

Making the railway system
work better for society.

Application Guide for the European register of authorised types of railway vehicles (ERATV)

In accordance with Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776 and Commission Implementing Decision (EU) 2021/701.

Released by European Union Agency for railways

The present document represents the views of the European Union Agency for Railways and is a non-legally binding document. It does not represent the view of other EU institutions and bodies. Furthermore, a binding interpretation of EU law is the sole competence of the Court of Justice of the European Union.

These guidelines provide explanations to facilitate the implementation and usage of the Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776 and Commission Implementing Decision (EU) 2021/701.

These guidelines are publicly available and will be kept updated.

The reader should refer to the website of the European Union Agency for railways for information about their latest available edition.

Document History

<i>Version</i>	<i>Date</i>	<i>Modification description</i>
1.0	29 October 2019	First release according to Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776
1.1	13 February 2020	Reference list values for parameters 4.13.1.8, 4.13.2.5 and 4.13.2.8
1.2	4 March 2020	Annex I reviewed. New Annex II.
1.3	15 April 2020	Explanations provided for parameters 4.7.5 and 4.10.15
1.4	23 April 2020	Section 4 updated. Parameter 3.1.3.1.1 description updated.
1.5	9 June 2020	Section 4 updated. Parameter 4.1.12 description updated.

<i>Version</i>	<i>Date</i>	<i>Modification description</i>
1.6	26 June 2020	Section 4. Parameter 3.1.2.1 description updated.
1.7	2 September 2020	Section 4 updated.
1.8	9 September 2020	Explanations provided for parameter 4.5.1
1.9	19 November 2020	Section 4. Parameter 4.12.3.1 description updated.
2.0	27 November 2020	Section 4. Parameter 4.7.3.4 description updated.
2.1	2 December 2020	Section 4. Parameter 4.1.12 description updated.
2.2	14 January 2021	Section 4. Parameter 4.1.2.1 description updated.
2.3	12 March 2021	Section 4. Parameter 4.7.2.1.6 description updated.
2.4	14 April 2021	Section 4. Parameter 4.1.2.1 description updated.
2.5	5 May 2021	Section 4. Parameters 4.5.3.4, 4.13.1.5 and 4.13.2.3 description updated.
2.6	18 May 2021	Updated legal references to include Commission Implementing Decision (EU) 2021/701
2.7	09 June 2021	Section 4. Parameters 3.0, 4.13.1.1, 4.13.2.1 and 4.13.2.7 description updated.
2.8	05 July 2021	Section 2: Parameter 2.2 description updated. Section 3: Parameter 3.1.3.1.4 description updated.
2.9	20 July 2021	Section 4. Parameter 3.1.3.1.7 description updated.
3.0	7 September 2021	Section 4. Parameters 4.13.1.1, 4.13.1.5, 4.13.1.8, 4.13.2.1, 4.13.2.3, 4.13.2.5, 4.13.2.7, 4.13.2.8, 4.13.2.12, 4.13.2.11 description updated.
3.1	12 November 2021	Section 4. Parameter 3.1.3.1.1 description updated.
3.2	20 January 2022	Section 4. Parameters 4.1.2.1, 4.7.3.4 and 4.8.4 comments updated.
3.3	16 February 2022	Section 4. Parameter 4.1.2.1 comment updated.
3.4	15 March 2022	Section 4. Parameter 4.7.6 comment updated.
3.5	6 May 2022	Section 4. Parameters 4.7.5, 4.7.6 and 4.7.7 comment updated.
3.6	29 June 2022	Section 4. Parameters 1.3.1.3 and 3.1.3.1.2.1.3 comment updated.
3.7	1 July 2022	Section 4. Parameters 1.3.2.3, 3.1.3.1.2.2.3 and 4.7.6 comment updated.
3.8	4 July 2022	Section 4. Parameter 4.7.6 comment updated.
3.9	26 August 2022	Section 4. Parameter 2.1 comment updated.
4.0	19 September 2022	Section 4. Parameter 4.3.3 comment updated.
4.1	27 September 2022	Section 4. Parameter 4.10.8 comment updated.
4.2	3 November 2022	Section 4. Parameter 1.3.1.1 comment updated.

<i>Version</i>	<i>Date</i>	<i>Modification description</i>
4.3	24 April 2023	Section 4. Parameter 3.1.3.1.5 comment updated.
4.4	27 June 2023	Section 4. Parameters 1.3, 3.1.2.3, 3.1.3.1.2 and 3.1.3.1.7 comment updated.
4.5	11 August 2023	All sections. Update of existing links due to new ERA website.
4.6	22 September 2023	Section 4. Parameters 4.13.x updated to CCS TSI 2023/1695.
4.7	20 October 2023	Section 4. Parameter 0.4 comment updated.
4.8	12 March 2024	Section 4. Parameter 4.1.2.1 comment updated.
4.9	25 March 2024	Section 4. Parameters reviewed in accordance with Commission Implementing Decision (EU) 2023/1696 of 10 August 2023.
5.0	15 April 2024	Section 4. Parameters 4.13.1.1, 4.13.1.11, 4.13.2.1 and 4.13.2.7 comment updated.
5.1.	23 May 2024	Section 4. Parameters 4.13.1.7, 4.13.1.10 and 4.13.2.6 comment updated.
5.2	20 September 2024	New Annex III - ERATV update in accordance with Commission Implementing Decision (EU) 2023/1696.
5.3	3 December 2024	Section 5. Parameter 3.1.2.3 comment updated New Annex IV – Coded restriction duplicating technical parameters
5.4	28 January 2025	Section 4. Parameters 4.1.2.1, 4.14.1 and 4.15.2 comment updated. Section 7.1 – table 8 updated.
5.5	11 March 2025	Section 4. Parameters 4.1.3 and 4.1.11 comment updated
5.6	12 March 2025	Section 4. Parameter 4.14.1 comment updated. Section 7.3 updated.
5.7	9 April 2025	Section 4. Parameter 4.12.3.1 comment updated.
5.8	9 April 2025	Section 7.4 updated to include parameter 4.12.3.1 in the list of removed “Others”
5.9	10 April 2025	New annex V
6.0	11 March 2026	Section 4. Parameter 3.1.3.1.5. Typographical error correction.

1. Introduction

1.1. Content of the guide

1.1.1. Legal basis

Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776 and Commission Implementing Decision (EU) 2021/701 (hereafter “ERATV Decision”), Article 5 (1) states that *“The Agency shall publish and keep up-to-date an application guide for the European register of authorised types of vehicles. Among other information, this guide shall include for each parameter a reference to the clauses of the technical specifications for interoperability that state the requirements for this parameter.”*

1.1.2. Scope

The guide provides explanation of some provisions contained in the ERATV Decision.

This guide does not contain any legally binding advice. It may serve as a clarification tool without however dictating in any way compulsory procedures to be followed, and without establishing any legally binding practice.

The guide has been prepared by ERA. The reader should refer to the ERA website for information about its latest available edition.

1.1.3. Outside of scope

This Guide does not explain how to use the ERATV IT application, as this is covered by ERATV User Manual.

1.2. Document references

1.3. Definitions and abbreviations

Table 2 - Definitions

<i>Term</i>	<i>Definition</i>
Basic parameter	Any regulatory, technical or operational condition which is critical to interoperability and is specified in the relevant TSIs (Article 2(12) of Directive (EU) 2016/797)
Conformity assessment	Process demonstrating whether specified requirements relating to a product, process, service, subsystem, person or body have been fulfilled (Article 2(41) of Directive (EU) 2016/797)
Conformity assessment body	Body that has been notified or designated to be responsible for conformity assessment activities, including calibration, testing, certification and inspection; a conformity assessment body is classified as a 'notified body' following notification by a Member State; a conformity assessment body is classified as a 'designated body' following designation by a Member State (Article 2(42) of Directive (EU) 2016/797)
European Register of Authorised Types of Vehicles (ERATV)	Register of types of vehicles authorised by the Member States for placing in service. It contains the technical characteristics of vehicles' types as defined in the relevant TSIs, the manufacturer's name, dates, references and Member States granting authorisations, restrictions and withdrawals (Article 48 of Directive (EU) 2016/797)
Harmonised standard	European standard adopted on the basis of a request made by the Commission for the application of Union harmonising legislation (Article 2(1)(c) of Regulation (EU) No 1025/2012)
Infrastructure Manager	Anybody or firm responsible for the operation, maintenance and renewal of railway infrastructure on a network, as well as responsible for participating in its development as determined by the Member State within the framework of its general policy on development and financing of infrastructure (Article 3(2) of Directive 2012/34/EU)
Non-application of a TSI	Certain circumstance, by which projects can be exempted from having to comply with all or part of a TSI or TSIs (Article 7 of Directive (EU) 2016/797)
Open point	Certain technical aspect corresponding to the essential requirements, which cannot be explicitly covered in a TSI (Article 4(6) of Directive (EU) 2016/797)
Placing in service	All the operations by which a subsystem is put into its operational service (Article 2(19) of Directive (EU) 2016/797)
Placing on the market	First making available on the Union's market of an interoperability constituent, subsystem or vehicle ready to function in its design operating state (Article 2(35) of Directive (EU) 2016/797)
Railway Undertaking	Railway undertaking as defined in point (1) of Article 3 of Directive 2012/34/EU, and any other public or private undertaking, the activity of which is to provide transport of goods and/or passengers by rail on the basis that the undertaking is to ensure traction; this also includes undertakings which provide traction only (Article 2(45) of Directive (EU) 2016/797)

<i>Term</i>	<i>Definition</i>
Register of infrastructure (RINF)	Register of infrastructure indicates the main features of fixed installations, covered by the subsystems: infrastructure, energy and parts of control-command and signalling. It publishes performance and technical characteristics mainly related to interfaces with rolling stock and operation (Article 49 of Directive (EU) 2016/797)
Specific case	Any part of the rail system which needs special provisions in the TSIs, either permanent, because of geographical, topographical or urban environment constraints or those affecting compatibility with the existing system, in particular railway lines and networks isolated from the rest of the Union, the loading gauge, the track gauge or space between the tracks and vehicles strictly intended for local, regional or historical use, as well as vehicles originating from or destined for third countries (Article 2(13) of Directive (EU) 2016/797)
Upgrading	Any major modification work on a subsystem or part of it which results in a change in the technical file accompanying the 'EC' declaration of verification, if that technical file exists, and which improves the overall performance of the subsystem (Article 2(14) of Directive (EU) 2016/797)

2. Overview of ERATV

2.1. Introduction

The European register of authorised types of vehicles (ERATV) contains data on the types of vehicle authorised.

2.2. Configuration of ERATV

ERATV is hosted by ERA. No data are stored locally at the NSAs.

According to article 50 of Regulation (EU) 2018/545, the ERATV shall be completed by the authorising entity using the information provided by the applicant as part of the vehicle type authorisation application. The applicant shall be responsible for the integrity of the data provided to the authorising entity. The authorising entity shall be responsible for checking the consistency of the data provided by the applicant and making the ERATV entry available to the public.

The data are made public, by ERA, after submission by the Authorising Entity.

ERATV is public. It may be accessed by means of a standard internet connection. Neither user account nor any other kind of registration is necessary for accessing published vehicle type authorisations in ERATV.

2.3. Implementation of ERATV

The ERATV Decision is applicable from 15 April 2012 (according to Article 6 of the ERATV Decision). This means that Authorising Entities have to record in ERATV all type authorisations they have granted that from this date on.

The ERATV IT system is in operation since January 2013 and can be reached at the url:

<https://eratv.era.europa.eu>

2.4. Potential users of ERATV

ERATV is public, so any person has access to it. Following are the most likely users of ERATV:

- Railway undertakings
- Infrastructure managers
- Vehicle keepers

- Vehicle owners (incl. potential vehicle procurers, leasing companies)
- Manufacturers
- Entities in charge of maintenance
- Notified bodies (NoBos)
- Designated bodies (DeBos)
- National safety authorities (NSAs)
- National investigation bodies
- Registration entities in charge of the vehicle registers
- European Union Agency for Railways
- European Commission

2.5. ERATV and other registers

ERATV is intended to be used in combination with other registers and databases. In particular it has the following interfaces:

- The vehicle registers referred to in Article 47 of Directive (EU) 2016/797.
- Register of infrastructure (RINF) set up according to Article 49 of Directive (EU) 2016/797.

2.6. Interface with the vehicle registers

When a vehicle is registered in a Vehicle Register, its identification in ERATV (Type ID) of the authorised vehicle type (or version or variant) the vehicle is in conformity to, must be indicated (compulsory when available).

By means of this ERATV reference (Type ID), the technical characteristics of a vehicle may be retrieved from ERATV.

2.7. Interface with the Register of Infrastructure

Some of the ERATV parameters are indicated for technical compatibility between Vehicle and the network(s) of area of use. These parameters are indicated in the ERATV Decision, table 2, with a 'Y' in column "*Parameters for technical compatibility between Vehicle and the network(s) of area of use*".

Their corresponding parameters in RINF are detailed in Annex 2.

3. Actors

Table 4 - Actors

<i>Actor</i>	<i>Roles and responsibilities</i>
<i>Applicant for an authorisation of type of vehicle</i>	Submits the set of data required for ERATV to the relevant Authorising Entity

<i>Actor</i>	<i>Roles and responsibilities</i>
<i>Authorising Entity (NSA or ERA acting as Authorising Entity)</i>	<p>Creates the draft record in ERATV and reserves, if needed, a type ID.</p> <p>Complements the data submitted by the applicant in the draft record with the data related to the issued type authorisation (Authorisation section of the ERATV record)</p> <p>Submits the data for publication.</p>
<i>ERA</i>	<p>Hosts the ERATV IT system.</p> <p>Publish the data transmitted by the Authorising Entity in compliance with the ERATV specification.</p>

4. Registration of types of vehicles in ERATV under registration regime “exceptional mode”

ERATV is a register to record issued vehicle type authorisations, in accordance with the following legal base:

- Directive (EU) 2016/797, Article 24 (7): “7. The authorisation of vehicle types shall be registered in the European register of authorised vehicle types referred to in Article 48.”
- Directive (EU) 2016/797, Article 48 (1): “1. The Agency shall set up and keep a register of authorisations to place vehicle types on the market issued in accordance with Article 24” .
- ERATV Decision (Commission Implementing Decision 2011/665/EU as amended by Commission Implementing Regulation (EU) 2019/776 and Commission Implementing Decision (EU) 2021/701), Article 2(3): “3. Types of vehicle authorised by a Member State before 19 July 2010 for which one or more vehicles have been authorised in one or more Member States pursuant to Article 22 or 24 of Directive 2008/57/EC after 19 July 2010 are deemed to fall under provisions of Article 26 of Directive 2008/57/EC and shall be registered in ERATV. In this case, data to be recorded may be limited to the parameters that have been verified during the type authorisation process.”
- ERATV Decision, Article 2(4): “4. The types of vehicles which can be registered voluntarily are those set out in Section 1 of Annex I.”
- Regulation (EU) 2018/545, Article 14(1)(c): “extended area of use: the vehicle type authorisation and/or the vehicle authorisation for placing on the market issued by the relevant authorising entity for an already authorised vehicle type and/or vehicle in order to extend the area of use without a change of the design, pursuant to Article 21(13) of Directive (EU) 2016/797”
- Regulation (EU) 2018/545, Article 14(1)(d): “new authorisation: the vehicle type authorisation and/or vehicle authorisation for placing on the market issued by the authorising entity after a change of an already authorised vehicle and/or vehicle type, pursuant to Articles 21(12) or 24(3) of Directive (EU) 2016/797;”
- Regulation (EU) 2018/545, Article 15(3): “Changes to an already authorised vehicle type. 1. Any changes to an authorised vehicle type shall be analysed and categorised as only one of the following changes and shall be subject to an authorisation as provided below: 3. When a change falls under point (c) of paragraph 1 the holder of the vehicle type authorisation shall create a new vehicle type version or a new version of a vehicle type variant and provide the relevant information to the authorising entity. The authorising entity shall register in ERATV the new version of the vehicle type or the new version of the vehicle type variant in accordance with Article 50.
- Regulation (EU) 2018/545, Article 50(1): “1. The ERATV shall be completed by the authorising entity using the information provided by the applicant as part of the vehicle type authorisation application. The applicant shall be responsible for the integrity of the data provided to the authorising entity. The

authorising entity shall be responsible for checking the consistency of the data provided by the applicant and making the ERATV entry available to the public.”

Based on the above, ERATV is not a register of all “old” vehicles in operation before 19 July 2010, but a register of authorised vehicle types. Other kinds (e.g. admissions, acceptance, homologations, authorisations for placing in service, etc.) should not to be registered in ERATV, as they are outside of scope of the register.

Please note that in order to apply for:

- a new authorisation pursuant to Article 14(1)(d) of Regulation (EU) 2018/545
- an authorisation for an extended area of use pursuant to Article 14(1)(c) of Regulation (EU) 2018/545

there is no need to have an existing ERATV record. The new type/variant/version authorisation issued as a consequence of the above applications shall be registered in ERATV.

For each *exceptional mode* registration, the concerned Authorising Entity should justify its need by selecting one of the criteria in Table 5 and have the needed data to be recorded. No empty records should be created.

The following table presents the *exceptional mode* registration cases for the registration regime *Directive (EU) 2016/797* and the equivalent exceptional mode registration option to be selected in ERATV at the moment of registration:

Table 5 - Exceptional mode registration cases

<i>Exceptional mode registration case</i>	<i>ERATV exceptional mode registration option</i>
Non TSI conform vehicle, limited availability of the data.	Non TSI conform vehicle, limited availability of the data.
Vehicles authorised to be placed in service before 19 July 2010 for which an additional authorisation for placing in service has been granted pursuant to Article 23 or 25 of Directive 2008/57/EC.	Additional authorisation according to Article 23 or 25 of Directive 2008/57/EC.
Vehicles authorised to be placed in service before 19 July 2010 for which a new authorisation for placing in service has been granted after an upgrading or renewal.	New authorisation after upgrade or renewal.

<i>Exceptional mode registration case</i>	<i>ERATV exceptional mode registration option</i>
Vehicles coming from third countries and authorised on the EU territory according to COTIF 1999 and particularly its Appendices F and G.	Third countries, authorisation according to COTIF 1999 (Appendices F and G).
Vehicles coming from third countries and authorised under provisions of Article 21(11) of Directive 2008/57/EC.	Third countries, authorisation according to Article 21(11) of Directive 2008/57/EC.
Types of vehicle authorised before 19 July 2010 for which no new vehicles have been authorised after 19 July 2010.	Types of vehicle authorised before 19 July 2010.
Extension of area of use in accordance with Article 21(13) of Directive (EU) 2016/797.	Extended area of use according to Article 21(13) of Directive (EU) 2016/797.
New authorisation in accordance with Article 21(12) of Directive (EU) 2016/797.	New authorisation after upgrade or renewal
Vehicles coming from third countries in accordance with Article 21(15) of Directive (EU) 2016/797.	Third countries, authorisation according to Article 21(15) of Directive 2016/797.
New version according to Article 15(3) of Regulation (EU) 2018/545	Version according to Article 15(3) of Regulation (EU) 2018/545

Making the railway system
work better for society.

5. Annex I - Comments on ERATV parameters

Table 6 - Comments on ERATV parameters

#	Parameter	Data format	Comments and applicable TSI clauses
0	Identification of the type	Heading (no data)	This section is filled in when the type, variant or version is registered for the first time.
0.1	Type number (in accordance with Annex III)	[number] XX-XXX-XXXX-X	Parameters 01, 02 and 04 are managed together as being part of the <i>Type ID</i> , which is defined as: Type ID: An identification for the type composed of the type number (parameter 0.1, number composed of 10 digits), the variant (parameter 0.2, alphanumeric composed of three characters) and the version (parameter 0.4, alphanumeric composed of three characters): TypeID = Type number+Variant+Version = XX-XXX-XXXX-X-ZZZ-VVV Example : Variant 1 with 2 versions: 13-013-0001-6-001- 001 13-013-0001-6-001- 002 Variant 2 with 1 version: 13-013-0001-6-002-001
0.2	Variant included in this type (in accordance with Article 2(13) of Regulation (EU) 2018/545)	[alphanumeric] ZZZ	
0.4	Versions included in this type. (in accordance with Article 2(14) of Regulation (EU) 2018/545)	[alphanumeric] VVV	
0.3	Date of record in ERATV	[date] YYYYMMDD	
1	General information	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
1.1	Type name	[character string] (max 256 characters)	Type name as defined by the manufacturer
1.2	Alternative type name	[character string] (max 256 characters)	Alternative type name as defined by the manufacturer
1.3	Manufacturer's name	Heading (no data)	Directive (EU) 2016/797, Article 2(36): <i>'manufacturer' means any natural or legal person who manufactures a product in the form of interoperability constituents, subsystems or vehicles, or has it designed or manufactured, and markets it under his name or trademark.</i>
1.3.1	Manufacturer identification data	Heading (no data)	
1.3.1.1	Name of organisation	[character string] (max 256 characters) Selection from a predefined list, possibility to add new organisations	Note: in case of a modification of a record (as a result of a change of a vehicle type), the original manufacturer will be indicated, while the entity managing the change will be indicated within parameter [3.1.3.X.6 Comments]
1.3.1.2	Registered business number	Text	A registered business number is an alphanumeric identifier assigned to the organisation by the authorities responsible for the registration of organisations of their type in their Member State and which allows the organisation (rather than any single person representing it) to act as a Juridical or Legal entity. Examples of registered business numbers from different countries would be: FN 72586k 202945069 CH-292.4.013.564-9 DE 185 159 346 HRB 33582, Amtsgericht Hamburg Q2884679P A86538254 B 60257 38005268240090 J50/9659/1994 226260-6225 L

#	Parameter	Data format	Comments and applicable TSI clauses
1.3.1.3	Organisation code	Alphanumeric code	As defined in Commission Implementing Decision (EU) 2018/1614, Annex II, 3.4.2 Organisation codes can be checked at https://teleref.era.europa.eu/ To request an organisation code and for more details: https://www.era.europa.eu/domains/registers/ocr_en
1.3.2	Manufacturer contact data	Heading (no data)	
1.3.2.1	Address of organisation, street and number	Text	
1.3.2.2	Town	Text	
1.3.2.3	Country code	Code as in EU interinstitutional style guide	This is a two-letter code, as indicated in the EU interinstitutional style guide available at: http://publications.europa.eu/code/en/en-5000600.htm Example: ES
1.3.2.4	Post code	Alphanumeric code	
1.3.2.5	Email address	Email	The recorded email to be a generic email for the organisation, not person specific.
1.4	Category	[character string] Selection from a predefined list (according to Annex III)	Vehicle category as defined in Annex III of the ERATV Decision
1.5	Subcategory	[character string] Selection from a predefined list (according to Annex III)	Vehicle subcategory as defined in Annex III of the ERATV Decision
2	Conformity with TSIs	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
2.1	Conformity with TSI	For each TSI: [character string] Y/N/Partial/Not applicable Selection from a predefined list of vehicle related TSIs (both in force and those that were previously in force) (multiple selection possible)	The exact reference of the TSIs conformity with which has been verified should be indicated. This includes the version of the TSI and its possible amendments. Conformity (or partial conformity) must be attested by an EC Type Examination Certificate (module SB) or Design verification certificate (module SH1) as defined in the Decision on Modules or, for TSI adopted before 2010, in the applicable TSI itself. If not, the vehicle is deemed to be non-TSI conform. "Yes" means the type of vehicle is fully in conformity with the given TSI. Note: In case of full conformity with "LOC & PAS (Regulation (EU) No 1302/2014)", requirements of "SRT (Regulation (EU) No 1303/2014)" are already included, and therefore, there is no need to select the SRT TSI.
2.2	EC certificate of verification: Reference of 'EC type examination certificates' (if module SB applied) and/or 'EC design examination certificates' (if module SH1 applied)	[character string] (possibility to indicate several certificates, e.g. certificate for rolling stock subsystem, certificate for CCS, etc.)	This parameter is to contain NoBo EC certificates. Note: 'EC' applies only to certificates issued by a Notified Body including certificates covering both Notified Body and Designated Body tasks when it is the same entity. 'EC' is to be omitted on certificates issued by a Designated Body.
2.3	Applicable specific cases (specific cases conformity with which has been assessed)	[character string] Selection from a predefined list (multiple selection possible) based on TSIs (for each TSI marked as Y or P)	Specific cases the type of vehicle is in conformity with (conformity must be attested by verification procedure).

#	<i>Parameter</i>	<i>Data format</i>	<i>Comments and applicable TSI clauses</i>
2.4	Sections of TSI not complied with	[character string] Selection from a predefined list (multiple selection possible) based on TSIs (for each TSI marked as P)	<p>This parameter must be filled in in the cases of partial conformity with a TSI. Sections of TSI the type of vehicle is not in conformity with (e.g. in the case of a derogation, partial application of TSI in the case of renewal or upgrading, etc.).</p> <p>CCS TSI 2019/776: 6.1.1.3. Partial fulfilment of TSI requirements</p> <p>Note for information: In the case of existence of sections of TSI not complied with under the CCS TSI, the template provided in the CCS application guide is to be included in the technical file.</p>
3	Authorisations	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
3.0	Area of use	[character string] Selection from a predefined list (multiple selection): MS – Network	<p>The format of the area of use is:</p> <p>MS1(Network1,Network2,...)+MS2(NeighbourStation1,NeighbourStation2,...)+MS3(NeighbourStation3)+...,MS4(Network3,Network4,...)+MS5(NeighbourStation4)+MS6(NeighbourStation5)+...,MS5(Network5)</p> <p>Legend:</p> <ul style="list-style-type: none"> + will introduce neighbouring stations , will separate MSs/Networks/Neighbouring Stations included in the area of use () will contain the possible networks of a MS or the names of the neighbouring station, separated by comma. <p>For example:</p> <p>FR(FrenchNetwork1,FrenchNetwork2)+BE(Quievrain,Mons)+CH(Genève),ES(SpanishNetwork)+PT(Elvas),IT(RFI)</p> <p>The above example is read as if the area of use covers:</p> <ul style="list-style-type: none"> the two networks of France (“FrenchNetwork1” and “FrenchNetwork2”) and the neighbouring stations (of France), located in Belgium (“Quievrain” and “Mons”) and the neighbouring station (of France), located in Switzerland, “Genève”, and the Spanish network “ESNetwork”, and “Elvas”, in Portugal, a neighbouring station of Spain, and the Italian network of Italy, named “RFI”.
3.1	Authorisation in	Heading (no data)	
3.1.1	Member State of authorisation	[character string] Selection from a predefined list (multiple selection)	
3.1.2	Current status	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.2.1	Status	[character string] + [date] Possible options: Valid, Suspended YYYYMMDD, Revoked YYYYMMDD, to be renewed YYYYMMDD	This parameter is automatically generated by the system depending on the information provided by the Authorising Entity. For type authorisations based on CCS TSI [15] <i>Set of specifications #1</i> , their status is to be changed to “ <i>to be renewed</i> ” under some conditions explained in the CCS TSI [15] application guide located at: https://www.era.europa.eu/system/files/2023-01/Guide%20for%20the%20application%20of%20the%20CCS%20TSI_1.pdf
3.1.2.2	Validity of authorisation (if defined)	[date] YYYYMMDD	Last day on which the authorisation is valid. Regulation (EU) 2018/545, Article 46: 6. The authorisation decision shall not contain any time limited conditions for use of the vehicle and other restrictions, unless the following conditions are fulfilled: (a) it is required because the conformity to the TSIs and/or national rules cannot be completely proven before the issuing of the authorisation; and/or (b) the TSIs and/or national rules require that the applicant produces a plausible estimate of compliance. The authorisation may then include a condition that real use demonstrates performance in line with the estimate within a specified period of time.

<p>3.1.2.3</p>	<p>Coded conditions for use and other restrictions</p>	<p>[character string] Code assigned by the Agency</p>	<p>Coded conditions for use and other restrictions as indicated on the issued type authorisation. ERA maintains a single document with restriction codes. Document ERA/TD/2011-09/INT available on ERA website.</p> <p>When the value for a coded condition for use and other restrictions is the same as the value for a technical parameter, which means there is no actual condition for use or restriction as compared to the nominal design value, the relevant coded condition for use and other restriction should be left empty. See section 8 (Annex IV) for more details.</p> <p>Note: The restriction codes indicated in the above document ERA/TD/2011-09/INT for 2.4.xx <i>ERTMS on board</i> are:</p> <ul style="list-style-type: none"> - 2.4.10 for <i>ETCS</i> - 2.4.20 for <i>GSM-R voice</i> - 2.4.21 for <i>GSM-R for ETCS</i> <table border="1" data-bbox="1285 799 1890 1177"> <thead> <tr> <th>Cat</th> <th>Type</th> <th>Value or specification</th> <th>Name</th> </tr> </thead> <tbody> <tr> <td></td> <td>4</td> <td>Coded list</td> <td>ERTMS on board</td> </tr> <tr> <td></td> <td></td> <td>10</td> <td>ETCS</td> </tr> <tr> <td></td> <td></td> <td>20</td> <td>GSM-R voice</td> </tr> <tr> <td></td> <td></td> <td>21</td> <td>GSM-R for ETCS</td> </tr> </tbody> </table> <p>However, inside the ERATV tool, they are referenced as:</p> <ul style="list-style-type: none"> - 2.4.1 for <i>ETCS</i> - 2.4.2 for <i>GSM-R voice</i> - 2.4.3 for <i>GSM-R for ETCS</i> 	Cat	Type	Value or specification	Name		4	Coded list	ERTMS on board			10	ETCS			20	GSM-R voice			21	GSM-R for ETCS
Cat	Type	Value or specification	Name																				
	4	Coded list	ERTMS on board																				
		10	ETCS																				
		20	GSM-R voice																				
		21	GSM-R for ETCS																				

#	Parameter	Data format	Comments and applicable TSI clauses
			<p>2.4 ERTMS on board: 2.4.1 ETCS</p> <p>2.4 ERTMS on board: 2.4.2 GSM-R voice</p> <p>2.4 ERTMS on board: 2.4.3 GSM-R for ETCS</p> <p>Until the ERATV tool will be corrected in a future release, it is to be considered that the codes in ERATV tool (2.4.1, 2.4.2 and 2.4.3) are to be read as if they were 2.4.10, 2.4.20 and 2.4.21, respectively.</p> <p>In addition, to avoid any possible confusion, ERATV always displays the relevant text (<i>ETCS, GSM-R voice, GSM-R for ETCS</i>) next to the restriction code.</p>
3.1.2.4	Non-coded conditions for use and other restrictions	[character string]	Non-coded conditions for use and other restrictions as indicated on the issued type authorisation.
3.1.3	Historical	Heading (no data)	
3.1.3.1	Original authorisation	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.3.1.1	Date of the original authorisation	[date] YYYYMMDD	<p>Date on which the type authorisation being recorded was issued (not the date of entry in ERATV).</p> <p>For a variant of a registered type, this date is the date of the issuing of the authorisation of the variant.</p> <p>For a version of a registered type, this date is:</p> <ul style="list-style-type: none"> - If no type authorisation was issued: this is the date of the creation of the version, not the date of authorisation of the “parent” type of this version (the previously registered type). For example: <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><u>Registered type “A”</u> Date: 2019-09-25</p> <p style="text-align: right;">→</p> </div> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><u>Version of “registered type A”</u> Date of creation of the version: 2020-02-06 3.1.3.1.1 Date of the original authorisation: 2020-02-06</p> </div> <ul style="list-style-type: none"> - If a type authorisation was issued for this version (extension of area of use, which requires an authorisation), this is the date of the issuing of the type authorisation of the version.
3.1.3.1.2	Authorisation holder	Heading (no data)	Regulation (EU) 2018/545, Article 2(6): ‘holder of the vehicle type authorisation’ means the natural or legal person that has applied for and received the vehicle type authorisation, or its legal successor;
3.1.3.1.2.1	Authorisation holder identification data	Heading (no data)	
3.1.3.1.2.1.1	Name of organisation	[character string] (max 256 characters) Selection from a predefined list, possibility to add new organisations	
3.1.3.1.2.1.2	Registered business number	Text	See explanation in parameter 1.3.1.2

#	Parameter	Data format	Comments and applicable TSI clauses
3.1.3.1.2.1.3	Organisation code	Alphanumeric code	As defined in Commission Implementing Decision (EU) 2018/1614, Annex II, 3.4.2 Organisation codes can be checked at https://teleref.era.europa.eu/ To request an organisation code and for more details: https://www.era.europa.eu/domains/registers/ocr_en
3.1.3.1.2.2	Authorisation holder contact data	Heading (no data)	
3.1.3.1.2.2.1	Address of organisation, street and number	Text	
3.1.3.1.2.2.2	Town	Text	
3.1.3.1.2.2.3	Country code	Code as in EU interinstitutional style guide	This is a two-letter code, as indicated in the EU interinstitutional style guide available at: http://publications.europa.eu/code/en/en-5000600.htm Example: ES
3.1.3.1.2.2.4	Post code	Alphanumeric code	
3.1.3.1.2.2.5	Email address	Email	The recorded email to be a generic email for the organisation, not person specific.
3.1.3.1.3	Authorisation document reference	[character string] (EIN)	The European Identification Number (EIN) of the issued type authorisation. The format of the EIN is defined in the document “Structure and content of the European Identification Number” with Document ID: 013SST1139 published on the ERA website.

#	<i>Parameter</i>	<i>Data format</i>	<i>Comments and applicable TSI clauses</i>
3.1.3.1.4	Certificate of verification: Reference of type examination or design examination type	[character string] (Possibility to indicate several certificates, e.g. certificate for rolling stock subsystem, certificate for Control, command and signalling subsystem, etc.)	This parameter is to contain DeBo certificates of verification Note: 'EC' applies only to certificates issued by a Notified Body including certificates covering both Notified Body and Designated Body tasks when it is the same entity. 'EC' is to be omitted on certificates issued by a Designated Body.

<p>3.1.3.1.5</p>	<p>Parameters for which conformity to applicable national rules has been assessed</p>	<p>[character string] Selection from a predefined list (multiple selection possible) based on Commission Decision 2015/2299/EU</p>	<p>This parameter is to contain the basic parameters pursuant to Decision 2015/2229/EU for which the assessment has been performed against national rules instead of against the applicable TSI(s), where this is allowed.</p> <p>ERATV technically expects at least one (1) possible combination (gauge, CCS, energy) to be filled-in per country in the Area of Use.</p> <div style="border: 1px solid black; padding: 5px;"> <p>3.1.3.1.5 Parameters for which conformity to applicable national rules has been assessed: *</p> <div style="border: 1px dashed red; padding: 5px; margin-bottom: 5px;"> <p>1435mm / DC 3kV / ASFA / <u>FR</u>: <input type="checkbox"/> ^ v k</p> <p>1435mm / DC 3kV / LS / <u>FR</u>: <input type="checkbox"/> ^ v k</p> <p>1668mm / DC 3kV / ASFA / <u>FR</u>: <input type="checkbox"/> ^ v k</p> <div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 2px auto;"> <p>2015/2299/EU</p> <p>2.1.1 Strength and integrity</p> <p>3.3.2 Wheelset (complete)</p> <p>4.2.4 Reliability of parking brake</p> </div> <p>1668mm / DC 3kV / LS / <u>FR</u>: <input type="checkbox"/> ^ v k</p> </div> <div style="border: 1px dotted blue; padding: 5px;"> <p>1435mm / DC 3kV / ASFA / <u>ES</u>: <input type="checkbox"/> ^ v k</p> <p>1435mm / DC 3kV / LS / <u>ES</u>: <input type="checkbox"/> ^ v k</p> <p>1668mm / DC 3kV / ASFA / <u>ES</u>: <input type="checkbox"/> ^ v k</p> <p>1668mm / DC 3kV / LS / <u>ES</u>: <input type="checkbox"/> ^ v k</p> </div> </div>

#	Parameter	Data format	Comments and applicable TSI clauses
3.X	Authorisation in	Heading (no data) (X is progressive incremented by one unit from 2 onwards each time an authorisation for this type has been granted). This Section contains same fields as 3.1	
4	Technical characteristics of the vehicle	Heading (no data)	
4.1	General technical characteristics	Heading (no data)	
4.1.1	Number of driving cabs	[Number] 0/1/2	<p>CCS TSI 2019/776:</p> <ul style="list-style-type: none"> - 1.1 Technical scope: “(1) locomotives and passenger rolling stock, including thermal or electric traction units, self-propelling thermal or electric passenger trains, and passenger coach, if equipped with a driving cab” <p>For wagons the number of driving cabs is to be set to zero (0).</p>
4.1.2	Speed	Heading (no data)	

4.1.2.1	Maximum design speed	[Number] km/h	<p>CR TSI LOC&PAS 2011/291/EU:</p> <ul style="list-style-type: none"> - 4.2.8.1.2 Requirements on performance <p>HS TSI 2008/232/EU:</p> <ul style="list-style-type: none"> - 4.2.1.1b Requirements on performance <p>CCS TSI 2019/776:</p> <ul style="list-style-type: none"> - 4.2.2 On-board ETCS functionality <p>TSI WAG 321/2013:</p> <ul style="list-style-type: none"> - 4.8 Parameters to be recorded in the technical file and European register of authorised types of vehicles <p>If a vehicle is composed of several subsystems, the design speed of the vehicle is the lowest design speed of different subsystems the vehicle is composed of.</p> <p>The speed value to fill in corresponds to the speed to which compliance was demonstrated and stated in the authorization details. If different speeds exist depending on the area of use, the load or the brake regime, they are to be reflected within parameter [3.1.2.3 Coded conditions for use and other restrictions: <i>1.3 Speed restrictions in Km/h</i>] and parameter [3.1.2.4 Non-Coded conditions for use and other restrictions].</p> <p>When there are no differences between maximum design speed (parameter 4.1.2.1) and speed restrictions (parameter 3.1.2.3, code 1.3): leave 3.1.2.3 empty (no particular restriction as compared to the nominal value)</p> <p>When there are differences (e.g. wagons laden/empty), consider that the maximum design speed is the nominal value (e.g. for a wagon, running laden).</p> <p>Please note that for parameter 4.1.2.1, ERATV allows to introduce 1 value (number, without units or text) per combination of track gauge, class B system and electrification system. On the other hand, within parameter 3.1.2.3, code 1.3 allows to introduce free text (number, units and explanation) but to be applied to all combinations.</p>
---------	----------------------	---------------	---

			<p>Examples:</p> <ul style="list-style-type: none"> - S wagon (100 km/h laden) that can run 120 m/h empty: <ul style="list-style-type: none"> • Maximum design speed (parameter 4.1.2.1) -> 100 • Speed restriction (parameter 3.1.2.3, 1.3) -> 100 km/h laden or empty; 120 km/h empty • Speed restriction (parameter 3.1.2.4) -> none - SS wagon (120 km/h laden or empty): <ul style="list-style-type: none"> • Maximum design speed (parameter 4.1.2.1) -> 120 • Speed restriction (parameter 3.1.2.3 , 1.3) -> none • Speed restriction (parameter 3.1.2.4) -> none - S/SS wagon covered by a single type authorisation <ul style="list-style-type: none"> • Maximum design speed (parameter 4.1.2.1) -> 120 • Speed restriction (parameter 3.1.2.3, 1.3) -> 100 km/h S laden or empty; 120 km/h SS laden or empty • Speed restriction (parameter 3.1.2.4) -> none - S wagon with *** marking in the load table <ul style="list-style-type: none"> • Maximum design speed (parameter 4.1.2.1) -> 100 • Speed restriction (parameter 3.1.2.3, 1.3) -> 100 km/h laden or empty; 120 km/h empty • Speed restriction (parameter 3.1.2.4) -> The maximum speed of the wagon shall be 120 km/h empty and 100 km/h loaded when in "S" condition, but a loaded wagon is not restricted from being integrated in a train composition that runs up to 120 km/h due to the load table being marked with "S" in combination with three stars (according to point 7.1.2(g) of the WAG TSI and clause 4.5.4 of EN 15877-1:2012). - Wagon 100 km/h with 22.t t/axle and 120 km/h with 20 t/axle: <ul style="list-style-type: none"> • Maximum design speed (parameter 4.1.2.1) -> 100
--	--	--	---

#	Parameter	Data format	Comments and applicable TSI clauses
			<ul style="list-style-type: none">• Speed restriction (parameter 3.1.2.3, 1.3) -> 100 km/h 22.5 t/axle; 120 km/h 20 t/axle• Speed restriction (parameter 3.1.2.4) -> none

<p>4.1.3</p>	<p>Wheel set gauge</p>	<p>[character string] Selection from predefined list</p>	<p>TSI LOC&PAS 1302/2014: - 4.2.3.5.2.1. Mechanical and geometric characteristics of wheelsets</p> <p>TSI WAG 321/2013: - 4.2.3.6.2. Characteristics of wheelsets</p> <p>Manual gauge change in wagons (WAG TSI §4.2.3.6.7): for wagons designed to be fitted with wheelsets of different gauge that are exchanged manually (e.g. 1.435 and 1.668 mm), both track gauges should be indicated in parameter 4.1.3. This allows to introduce one value for the coded restriction 3.1.2.3 1.1 (minimum curve radius) per gauge. There is no need to include the coded restrictions 2.2.X (e.g. 2.2.4 for 1.435 mm and 2.2.8 for 1.668 mm), as this fully duplicates parameter 4.1.3 (see section 8).</p> <p>Wheel set gauge</p> <hr/> <p>All fields marked with an asterisk (*) are mandatory</p> <p>4.1.3 Wheel set gauge : *</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> 1435mm <input type="checkbox"/> 1520mm <input type="checkbox"/> 1524mm <input type="checkbox"/> 1600mm <input checked="" type="checkbox"/> 1668mm <p>3.1.2.3 Coded conditions for use and other restrictions:</p> <p>1435mm <input type="checkbox"/></p> <div style="border: 1px solid #ccc; padding: 5px; width: fit-content;"> <p>1.1 Minimum curve radius in meters 75</p> </div> <hr/> <p>1668mm <input type="checkbox"/></p> <div style="border: 1px solid #ccc; padding: 5px; width: fit-content;"> <p>1.1 Minimum curve radius in meters 150</p> </div> <p>Automatic variable gauge systems 4.2.3.6.6 of WAG TSI The coded restrictions 2.2.1 “Variable gauge 1435/1520” or 2.2.2 “Variable gauge 1435/1668” should be used only for automatic variable gauge systems, in conjunction with parameter 4.1.11 “Wheelset gauge changeover facility”. This is not the normal case for wagons, that are designed to be able to exchange wheelsets but not in an automated way.</p>
--------------	------------------------	---	--

#	Parameter	Data format	Comments and applicable TSI clauses
4.1.5	Maximum number of trainsets or locomotives coupled together in multiple operation.	[number]	<p>TSI LOC&PAS 1302/2014:</p> <ul style="list-style-type: none"> - 4.1.2. Description of the Rolling stock subject to the application of this TSI - 4.2.12.2. General documentation <p>CR TSI LOC&PAS 2011/291/EU:</p> <p>4.1.2. Description of the Rolling stock subject to the application of this TSI</p> <p>HS TSI 2008/232/EU:</p> <p>4.2.1.2. Design of trains</p>
4.1.11	Wheelset gauge changeover facility	[character string] Selection from predefined list	<p>TSI LOC&PAS 1302/2014:</p> <p>4.2.3.5.2.3 Variable gauge wheelsets</p> <p>TSI WAG 321/2013:</p> <p>4.2.3.6.6. Variable gauge wheelsets</p> <p>To be completed only in case of automatic variable gauge systems (where coded restriction 2.2.1 or 2.2.2 is filled in). For wagons designed to be fitted with wheelsets of different gauge that are exchanged manually (e.g. 1.435 and 1.668 mm), this parameter should be left empty.</p>
4.1.12	Number of vehicles composing the fixed formation (for fixed formation only)	[number]	<p>TSI LOC&PAS 1302/2014:</p> <p>4.2.12.2. General documentation</p> <p>The value is mandatory for all vehicle categories. If the vehicle is composed of only one car, the indicated value shall be “1”.</p> <p>For a rack of permanently connected elements (e.g. 2 or more elements), the value to be indicated is the number of connected elements.</p>
4.2	Vehicle gauge	Heading (no data)	

#	Parameter	Data format	Comments and applicable TSI clauses

6. Annex II - Type authorisation regimes – matrix of options

Table 7 - Registration regimes - matrix of options

	Options allowed by Directive 2008/57/EC		Options allowed by Directive (EU) 2016/797	
	Options	Action in ERATV	Options	Action in ERATV
A. MS has transposed the Directive (EU) 2016/797	Not applicable	Not applicable	A.1. New type creation → allowed	A.1. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> . Registration method: <i>New type</i>
			A.2. New variant → allowed	A.2. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> Registration method: <i>New variant</i>
			A.3. New version (2016/797) → allowed	A.3. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> Registration method: <i>New version</i>
			A.4. New version under 2008/57 → not allowed	
			A.5. Additional type authorisation under 2008/57 → not allowed	
			A.6. Extension of area of use (2016/797):	
			a. To a type registered under registration 2008/57 → not allowed → APM to be delivered by ERA	
			b. To a type registered under registration 2016/797 → not allowed → APM to be done by ERA	
			c. To add a new network in the area of use within the same Member State → allowed	A.6.c. Register new type: Registration regime: <i>Directive (EU) 2016/797</i> Registration method: <i>New version of a registered type</i>

	Options allowed by Directive 2008/57/EC		Options allowed by Directive (EU) 2016/797	
	Options	Action in ERATV	Options	Action in ERATV
B. MS has not transposed the Directive (EU) 2016/797	B.1. <i>New type</i> → allowed	B.1. Register new type: Registration regime: <i>Directive 2008/57/EC</i> Registration method: <i>New type of a new platform/registered platform</i>	<p>Not applicable</p>	<p>Not applicable</p>
	B.2. <i>New variant</i> → not allowed			
	B.3. <i>New version (2016/797)</i> → not allowed			
	B.4. <i>New version (2008/57)</i> → allowed	B.4 Register new type: Registration regime: <i>Directive 2008/57/EC</i> Registration method: <i>New version of a registered type</i>		
	B.5. <i>Additional type authorisation (2008/57)</i> :	B.5.a: Register authorisation		
	a. <i>To a type registered under registration 2008/57</i> → allowed b. <i>To a type registered under registration 2016/797</i> → not allowed as a general rule			

Making the railway system
work better for society.

7. Annex III - ERATV update in accordance with Commission Implementing Decision (EU) 2023/1696 and alignments between RINF and ERATV

The ERATV Decision was amended by the [Commission Implementing Decision \(EU\) 2023/1696](#)¹.

In accordance, ERATV tool was updated, with release 3.0, to be aligned with the latest legal framework.

Existing published records in ERATV remain as they are. However, any **new record, existing draft, or any modification, or correction to a published record** will be **affected by the new changes** explained in the following sections.

In addition to the updated legal framework, ongoing actions are being done in order to review and simplify the list of parameters' reference list values, and the alignments between RINF and ERATV, in accordance with Annex I, 2.5 of [Commission Implementing Decision 2011/665/EU](#).

7.1. Updated list of parameters

Any new record in ERATV, or any existing draft, or any modification or correction to a published record will now require the new list of parameters, as requested by [Commission Implementing Decision \(EU\) 2023/1696](#)¹.

For the cases of the new parameters not being assessed within the issued Type authorisation, Authorising Entities may consider filling in the new mandatory parameters with the values as in Table 8. Furthermore, Authorising Entities may also consider providing an explanation within the parameter [*Comments*], if needed for clarity and traceability.

Table 8 - New parameters proposed values if not assessed in issued vehicle type authorisation.

<i>Parameter</i>	<i>Proposed value to be used if parameter not assessed in the issued vehicle type authorisation</i>
4.5.1 Permissible payload for different line categories	<i>Not assessed in the issued Type Authorisation</i>
4.5.1.1 EN line category(ies)	<i>Not assessed in the issued Type Authorisation</i>
4.5.2.4 Operational mass in working order	0
4.5.2.5 Operational mass under normal payload	0

¹ The Consolidated ERATV Decision legal text version is available at: <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:02011D0665-20230908>

<i>Parameter</i>	<i>Proposed value to be used if parameter not assessed in the issued vehicle type authorisation</i>
4.10.16 Vehicle equipped with electric energy storage for traction purposes and with the function of charging with OCL at standstill	<i>False</i>
4.13.1.10 Safe consist length information from on-board necessary to access the line and corresponding SIL	<i>None</i>
4.13.1.11 Envelope of legally operated ETCS system versions	<i>None</i>
4.13.3.1 On-board ATO system version	<i>None</i>
4.13.3.2 On-board ATO implementation	<i>None</i>
4.15.1 Presence and type of derailment detection and prevention function(s)	<i>None</i>
4.15.2 Presence of derailment prevention and detection function	<i>False</i>
4.15.3 Presence of derailment prevention and detection signal processing	<i>False</i>

7.2. Updated list of subcategories

[Commission Implementing Decision \(EU\) 2023/1696](#) has updated the list of subcategories (Annex III of the ERATV Decision¹):

- New subcategories are added.
- Some subcategories cannot be used anymore.

This has an impact on records on ERATV:

- **For new records**, Authorising Entities should check to use the new list of subcategories.
- **For existing records, or child records** (Variant, Version, New type from a registered type), the subcategory is inherited from the parent type and cannot be changed. This may imply that you are forced to continue using one of the subcategories marked not to be used anymore. You may consider explaining this case in the parameter [Comments] for the case that an inherited ("*deactivated-not to be used*") subcategory is used.

You may find in Table 9 the changes applied to the list of Subcategories. The changes are marked with ***bold italics***.

Table 9 - Updates to the subcategories

<i>Code</i>	<i>Category</i>	<i>Subcategory</i>	
11	Traction vehicles	Locomotive	
12		Power Unit (or power car)	
13		Self-propelled passenger trainset (incl. railbuses)	
14		Reserved	
15		Reserved Self-propelled freight trainset	
16		Railcar	
17		Shunter	
18		Tram-Train	
19		Other <i>(see article (1)(4) of directive (EU) 2016/797)</i> (tramways, light rail vehicles, etc.)	
31		Hauled passenger vehicles	Coach Passenger coach (incl. sleeping cars, restaurant, etc.)
32	Reserved		
33	Van		
34	Reserved		
35	Car carrier		
36	Driving Coach		
37	Reserved Vehicle for services (e.g. kitchen)		
38	Driving Van		
39	Fixed rake of coaches		
40	Reserved		
41	Other		
42-49	Reserved		
51	Freight wagons (hauled)		Freight wagon
52			Reserved
53		Fixed rake of freight wagons	
54		Separate rail bogies connected to compatible road vehicle(s)	

<i>Code</i>	<i>Category</i>	<i>Subcategory</i>
55-59		Reserved
71	Special vehicles	Self-propelled special vehicle – <i>This code shall not be used after 2023-08-10</i>
72		<i>On track Machines (OTMs)</i>
73		Hauled special vehicle - <i>This code shall not be used after 2023-08-10</i>
74		<i>Infrastructure inspection vehicles</i>
75		<i>Environment vehicles</i>
76		<i>Emergency vehicles</i>
77		<i>Road-Rail vehicles</i>
78		Reserved
79		Reserved

7.3. Updated parameter's dependencies to Gauge, Energy, CCS.

In ERATV, parameters may have a dependency to the selected values of Gauge, CCS and Energy.

These parameter's dependencies have been updated following [Commission Implementing Decision \(EU\) 2023/1696](#). The list of updated parameters' dependencies is listed in Table 10.

Table 10 - Updated parameter's dependencies to Gauge, Energy, CCS

#	Parameter	Parameter Multiple Configuration Specification		
		4.1.3 Wheel Set Gauge	4.10.1 Energy Supply System	4.13.1.1 ETCS equipment on-board and its level 4.13.1.5 Train B or other train protection
4.1.2.1	Maximum design speed	Removed	Removed	Removed
4.1.5	Maximum number of trainsets or locomotives coupled together in multiple operation.	Removed	Removed	Removed
4.5.1	Permissible payload for different line categories	Removed		
4.5.3.4	Position of the axles along the unit (axle spacing): a: Distance between axles b: Distance from end axle to the end of the nearest coupling plane c: distance between two inside axles	Removed	Removed	Removed

#	Parameter	Parameter Multiple Configuration Specification		
		4.1.3 Wheel Set Gauge	4.10.1 Energy Supply System	4.13.1.1 ETCS equipment on-board and its level 4.13.1.5 Train B or other train protection
4.5.5	Total vehicle mass (for each vehicle of the unit)	Removed	Removed	Removed
4.5.6	Mass per wheel	Removed	Removed	Removed
4.6.4	Combination of maximum speed and maximum cant deficiency for which the vehicle was assessed		Removed	Removed
4.6.5	Rail inclination	Removed	Removed	Removed
4.7.2.1.6	Maximum brake thermal energy capacity	Removed	Removed	Removed
4.7.3.4	Parking brake	Removed	Removed	Removed
4.7.5	Emergency brake: Stopping distance and deceleration profile for each load condition per design maximum speed	Removed	Removed	Removed
4.7.6	For general operation: Brake weight percentage (λ) or Braked mass	Removed	Removed	Removed
4.7.7	Service brake: At maximum service brake: Stopping distance, Maximum deceleration, for the load condition 'design mass under normal payload' at the design maximum speed.	Removed	Removed	Removed
4.7.8	Wheel slide protection system	Removed	Removed	Removed
4.10.14	Electric units equipped with power or current limitation function	Removed		Removed
4.10.15	Mean contact force	Removed		Removed

As an example, parameter [4.1.2.1 Maximum design speed] used to have dependencies to Gauge, Energy and CCS, which could imply that the parameter had to be filled in more than once (once per combination of Gauge, CCS and Energy). An example is shown on Figure 1 below.

4.1.2 Speed : *	
4.1.2.1 Maximum design speed 1435mm / AC 25kV-50Hz / ASFA: *	<input type="text"/> km/h
4.1.2.1 Maximum design speed 1435mm / AC 25kV-50Hz / Crocodile: *	<input type="text"/> km/h
4.1.2.1 Maximum design speed 1435mm / DC 3kV / ASFA: *	<input type="text"/> km/h
4.1.2.1 Maximum design speed 1435mm / DC 3kV / Crocodile: *	<input type="text"/> km/h
4.1.2.1 Maximum design speed 1668mm / AC 25kV-50Hz / ASFA: *	<input type="text"/> km/h
4.1.2.1 Maximum design speed 1668mm / AC 25kV-50Hz / Crocodile: *	<input type="text"/> km/h
4.1.2.1 Maximum design speed 1668mm / DC 3kV / ASFA: *	<input type="text"/> km/h
4.1.2.1 Maximum design speed 1668mm / DC 3kV / Crocodile: *	<input type="text"/> km/h

Figure 1 – Parameter 4.1.2.1 previous dependencies to Gauge, Energy and CCS

Starting with the release 3.0 of ERATV, this parameter (among those others listed in Table 10) does not have any more dependencies, and therefore it will only appear once. An example is shown on Figure 2 below.

4.1.2 Speed : *	
4.1.2.1 Maximum design speed : *	<input type="text"/> km/h

Figure 2 – Parameter 4.1.2.1 without dependencies

This change implies the following:

- **Published records:** Existing published records will remain as they are.
- **New records or existing draft records:** Any new record, or any existing draft will require these parameters to be filled in again (as now there are no more dependencies)

- **Modification or correction to published records:** Any modification/correction to an existing published record will require these parameters to be reviewed, and to be filled in again. The previous existing values of the parameters can always be consulted in the published record.

7.4. "Others" option for some parameters values removed

The following parameters in Table 11 have had their lists of possible values modified. These parameters will not have any more, as a possible value, the option "other", which allowed the user to introduce any value.

This implies that any modification or correction to a Type which would contain an "other" value would get this value removed by ERATV.

Table 11 - Parameters with "Others" option removed

<i>Parameter Number</i>	<i>Parameter Name</i>
4.3.1	Temperature range
4.3.3	Snow, ice and hail conditions
4.6.5	Rail inclination
4.9.2	Axle bearing condition monitoring (hot axles box detection)
4.13.1.5	Class B or other train protection, control and warning legacy systems installed (system and, if applicable, version)
4.13.2.3	Class B or other radio legacy systems installed (system and, if applicable, version)
4.12.3.1	Platform heights for which the vehicle is designed.

For example, parameter [4.3.3. Snow, ice and hail conditions] previously allowed the users to introduce any "Other" value, as in Figure 3:

Figure 3 – Parameter 4.3.3 with "Other" value

Starting with release 3.0 of ERATV, this parameter (among others) does not allow any more the option "Other", as in Figure 4:

Figure 4 – Parameter 4.3.3 with no “Other” option.

This change implies that:

- **Published records:** Existing published records will remain as they are.
- **New records or Existing drafts:** Any new record, or any existing draft will not allow any value to be filled in under the option “Other” for the parameters above. If an “Other” value was already added in an existing *draft*, the “other” value will be removed.
- **Modification/correction to an existing published:** Any modification or correction to an existing published record will require all the above parameters in Table 11 to be reviewed. If any of those parameters was filled in with a value introduced by using the option “Other”, this value will get removed.

Special attention must be paid to parameter [4.13.1.5 Class B or other train protection, control and warning legacy systems installed (system and, if applicable, version)]. If an “Other” value was used for this parameter, this value will be removed. The removal of this value in 4.13.1.5 will have an impact on any other parameters depending on parameter [4.13.1.5 Class B or other train protection, control and warning legacy systems installed (system and, if applicable, version)].

For example, the removal of the “other” option in parameter 4.13.1.5 will imply that the following parameters are affected (as they depend on the value of 4.13.1.5). Therefore, the following parameters need to be reviewed, and filled in again:

- 2.1 Conformity with TSI and Sections not complied with
- 2.3 Applicable specific cases (specific cases conformity with which has been assessed)
- 3.1.2.3 Coded conditions for use and other restrictions
- 3.1.2.4 Non-coded conditions for use and other restrictions
- 3.1.3.1.5 Parameters for which conformity to applicable national rules has been assessed

7.5. New Registration method: “New type from a registered type”.

Starting with ERATV 3.0, a new registration method (exclusively under registration Regime Directive (EU) 2016/797) exists. This new registration method allows to create a *New type from a registered type*.

A new Type (from a registered Type) can be created following a new authorisation 14(1)(d) or an extension of the area of use 14(1)(c) if:

- Applicant is the Authorisation Holder, and so decides.
- Applicant is not the Authorisation Holder.

For further details, please see section 3.3.3.4 of [VA guidelines](#)² version 2.1.

²<https://www.era.europa.eu/system/files/2024-02/ERA1209-222%20Guidelines%20for%20PA%20VA%202.1.pdf>

8. Annex IV – Coded restrictions duplicating technical parameters

There may be a duplication of values between different sections of an ERATV record. For example, the maximum design speed is typically found in ERATV under parameters 4.1.2.1 and 3.1.2.3, with code 1.3 referring to “Speed restrictions in Km/h.” In simple cases, the value for the parameter 3.1.2.3 is equal to the value for parameter 4.1.2.1. It should be noted that, while parameter 4.1.2.1 represents a unique value in ERATV (regardless of the combinations of gauge, electrification or train protection system), parameter 3.1.2.3 varies depending on the combination.

When there are no differences between the technical parameter and the corresponding coded restriction (e.g. no actual limitation or constraint as compared to the nominal value), this should not be considered as a coded restriction and should not be indicated as such in the application form nor in the issue type authorisation / ERATV.

In other words, duplication of values in ERATV (e.g. repeating the same value in different places, which means there is no restriction as compared to the nominal value) should be avoided; the relevant coded condition for use and other restriction should be left empty.

The coded restrictions that (may) duplicate technical parameters in ERATV are:

Table 12 - Relationship between ERATV parameters and coded-restrictions

<i>Coded restriction</i>	<i>ERATV parameter</i>
1.1 Minimum curve radius	4.8.4 Minimum horizontal curve radius capability
1.2 Track circuit restrictions	4.14.1 Type of train detection systems for which the vehicle is designed & assessed
1.3 Speed restrictions	4.2.1.2 Maximum design speed
1.4 Use in multiple operation	4.1.5 Maximum number of trainsets or locomotives coupled together in multiple
2.1 Kinematic gauge	4.2.1 Reference profile
2.2.1 to 2.2.8 Wheelset gauge	4.1.3 Wheelset gauge
2.3 No CCS on board	4.13.1.11 Envelope of legally operated ETCS system versions ⁽¹⁾
2.4.10 ETCS	4.13.1.11 Envelope of legally operated ETCS system versions
2.4.20 GSM-R voice	4.13.2.1 GSM-R Radio voice on board and its Baseline
2.4.21 GSM-R for ETCS	4.13.2.7 GSM-R Radio Data communication on board and its Baseline
2.5.1xx Class B signalling system	4.13.1.5 Class B or other train protection control and warning systems installed ⁽²⁾
2.5.2xx Class B radio system	4.13.2.3 Class B or other radio systems installed ⁽²⁾
3.1.1 to 3.1.4 Climatic zone	4.3.1 Temperature range
4.1 Time based restriction on use	3.1.2.2 Validity of authorisation

(1) When “None” option is selected for a vehicle that can be fitted with CCS and has driving cabs

(2) The system referred to in ERA/TD/2011-09 Appendix 2 table 5 (2.6.1.201 SSC BL3 - Italy) does not qualify for a Class B signalling system on-board; if this is the only CCS signalling system on board, 4.13.1.5 should be filled in as “None”. Similarly, the system referred to in ERA/TD/2011-09 Appendix 2 table 6 (2.6.2.201 TETRA-URCA - Finland) does not qualify for a Class B radio system on-board; if this is the only CCS radio system on board, 4.13.2.3 should also be filled in as “None”. Both codes 2.6.1.201 and 2.6.2.201 are used for systems that are neither ERTMS nor listed as Class B system and are kept for historical compatibility purposes.

9. Annex V - Alignments between RINF and ERATV

In accordance with Annex I, 2.5 of [Commission Implementing Decision 2011/665/EU](#), the following updates on the list of ERATV parameter's reference values are done in order to align RINF and ERATV.

9.1. Updates to Parameter [4.12.3.1 Platform heights for which the vehicle is designed].

The values of the reference list of parameter [4.12.3.1 Platform heights for which the vehicle is designed] have been updated as follow:

Old value	Comment	New value
Specific case Estonia, Latvia and Lithuania: 200 mm	Transformed into 200 mm	200 mm
550 mm	Unchanged	550 mm
760 mm	Unchanged	760 mm
900 mm	Unchanged	900 mm
Specific case Ireland: 915 mm	Transformed into 915 mm	915 mm
Specific case Germany: 960 mm	Transformed into 960 mm	960 mm
385 mm	Deactivated	
750 mm	Deactivated	
Specific case Austria, Germany: 550 mm, 960 mm	Deactivated	
Specific case Portugal: 685 mm or 900 mm	Deactivated	
Specific case Spain: 760 mm, 680 mm, 550 mm	Deactivated	
Specific case UK: 915 mm	Deactivated	
Other (specify)	Deactivated	
	New value	220 mm
	New value	250 mm
	New value	280 mm
	New value	300 mm
	New value	350 mm
	New value	380 mm
	New value	580 mm
	New value	680 mm
	New value	685 mm
	New value	730 mm
	New value	840 mm

Old value	Comment	New value
	New value	920 mm
	New value	1100 mm
	New value	Not applicable for Locomotives
