1,290 electric units and passenger cars

PORTFOLIO AT A GLANCE

Jan B

- The NIS2 Directive is the EU-wide legislation on cybersecurity. It provides legal measures to boost the overall level of cybersecurity in the EU.
 - Directive on measures for a high common level of cybersecurity across the Union (NIS2 Directive) | Shaping Europe's digital future (europa.eu)
- Directive of the European Union
- Not binding by itself
- Needs to be implemented into national law
- Therefore, it will be slightly different in each member country = 27 flavors
- Disclaimer: EU Directive vs Czech CS Law (draft) and translations
- No room for detailed presentation, therefore, just highlights and what I think is important for Rail Industry

TIMELINE

- Long History: NIS1, NIS2
- Deadline October 17th
- Current Status Czechia:
 - Government Approved
 - Currently in Parliament
 - October not realistic
 - Will become effective in 2025 (Let's Hope!)
- Many other countries in similar position
- But there is no doubt it will be implemented in all EU countries

EVERYBODY WILL BE IMPACTED

List of regulated services in national law

Important or **Essential Level** from national law

Special section of Czech cyber security law, not applicable for Rail Industry

Skoda Group Analysis (Status)

Implement security measures

Asset Management needed CMDB In case assets for regulated services in scope are not identified -> all assets are in scope

Cyber Security requirements as defined in national law based on important or essential level

RAIL IS REGULATED BY DIRECTIVE

Transport 2.

(b) Rail

- Council (⁹)
- defined in Article 3, point (12), of that Directive

DIRECTIVE 2012/34/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

of 21 November 2012

establishing a single European railway area

Article 3

Definitions

For the purpose of this Directive, the following definitions apply:

- (1) •railway undertaking• means any public or private undertaking licensed according to this Directive, the principal business of which is to provide services for the transport of goods and/or passengers by rail with a requirement that the undertaking ensure traction; this also includes undertakings which provide traction only;
- ·infrastructure manager means any body or firm responsible in particular for establishing, managing and maintaining railway (2)infrastructure, including traffic management and control-command and signalling; the functions of the infrastructure manager on a network or part of a network may be allocated to different bodies or firms;

Infrastructure managers as defined in Article 3, point (2), of Directive 2012/34/EU of the European Parliament and of the

- Railway undertakings as defined in Article 3, point (1), of Directive 2012/34/EU, including operators of service facilities as

REQUIREMENTS / MEASURES

Essential Level

Organizational

- IS management system
- **Senior management responsibilities**
- Security roles
- Security policy and documentation
- Asset management
- **Risk management**
- Supplier management
- Human resource security
- Change management
- Acquisition, development and maintenance
- Access control/management
- **CS** event and incident management
- **Business Continuity management**
- **CS** Audit

Technical

- **Physical security**
- **Security of communication networks**
- **Identity management and verification**
- **Access control**
- **Detection of CS events**
- Logging of CS and operational events
- **Evaluating CS events**
- **Application Security**
- **Cryptographic algorithms**
- Ensuring availability of the regulated service
- Security of industrial, control and similar technical assets

Important Level

Organizational and Technical

- **CS** implementation
- Senior management responsibilities
- Asset management
- **Risk management**
- Human resource security
- **Business Continuity management**
- Access control
- Identity management and verification
- **Detection of CS events**
- Logging of CS and operational events
- **CS** event and incident management
- **Application Security**
- **Cryptographic algorithms**

MANUFACTURER OPERATOR RELATIONSHIP

- Supplier Management
- **Important Supplier**
- Some requirements will need cooperation between manufacturer (suppliers) and operator
- Start early
- Needs to lead to a Master Agreement Amendment
- Do not underestimate services that are not your core business (solar, hydrogen, military, ...)
