VALUE	C	99	an..51 2	Mandatory. Name of the location in the language specified in 3453. When element E971/4451 is set to X02 (Location short name), the length of location must not exceed 17 characters.

Example IFT+AGW::::FR+AIX LA CHAPELLE'
IFT+AGW::::NL+AKEN'

Level 2 - Group 3 - ASD - Service details

Function To specify the time, date, location and additional characteristic information related to a service.

Railway use

- This segment triggers the Group 3, which specifies service available in the Service Location.
- This segment may be used to identify a service

The ASD segment can describe only one service. Repeat the segment as required (up to 99 times).

Tag	Tag	Name	St	Rp	Frmt	Comments
E959		SERVICE DETAILS	M	99		One occurrence only.
	7161	Special service, coded	M		an..3	Identification of the extra service. See code list B.4.7161.
	2002	Time value	C		n4	Extra service first time or additional first time (format = hhmm).
	2002	Time value	C		n4	Extra service last time or additional last time (format = hhmm).

Tag	Tag	Name	St	Rp	Frmt	Comments
E013		DATE AND TIME INFORMATION	C	99		One occurrence only. Definition of the availability period of the extra service. If omitted: always available.
	2005	Date or time or period function code qualifier	M		an..3	See code list B.4.2005. Value = 273
	2380	Date or time or period text	M		an..35	Period of availability. Format = yyyy-mm-dd/yyyy-mm-dd
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	String data representation of local day(s) of the week (Monday = 1, Tuesday = 2, etc.).

Example ASD+26++67 '
= A snack is served on Saturdays and Sundays.

Level 3 - Group 3 - CON - Contact Information

Function To specify contact communication numbers and names.

Railway use THIS SEGMENT MAY BE USED TO PROVIDE THE PHONE AND FAX NUMBER OF THE SERVICE PROVIDER.

Tag	Tag	Name	St	Rp	Frmt	Comments
E966		CONTACT INFORMATION	C	20		
	3035	Party function code qualifier	M		an..3	See code list B.4.3035. Value = HN
	3148	Communication number	M		an..512	Phone number and fax number
	3153	Communication medium type code	C		an..3	See code list B.4.3153. Value = TE or FX
	3036	Party name	C		an..35	Not applicable
	1154	Reference identifier	C		an..35	Not applicable

Example CON+HN:3225252989:TE '

Level 2 - Group 4 - PRD - Product identification

Function To identify a minimum connection time between undertakings and/or products in one location.

Railway use This segment may be used to provide the minimum connecting time between different railway undertakings and /or products operated by them within one station. One station is determined by a unique location code identifier.

Tag	Tag	Name	St	Rp	Frmt	Comments
E989		PRODUCT IDENTIFICATION DETAILS	C	9		
	7135	Product identifier	C		an..35	Not applicable
	7037	Characteristic description code	C		an..17	Not applicable
	7139	Product characteristic identification code	C		an..3	Not applicable
	7009	Item description code	C		an..17	Train type or Brand name of the delivering service. See code list B.4.7009
	7009	Item description code	C		an..17	Train type or Brand name of the receiving service. See code list B.4.7009
	7009	Item description code	C		an..17	Not applicable
	9608	Product name	C		an..35	The minimum connection time between these services. Format: Connection time: hhmm
3036		PARTY NAME	C	6	an..35	1. Service provider of the delivering service. Use the code list B.4.3039 2. Service provider of the receiving service. Use the code list B.4.3039.

Example PRD+:::::8:11:::0010:+1080*1088'

Minimum connecting time between a DB high-speed train and a SNCB regional train of 10 minutes.

Level 3 - Group 4 - SER - Facility information

Function To provide additional service information to a minimum connection time between undertakings and/or products in one location..

Railway use This segment specifies information about properties of location connections (e.g. if they are accessible for wheelchair users). There is only one occurrence of this segment within Group 4.

Tag	Tag	Name	St	Rp	Frmt	Comments
E965		FACILITIES	M	99		
	9039	Facility type description code	C		an..3	Mandatory. See code list B.4.9039.
	9038	Facility type description	C		an..70	Not applicable
	7133	Product details type code qualifier	C		an..3	Not applicable
	7037	Characteristic description code	C		an..17	Not applicable
1229		ACTION REQUEST/NOTIFICATION DESCRIPTION CODE	C		an..3	Not applicable.
6350		UNITS QUANTITY	C		n..15	Not applicable.
E013		DATE AND TIME INFORMATION	C	99		Not applicable.
	2005	Date or time or period function code qualifier	M		an..3	Not applicable.
	2380	Date or time or period text	M		an..35	Not applicable.
	2379	Date or time or period format code	C		an..3	Not applicable
	4440	Free text value	C		an..51 2	Not applicable.
2160		DAYS OF WEEK SET IDENTIFIER	C	1	an..7	Not applicable.

Example SER+28'

= The connection is accessible by wheelchairs.

If the value 28 of the code list B.4.9039 is used, the concerned link has to be recognized as wheelchair accessible and the corresponding minimum connection time is valid for wheelchair users. A second link may be defined in Level 2 - Group 4 - PRD for the connection time for non-wheelchair passengers.

Level 3 - Group 4 - FRQ - Frequency

Function	To provide details of frequencies.
Railway use	Not applicable

Level 3 - Group 4 - IFT - Interactive free text

<i>Function</i>	To provide free-form information.
<i>Railway use</i>	Not applicable

Level 3 - Group 4 - POR - Location and/or related time information

<i>Function</i>	To provide information about a location relating to a service in the following sequence: arrival time, departure time, arrival sub-location and departure sub-location, traffic restrictions.
<i>Railway use</i>	Not applicable

DRAFT

Level 2 - Group 5 - RFR - Reference

Function To specify a reference.

Railway use This segment triggers Group 5. It is used to identify a location reference related to the location described in ALS.

The relationship between locations is given by element 1153. This can be:

- Where 1153 = X01, element 1154 contains a reservation identifier for the ALS location (1153 = X01). In this case the remaining segments of Group 5 (MES and RLS) are not used.
- Where element 1153 = AWN, element 1154 contains the timetable identifier of a location (location name code) to which the location described in ALS is related. In this case element RLS/E941/9143 is used to specify further the type of relationship which can be:
 - 9143 = 6: There is the possibility to transfer from one location to the other in a given time (specified in segment MES).
 - 9143 = 14: The location is part of a group headed by the ALS location (e.g., stations in a tariff zone)

Tag	Tag	Name	St	Rp	Frmt	Comments
E506		REFERENCE	M	1		
	1153	Reference function code qualifier	M		an..3	See code list B.4.1153. Values: AWN: location name code X01: reservation identifier
	1154	Reference identifier	C		an..35	Mandatory. Reference to a location name code (1153 = AWN) or reference to a reservation identifier (1153 = X01)
	1156	Document line identifier	C		an..6	Not applicable
	4000	Reference version number	C		an..35	Not applicable
	3036	Party name	C		an..35	Not applicable

Example RFR+AWN:008711300'
= Reference to location 008711300, which is 'PARIS EST'

Level 3 - Group 5 - MES - Measurements

Function To specify physical measurements, including dimension tolerances, weights and counts.

- Railway use**
- This segment may be used to specify the transfer time and the distance to the location referenced in Gr5/RFR from the specified location **in Gr2/ALS**.
 - Only one occurrence of E175 for transfer time (value MIN for 6411) and only one occurrence for distance (value MTR) is allowed.
 - The reference is unidirectional, i.e. it describes not the distance from the location referenced in RFR segment to the specified location.¹

Tag	Tag	Name	St	Rp	Frmt	Comments
E175		MEASUREMENT VALUE AND DETAILS	M	9		
	6314	Measurement value	M		n..18	Transfer time or distance.
	6411	Measure unit code	C		an..3	Mandatory. Unit of measurement. See code list B.4.6411. Values = MIN, MTR. At least the measurement in minutes (MIN) has to be given.
	6313	Measurement dimension, coded	C		an..3	Not applicable.
	6321	Measurement significance code	C		an..3	Not applicable. "Exact value" assumed.

Example

MES+10:MIN*125:MTR'

= The distance from the given location to the location referenced in RFR is 125 m, the transfer time between the locations is 10 Minutes.

¹ There are a number of locations where the transfer time from the first to the second differs to the transfer time from the second to the first.

Level 3 - Group 5 - RLS - Relationship

Function To identify the direct relationship between the data/information contained in one segment and the data/information contained in one or more other segments.

Railway use This segment identifies the relationship between the locations defined in Group1/ALS and Group5/RFR. The valid relationships are:

- Pedestrian link between two stations
- Grouping of stations
- Connection between a tourism location and a stations

This segment is mandatory in Group 5 unless Group5/RFR/1153 identifies the reference to be a reservation identifier (X01).

The segment is mandatory in case of stations with more than one location name code to link them by pedestrian links (e.g. border stations with two infrastructure managers)

Tag	Tag	Name	St	Rp	Frmt	Comments
9141		RELATIONSHIP TYPE CODE QUALIFIER	M	1	an..3	See code list B.4.9141. Value = 13
E941		RELATIONSHIP	C	1		
	9143	Relationship description code	C		an..3	Mandatory. See code list B.4.9143. Values = 6 or 14
	1131	Code list identification code	C		an..3	Not applicable
	3055	Code list responsible agency code	C		an..3	Not applicable.
	9142	Relationship description	C		an..35	Not applicable

Example RLS+13+14'

The location specified in the RFR segment is a child of (belongs to) the location specified in the ALS segment

Allowed combinations of location references

Location A Function of the location (ALS/E975/3227) to which reference is made in segment RFR	Relationship code (RLS/E941/9143)	Location B Function of the location defined in segment ALS (ALS/E975/3227)	Remarks
29 (station)	6 (pedestrian link)	29 (station)	Pedestrian link (from B to A)
29 (station)	14 (is part of)	26 (city/meta station)	A belongs to the grouping of locations B
29 (station)	14 (is part of)	29 (station)	A is a substation of B
250 (tourism location)	6 (connect to)	29 (station)	A is a tourism location accessible via station B.

Constraints:

- The location hierarchy defined in the table above consists of 3 levels:
 1. substation (ALS/E975/3227 = 29)
 2. (main) station (ALS/E975/3227 = 29)
 3. grouping of stations (City) (ALS/E975/3227 = 26)

A station cannot be at the same time „substation“ and „main station“, nor can it be at the same time „station“ and „grouping of stations (city)“.

- A grouping of stations (city) (ALS/E975/3227 = 26) cannot be referenced by trains.
- A grouping of stations (city) (ALS/E975/3227 = 26) cannot be referenced by (pedestrian) links.

Example of related locations translated in group 2 of the TSDUPD message (the code values are fictitious):

ALS+29+008727101:Paris Eurostar'	Nord	Definition of the Eurostar terminal in Paris Nord
RFR+AWN:008727103'		Reference to Paris Nord Banlieue
MES+5:MIN'		The time needed to transfer from Paris Nord Eurostar to Paris Nord Banlieue is 5 minutes
RLS+13+6'		There is a (pedestrian) connection from Paris Nord Eurostar to Paris Nord Banlieue
ALS+29+008727102:Paris Nord Grandes Lignes'		Definition of the Grandes Lignes (sub)station in Paris Nord
ALS+29+008727103:Paris Banlieue'	Nord	Definition of the Banlieue (sub)station in Paris Nord
RFR+AWN:008727101'		Reference to Paris Nord Eurostar
MES+10:MIN'		The time needed to transfer from Paris Nord Banlieue to Paris Nord Eurostar is 10 minutes
RLS+13+6'		There is a (pedestrian) connection from Paris Nord Banlieue to Paris Nord Eurostar
ALS+29+008727100:Paris Nord'		Definition of station Paris Nord
RFR+AWN:008727101'		Reference to Paris Nord Eurostar
RLS+13+14'		Paris Nord Eurostar is a child of Paris Nord
RFR+AWN:008727102'		Reference to Paris Nord Grandes Lignes
RLS+13+14'		Paris Nord Grandes Lignes is a child of Paris Nord
RFR+AWN:008727103'		Reference to Paris Nord Banlieue
RLS+13+14'		Paris Nord Banlieue is a child of Paris Nord
ALS+26+008775000:Paris'		Definition of the city of Paris
RFR+AWN:008727100'		Reference to Paris Nord
RLS+13+14'		Paris Nord is a child of the city of Paris

Level 4 - Group 6 - PRD - Product identification

Function To identify a minimum connection time between undertakings and/or products between two locations.

Railway use This segment may be used to provide the minimum connecting time between different railway undertakings and /or products operated by them. This item has to be used to specify the minimum connecting time between two locations with different location codes. The minimum connecting time is specified in Level 3 - Group 5 – MES.

Tag	Tag	Name	St	Rp	Frmt	Comments

RFR+AWN: 008814001 '
MES+10:MIN '
RLS+13+6 '
PRD+:::8:8:+0019*1080'

These elements specify the minimum connecting time of 10 minutes between a Eurostar high speed train and a DB high-

speed train between Brussels Midi Eurostar terminal and Brussels-Midi.

Level 4 - Group 6 - POP - Period of operation

Function To specify the date or time period with days of operation.

Railway use This segment is used to specify a period of operation (first and last date, days in the week) or the opening hours of a location connection. It shall only exist for location connections (Gr.5/RLS/E941/9143 = 6 (pedestrian link)). There is only one occurrence of this segment within Group 6.

Example

SER+28'

= The location connection is accessible by wheelchairs.

If the value 28 of the code list B.4.9039 is used, the concerned link has to be recognized as wheelchair accessible and the corresponding minimum connection time is valid for wheelchair users. A second link may be defined for the connection time for non-wheelchair passengers.

Calculation rules for minimum connection time within one location

For the calculation of the minimum connection time within a location (e.g. a train station) the following rules have to be applied:

1. If a specific minimum connection time for the pair of delivering/receiving services is defined in SKDUPD - Level 5 - Group 8 - TCE - Time and certainty, then this time has to be applied for the minimum connection time between two services
2. If a specific minimum connection time between the train type or brand name of the delivering railway undertaking service and the train type/brand name of the receiving railway undertaking service is defined in TSDUPD - Level 2 - Group 4 - PRD, then this time has to be applied for the minimum connection time.
3. If a specific minimum connection time between the train type or brand name of the delivering service and the train type/brand name of the receiving service is defined in TSDUPD - Level 2 - Group 4 - PRD - not taking into account the railway undertaking -, then this time has to be applied for the minimum connection time.

4. If a specific minimum connection time between the delivering railway undertaking service and the receiving railway undertaking service is defined TSDUPD - Level 2 - Group 4 - PRD, then this time has to be applied for the minimum connection time.
5. Otherwise the default minimum connection time defined in TSDUPD - Level 2 - Group 2 - POP - Period of operation has to be applied.

Calculation rules for minimum connecting time between two locations

For the calculation of the minimum connection time between two locations (e.g. a train stations) the following rules have to be applied:

1. If a specific minimum connection time between the train type or brand name of the delivering railway undertaking services and the train type/brand name of the receiving railway undertaking services is defined in TSDUPD - Level 4 - Group 6 - PRD, then this time has to be applied for the minimum connection time.
2. If a specific minimum connection time between the train type or brand name of the delivering service and the train type/brand name of the receiving service is defined in TSDUPD - Level 4 - Group 6 – PRD – not taking into account the railway undertaking -, then this time has to be applied for the minimum connection time.
3. If a specific minimum connection time between the delivering railway undertaking services and the receiving railway undertaking services is defined TSDUPD - Level 4 - Group 6 - PRD, then this time has to be applied for the minimum connection time.
4. If a specific minimum connection time between two stations is defined Level 3 - Group 5 - MES - Measurements, then this time has to be applied for the minimum connection time.
5. Otherwise no minimum connection time can be applied.

These locations have to be linked by an element Level 2 - Group 5 - RFR – Reference.

Responsibilities for the maintenance of Minimum connection times

The minimum connection times have to be maintained by the following parties:

	<i>Minimum connection time</i>	<i>Element(s)</i>	<i>Responsible party</i>	<i>Mandatory/Optional</i>
Within one location	Default minimum connection time within a station	TSDUPD - Level 2 - Group 2 - POP - Period of operation	Railway undertakings	Optional
	specific minimum connection time determined by train type/brand name of the involved undertakings	TSDUPD - Level 2 - Group 4 - PRD	Railway undertakings on bilateral agreements. Each undertaking has to specify the minimum connection time for his role as delivering railway undertaking and the role of the partner undertaking as receiving undertaking.	Optional
	specific minimum connection time determined by the involved train types or brand names	TSDUPD - Level 2 - Group 4 - PRD	Railway undertakings	Optional

	specific minimum connection time determined by the involved undertakings	TSDUPD - Level 2 - Group 4 - PRD	Railway undertakings on bilateral agreements. Each undertaking has to specify the minimum connection time for his role as delivering railway undertaking.	Optional
Between two locations	minimum connection time between two stations	Level 2 - Group 5 - RFR – Reference Level 3 - Group 5 - MES - Measurements	Railway undertakings	Optional
	specific minimum connection time determined by train type/brand name of the involved undertakings	TSDUPD - Level 4 - Group 6 - PRD	Railway undertakings on bilateral agreements. Each undertaking has to specify the minimum connection time for his role as delivering railway undertaking.	Optional
	specific minimum connection time determined by the involved train types or brand names	TSDUPD - Level 4 - Group 6 - PRD	Railway undertakings	Optional
	specific minimum connection time determined by the involved undertakings	TSDUPD - Level 4 - Group 6 - PRD	Railway undertakings on bilateral agreements. Each undertaking has to specify the minimum connection time for his role as delivering railway undertaking.	Optional

Level 1 - Group 7 - NME - Name

Function To identify the name of a person or entity.

- Railway use*
- This segment triggers Group 7, which provides information about a party.
 - This segment is used to identify and qualify a party.

Tag	Tag	Name	St	Rp	Frmt	Comments
E012		NAME INFORMATION	M	9		
	3035	Party function code qualifier	M		an..3	See code list B.4.3035. Value = DDO

	3224	Location name	C		an..70	Not applicable

Example ADS+:1:2+5:48 AVENUE FONSNY+BRUSSELS+1060+BE'

Level 2 - Group 7 - CON - Contact Information

Function To specify contact communication numbers and names.

Railway use THIS SEGMENT MAY BE USED TO PROVIDE THE COMMUNICATION NUMBER RELATED TO THE PARTY

Tag	Tag	Name	St	Rp	Frmt	Comments
E966		CONTACT INFORMATION	C	20		
	3035	Party function code qualifier	M		an..3	Person, bureau or other instance that keeps the specified communication number. See code list B.4.3035.
	3148	Communication number	M		an..512	Phone number, fax number, telex and e-mail address in that order.
	3153	Communication medium type code	C		an..3	See code list B.4.3153. Value = TE, FX, TL or EM
	3036	Party name	C		an..35	Not applicable

	1154	Reference identifier	C		an..35	Not applicable
--	------	----------------------	---	--	--------	----------------

Example CON+WF:3225253496:FX'

Level 2 - Group 8 - RFR - Reference

Function To specify a reference.

- Railway use*
- This segment triggers Group 8, used to refer to a party to which the party described in NME is related.
 - This segment gives the identification of the related party.

Tag	Tag	Name	St	Rp	Frmt	Comments
E506		REFERENCE	M	1		
	1153	Reference function code qualifier	M		an..3	See code list B.4.1153. Value = AWO
	1154	Reference identifier	C		an..35	Mandatory.
	1156	Document line identifier	C		an..6	Not applicable
	4000	Reference version number	C		an..35	Not applicable
	3036	Party name	C		an..35	Not applicable

Example RFR+AWO:0087'

Level 3 - Group 8 - RLS - Relationship

Function To identify the direct relationship between the data/information contained in one segment and the data/information contained in one or more other segments.

Railway use This segment identifies the relationship between the party defined in the NME segment and the party referred to by the RFR segment

Tag	Tag	Name	St	Rp	Frmt	Comments
9141		RELATIONSHIP TYPE CODE QUALIFIER	M	1	an..3	See code list B.4.9141. Value = 13.
E941		RELATIONSHIP	C	1		
	9143	Relationship description code	C		an..3	Mandatory. See code list B.4.9143.
	1131	Code list identification code	C		an..3	Not applicable
	3055	Code list responsible agency code	C		an..3	Not applicable.
	9142	Relationship description	C		an..35	Not applicable

Example RLS+13+

Level 0 - UIT - Interactive message trailer

Function To end and check the completeness of a message.

Tag	Tag	Name	St	Rp	Frmt	Comments
0340		INTERACTIVE MESSAGE REFERENCE NUMBER	C	1	an..35	Mandatory. The value shall be identical to the value in 0340 in the corresponding UIH segment
0074		NUMBER OF SEGMENTS IN A MESSAGE	C	1	n..10	Mandatory. Number of segments, including UIH and UIT

Example UIT+1+8'
