<i>Version</i>	22.0
<i>Origin</i>	ERA

Document History

<i>Version</i>	<i>Date</i>	<i>Comments</i>
1.0	30/01/2020	First version for publication
2.0	09/03/2020	Update following received inputs. Values for ESC FR, IT and for RSC ES.
3.0	30/03/2020	Update of RSC for NL
4.0	29/05/2020	Updated values for ESC/RSC SE. Reserved values for RSC UK, RSC IT.
4.1	02/06/2020	Included "Valid" Status for ESC-SE-04-HiL2B3
5.0	19/06/2020	Update of ESC NL and RSC FR
5.1	24/06/2020	Included information for RSC voice in the Figueras-Perpignan line as part of the Adif GSM-R network
5.2	06/07/2020	Updated values for ESC/RSC NO.
5.3	12/08/2020	Updated values for ESC AT,FR,IT and RSC ES,SK,IT
6.0	02/09/2020	Update of ESC BE,IT
7.0	20/11/2020	Update of ESC PL
8.0	22/01/2021	Update of ESC IT RFI Update of ESC FR OC'VIA Update of RSC SNCF-R
9.0	26/02/2021	Update of ESC & RSC voice BE Infrabel Update of ESC DK Banedanmark

		General clarification of the status values “valid” and “reserved” and reorganisation of the RSC-EU-0 values to have a clear separation between the “valid” ones and the “reserved” ones.
10.0	30/03/2021	Update of ESC AT OEBB Infra
11.0	13/07/2021	Update of ESC FR for BPL, SEA and SNCF-R Update of RSC FR for SEA Update of ESC IT for RFI Update ESC/RSC PL for PKP Update of ESC CZ for SZDC Update of ESC/RSC RO for CFR Update of RSC ES for ADIF
12.0	11/10/2021	Update for ESC-DE-01 and 02 as “valid”. ESC-DE-03 as “reserved”. Update for ESC-LU and ESC-FRES as “reserved”.
13.0	12/11/2021	RSC PL update for PKP ESC SE update for Trafikverket
14.0	17/02/2022	Corrected typo in ESC-LU-01 ESC-NO-02 as “valid” Update of RSC for ES, including new RSC-Data types Update of ESC for BE
15.0	17/03/2022	Update of ESC IT for RFI.
16.0	31/03/2022	Draft ESC ES for ADIF. Update of RSC ES correcting the value for two lines.
17.0	11/04/2022	RSC DE for DB Netz ESC DE for DB Netz RSC GR for OSE net ESC GR for OSE net
18.0	31/05/2022	RSC LU for CFL
19.0	01/07/2022	Update of ESC BE for Infrabel
20.0	26/07/2022	Update of ESC/RSC for Switzerland
21.0	20/10/2022	Update of ESC for Denmark Correction of RSC data typo for ES ESC-LU-01-RFN and ESC-LU-02-MSM as “valid”
22.0	20/12/2022	RSC-EU-0 for BDK Updated links to ESC/RSC documents

4. ESC CHECKS TABLE	6
5. RSC VOICE CHECKS TABLE	22
6. RSC DATA CHECKS TABLE	24

1. Introduction

This is a technical document prepared by the European Union Agency for Railways with the sets of checks for “ESC/RSC types” based on information received from Infrastructure Managers in accordance with the provisions 6.1.2.3 and 6.1.2.4 of Annex A of the CCS TSI [1].

2. Abbreviations, ACRONYMS and References

2.1. Abbreviations and acronyms

CCS	Control Command and Signalling
ERATV	European Register of Authorised Types of Vehicles
ESC	ETCS System Compatibility
RINF	Register of infrastructure
RSC	Radio System Compatibility

2.2. References

[1] – Commission Regulation (EU) 2016/919 of 27 May 2016 on the technical specification for interoperability relating to control-command and signalling subsystems of the rail system in the European Union¹ and its amendments².

3. ESC/RSC checks

3.1. Use of this document

Infrastructure Managers, with the support of the ETCS and/or GSM-R suppliers for their networks, shall submit to the Agency the definition of the necessary checks (as defined in CCS TSI [1] section 4.2.17) on their network by 16 January 2020 at the latest.

For submitting the ESC-RSC, please send it to us by e-mail: esc-rsc@era.europa.eu.

After an IM notifies ERA of an ESC/RSC Type, the Agency should make sure that the information received is correct and complete, in which case the Agency will assign a unique identifier to each ESC/RSC type which will be communicated to the Infrastructure Manager. The Agency will provide an interim updated version of the technical document containing all the ESC/RSC checks submitted up to that moment (pending further revision) notifying the IM within 5 Agency’s working days. These values will be in status “reserved” until the complete revision by the Agency.

Only the ESC/RSC identifiers with “valid” status shall be considered as “published” to fulfil the CCS TSI requirements (e.g. Table 6.3 and Table 7.1).

¹ OJ L158, 15.6.2016, p.1.

² At the time of publishing this document, the latest amendment is Commission Implementing Regulation (EU) 2020/387 of 10 March 2020 (OJ L73, 10.3.2020, p. 6.)

The format of the identifiers will be:

<ESC or RSC>-<Member State code or EU for more than one Member States codes>-<00 two digits sequential numbering>-<In case of RSC V for voice and/or D for data>-<Specific coding provided by the IM>. As example: ESC-FR-01-AA.

The Agency will proceed to publish regularly updates of the document at the Agency website and to inform the relevant working parties, to allow the sector (especially the VA applicants) to plan their activities accordingly. The new version published will include all the ESC/RSC Types notified and checked by ERA until the publication date.

The corresponding identifiers will be also included in the predefined list of values to be selected in RINF and ERATV. The IM will be informed when this is available

Infrastructure Managers shall classify the lines according to ESC/RSC types in RINF, using the provided identifier.

ERATV users shall also include the ESC/RSC types that have been checked for the vehicles, using the identifiers in the technical document.

Infrastructure Managers shall submit to the Agency any changes on the referred checks for their networks, by using the same email (esc-rsc@era.europa.eu) and making reference to the modified ESC/RSC type.

The latest version of the files with the definition of the checks corresponding to each ESC and RSC types submitted by each Infrastructure Manager can be found in the Agency webpage under the section ERTMS:

- ETCS System Compatibility: [ETCS System Compatibility \(ESC\) documents | European Union Agency for Railways \(europa.eu\)](#)

- Radio System Compatibility: [Radio System Compatibility \(RSC\) voice and data documents | European Union Agency for Railways \(europa.eu\)](#)

Moving Europe towards a sustainable and safe railway system without frontiers

4. ESC checks table

The following table includes the defined identifiers for ESC.

Status indicates if the identifier is “reserved”, “valid” or it has been “canceled” by the IM.

Reserved values that the ESC identifier has been assigned but the content of the ESC is still under revision.

Only the ESC identifier with “valid” status shall be considered as “published” to fulfil the CCS TSI requirements (e.g. Table 6.3 and Table 7.1).

ESC Identifier	Member State / Infrastructure Manager	Document	Date of latest update	Status	Notes
Not applicable	All Union	When ETCS is not installed or not authorised.	16/01/2020	Valid	Only to be used in ERATV
Not defined	All Union	No ESC submitted	16/01/2020	Valid	Only to be used in RINF
ESC-NP-CCS7.4a	Each Member State of the Union	Technical compatibility demonstrated according to CCS TSI Section 7.4a or National Procedure. Reference to the National Procedure to be recorded as non-coded restriction.	16/01/2020	Valid	Only to be used in ERATV
ESC-EU-0	<i>Greece/OSE net</i>	No ESC needed to be performed to demonstrate technical compatibility. Subsystem certificates are sufficient.	16/01/2020	Valid

5. RSC voice checks table

The following table includes the defined identifiers for RSC voice.

Status indicates if the identifier is reserved, valid or it has been removed by the IM.

Reserved values indicate that the RSC identifier has been assigned but the content of the RSC checks is still under revision.

Only the RSC voice identifier with “valid” status shall be considered as “published” to fulfil the CCS TSI requirements (e.g. Table 6.3 and Table 7.1).

RSC Identifier	Member State	Document	Date of latest update	Status	Notes
Not applicable	All Union	When Radio is not installed or not authorised.	16/01/2020	Valid	Only to be used in ERATV
Not defined	All Union	No RSC submitted	16/01/2020	Valid	Only to be used in RINF
RSC-NP-CCS7.4a	Each Member State of the Union	Technical compatibility demonstrated according to CCS TSI Section 7.4a or National Procedure. Reference to the National Procedure to be recorded as non-coded restriction.	16/01/2020	Valid	Only to be used in ERATV
RSC-EU-0	Italy / RFI, Norway/ Bane NOR ⁶ , The Netherlands / ProRail, Slovakia / ŽSR, Poland / PKP PLK, Greece / OSE net, Denmark / Banedanmark The values for Czech Republic / SŽDC is still reserved. 6. RSC data checks table

The following table includes the defined identifiers for RSC data.

Status indicates if the identifier is reserved, valid or it has been removed by the IM.

Reserved values indicate that the RSC identifier has been assigned but the content of the RSC checks is still under revision.

Only the RSC data identifier with “valid” status shall be considered as “published” to fulfil the CCS TSI requirements (e.g. Table 6.3 and Table 7.1).

Some IM require that ESC checks are done with operational radio that implicitly checks RSC for ETCS data. They are indicated with (*). Please refer to the definition in each ESC type.

RSC-SE-01-D	Sweden / Trafikverket *	TRV2019_131529 Checks required to demonstrate technical compatibility for Trafikverket ERTMS network, and classification of types in RINF	07/05/2020	Valid	
RSC-CH-01-D	Switzerland / SBB	Section §9.3.2.4 of 20_SF_ETCS_CH_RAMSiNa_Konzept_V3.1	26/07/2022	Valid	Due to the end-to-end specifications between end devices and ERTMS network in SUBSET-093, test results (O-2475) cannot be assigned to the end device alone. The execution, not the test results in detail, is to be considered for the RSC type to be considered as "Passed". Tests already executed at IC level do not need to be repeated.
