TAF TSI Compliance Results – CEF Grant Agreement INEA/CEF/TRAN/M2015/1138222

To whom it may concern,

I confirm and certify herewith that the TAF TSI functionalities implemented by the company Železničná spoločnosť Cargo Slovakia (Slovakia) within the Action “*Implementation of the technical interoperability for TAF TSI subsystem at ZSSK CARGO*”, co-financed by the Connecting Europe Facility Fund, are compliant with the appropriate provisions of the TAF-TSI Regulation No. 1305/2014 and its Technical Documents.

Details of the Action:

Name of the Action:	Implementation of the technical interoperability for TAF TSI subsystem at ZSSK CARGO
No. of the Action:	2015-SK-TM-0080-W
No. of the Grant Agreement:	INEA/CEF/TRAN/M2015/1138222
Duration of the Action:	2017-2019
Verified Activity:	TAF TSI Implementation – Phase 2 (Activity 2)
Verified TAF TSI Functionalities:	Common Interface, Reference Files, Rolling Stock Reference Databases

The results of the verification process are concluded as follows:

Železničná spoločnosť Cargo Slovakia has sent to the European Union Agency for Railway on 21 January 2019 follofinw attached deliverable datasets for verification:

TAF TSI function / specification	File name
Common Interface - Description and version	RNE_CCS_USER AGREEMENT.pdf to demonstarte the usage of the RNE supported version of Common Interface 2.0.5
Common Reference Data	Screen shots from the Common Interface do demonstrate the usage of reference codes for Company, Country, Primary Location, Subsidiary Location and Subsidiary Location Type
Rolling Stock Reference Database messages	RollingStockDatasetQueryMessage_sample_001.xml and RollingStockDatasetMessage_sample_001.xml
XSD schema file for the deelopment of above Rolling Stock Reference Database messages	TAF XSD file v2.2.2

1)

It is visible from above PDF document that Železničná spoločnosť Cargo Slovakia uses the Common Interface (CI) as hosted at RNE (screenshots, list of users / countries / ... , etc). This CI is compliant with TAF TSI as already attested in the CI compliance report „compliance_report_-_ccg_now_rne_common_interface_reference_implementation_v1.1.pdf“ at <https://www.era.europa.eu/node/641/6> .

2)

The Screen shot files (generated from the Common Reference Data set hosted at RailNetEurope and containing company/country/location codes) have the content needed to operate the CI and to send TAF compliant XML messages (such as your “ RollingStockDatasetQueryMessage_sample_001.xml” and “ RollingStockDatasetMessage_sample_001.xml”).

3)

The TAF XML messages “ RollingStockDatasetQueryMessage_sample_001.xml” and „RollingStockDataset Message_sample_001.xml” Železničná spoločnosť Cargo Slovakia deploys in its IT system called „ISP- Information system for operation support“ (CEF Project) are valid against the official TAF data catalogue version baseline 2.2.2 (checked with Altova XML Spy 2017 in February 2019) – see <https://www.era.europa.eu/node/641/6> .
